*Face* William A. Ewing, Nathalie Herschdorfer, 2006 The first full scale study of the face in contemporary photography a challenge to accepted notions of what constitutes a portrait In this groundbreaking publication William A Ewing announces the death of the conventional portrait In an age when we are bombarded with flawless images of youthful beauty when rejuvenation is available through a jar of cream or a scalpel artists and photographers seek to portray the face in new ways Through a variety of techniques including computer manipulation photomontage and retouching the artists present their new portraits They replace clarity with blur the split second with the elastic moment reality with hyperreality questioning the notion of a fixed identity of universality of expression of what constitutes beauty Whether Cindy Sherman's disquieting disguises Gillian Wearing's masked self portrait LawickM ller's composite portraits of couples Thomas Ruff's studiously neutral facade or Orlan's disturbing experiments with cosmetic surgery these faces demand attention Other artists represented in the book include Inez van Lamsweerde and Vinoodh Matadin Martin Parr Philip Lorca diCorcia Rineke
