Planet covers must see spots but also enables curious travellers to get off beaten paths to understand more of the culture of the places in which they find themselves The Green City and Social Injustice Isabelle Anguelovski, James J. T.

Connolly, 2021-11-29 The Green City and Social Injustice examines the recent urban environmental trajectory of 21 cities in Europe and North America over a 20 year period. It analyses the circumstances under which greening interventions can create a new set of inequalities for socially vulnerable residents while also failing to eliminate other environmental risks and impacts. Based on fieldwork in ten countries and on the analysis of core planning policy and activist documents and data, the book offers a critical view of the growing green planning orthodoxy in the Global North. It highlights the entanglements of this tenet with neoliberal municipal policies including budget cuts for community initiatives, long term green spaces and housing for the most fragile residents and the focus on large scale urban redevelopment and high end real estate investment. It also discusses hopeful experiences from cities where urban greening has long been accompanied by social equity policies or managed by community groups organizing around environmental justice goals and strategies. The book examines how displacement and gentrification in the context of greening are not only physical but also socio cultural, creating new forms of social erasure and trauma for vulnerable residents. Its breadth and diversity allow students, scholars and researchers to debunk the often depoliticized branding and selling of green cities and reinsert core equity and justice issues into green city planning, a much needed perspective. Building from this critical view, the book also shows how cities that prioritize equity in green access, in secure housing and in bold social policies can achieve both environmental and social gains for all.

Economics for Real People Gene Callahan, 2002 **España & Portugal : Strassen- und Reiseatlas** Pneu Michelin (Firm), Michelin Travel Publications (Firm), 2001 *Bachour* Antonio Bachour, 2015 *Forest Landscape Restoration* John Stanturf, David Lamb, Palle Madsen, 2014-12-14. Restoration ecology as a scientific discipline developed from practitioners' efforts to restore degraded land with interest also coming from applied ecologists attracted by the potential for restoration projects to apply and/or test developing theories on ecosystem development. Since then, forest landscape restoration (FLR) has emerged as a practical approach to forest restoration, particularly in developing countries where an approach which is both large scale and focuses on meeting human needs is required. Yet despite increased investigation into both the biological and social aspects of FLR, there has so far been little success in systematically integrating these two complementary strands. Bringing experts in landscape studies, natural resource management and forest restoration together with those experienced in conflict management, environmental economics and urban studies, this book bridges that gap to define the nature and potential of FLR as a truly multidisciplinary approach to a global environmental problem. The book will provide a valuable reference to graduate students and researchers interested in ecological restoration, forest ecology and management, as well as to professionals in environmental restoration, natural resource management, conservation and environmental policy.
