Fast Food Nation Eric Schlosser,2012 An exploration of the fast food industry in the United States from its roots to its long term consequences Guide to Reprints ,2009 **European Elites and Ideas of Empire, 1917-1957** Dina Gusejnova,2016-06-16 Explores European civilisation as a concept of twentieth century political practice and the project of a transnational network of European elites This title is available as Open Access Foodies Josee Johnston,Shyon Baumann,2009-12-04 This important new cultural analysis tells two stories about food The first depicts good food as democratic Foodies frequent hole in the wall ethnic eateries appreciate the pie found in working class truck stops and reject the snobbery of fancy French restaurants with formal table service The second story describes how food operates as a source of status and distinction for economic and cultural elites indirectly maintaining and reproducing social inequality While the first storyline insists that anybody can be a foodie the second asks foodies to look in the mirror and think about their relative social and economic privilege By simultaneously considering both of these stories and studying how they operate in tension a delicious sociology of food becomes available perfect for teaching a broad range of cultural sociology courses

Confessions of the Pricing Man Hermann Simon,2015-10-20 The world s foremost expert on pricing strategy shows how this mysterious process works and how to maximize value through pricing to company and customer In all walks of life we constantly make decisions about whether something is worth our money or our time or try to convince others to part with their money or their time Price is the place where value and money meet From the global release of the latest electronic gadget to the bewildering gyrations of oil futures to markdowns at the bargain store price is the most powerful and pervasive economic force in our day to day lives and one of the least understood The recipe for successful pricing often sounds like an exotic cocktail with equal parts psychology economics strategy tools and incentives stirred up together usually with just enough math to sour the taste That leads managers to water down the drink with hunches and rules of thumb or leave out the parts with which they don t feel comfortable While this makes for a sweeter drink it often lacks the punch to have an impact on the customer or on the business It doesn t have to be that way though as Hermann Simon illustrates through dozens of stories collected over four decades in the trenches and behind the scenes A world renowned speaker on pricing and a trusted advisor to Fortune 500 executives Simon s lifelong journey has taken him from rural farmers markets to

a distinguished academic career to a long second career as an entrepreneur and management consultant to companies large and small throughout the world Along the way he has learned from Nobel Prize winners and leading management gurus and helped countless managers and executives use pricing as a way to create new markets grow their businesses and gain a sustained competitive advantage He also learned some tough personal lessons about value how people perceive it and how people profit from it In this engaging and practical narrative Simon leaves nothing out of the pricing cocktail but still makes it go down smoothly and leaves you wanting to learn more and do more as a consumer or as a business person You will never look at pricing the same way again

The Making and Circulation of Nordic Models, Ideas and Images Haldor Byrkjeflot, Lars Mjøset, Mads Mordhorst, Klaus Petersen, 2021-10-19 This critical and empirically based volume examines the multiple existing Nordic models providing analytically innovative attention to the multitude of circulating ideas images and experiences referred to as Nordic It addresses related paradoxes as well as patterns of circulation claims about the exceptionality of Nordic models and the diffusion and impact of Nordic experiences and ideas Providing original case studies the book further examines how the Nordic models have been constructed transformed and circulated in time and in space It investigates the actors and channels that have been involved in circulating models journalists and media bureaucrats and policy makers international organizations national politicians and institutions scholars public diplomats and analyses where and why models have travelled Finally the book shows that Nordic models perspectives or ideas do not always originate in the Nordic region nor do they always develop as deliberate efforts to promote Nordic interests This book will be of key interest to Nordic and Scandinavian studies European studies and more broadly to history sociology political science marketing social policy organizational theory and public management The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Two Sides of a Barricade Christian Scholl, 2012-01-01 Two Sides of a Barricade argues that to construct global democracy conflict and dissent must be taken seriously Christian Scholl explores the political significance of the

confrontations within four sites of interaction bodies space communication and law Each site of struggle provides a different entry point to understand the influence of protester and police tactics on each other At the same time the four sites of struggle allow a comprehensive analysis of how the contestation of global hegemonic forces during summit protests trigger a preemptive shift in social control through increased deployment of biopolitical forms of power

Culinary Turn Nicolaj van der Meulen,Jörg Wiesel,Anneli Käsmayr,2017 Kitchen cooking nutrition and eating have become omnipresent cultural topics They stand at the center of design gastronomy nutrition science and agriculture Artists have appropriated cooking as an aesthetic practice in turn cooks are adapting the staging practices that go with an artistic self image This development is accompanied by a philosophy of cooking as a speculative cultural technique This volume investigates the dimensions of a new culinary turn combining for the very first time contributions from the theory and practice of cooking

Tensile Surface Structures Michael Seidel,2009-08-11 Tensile surface structures are the visual expression of an intensive rethinking of the topic of building envelopes by designers Advances in design methods materials construction elements and assembly and erection planning in the field of lightweight construction are enabling ever more exacting applications of tensile structures with envelope and structural functions especially in roofing over large clear spans without internal support However the particular mechanical characteristics of the materials used in the construction of textile structures demand consideration of the question of buildability This book provides answers by discussing the fundamental influence of material manufacture and assembly in deciding the most suitable type of building or structure and its detailing in the design process The fundamentals of material composition manufacturing process patterning and the behaviour of flexible structural systems are all explained here as well as their use as structural and connection elements and special attention is given to the erection of wide span lightweight structures The erection equipment is described as well as the lifting and tensioning process and the construction methods used to erect the characteristic types of tensile structures illustrated with a selection of example projects

The Real and Virtual Worlds of Spatial Planning Martina Koll-Schretzenmayr,Marco Keiner,Gustav Nussbaumer,2013-03-09 Experiencing the world of daily life means to observe and perceive the natural the man made the socio spatial and the politico economic elements of the environment we live in But have you ever tried to explain the phenomena of daily life such as a traffic jam or mass transit to a child It will take you quite a while to find suitable images to make invisible forces perceivable and concepts like timetables bus routes or capacity constraints comprehensible This exercise alone will convince you that we need imagery or virtual worlds to cope with the complexity of the real world The task of spatial planning is to design implement and manage alternative futures for a complex dynamic socio spatial environment that emerges from a wide range of intertwined social political economic and environmental processes In order to learn about these processes and gain knowledge that enables spatial planners to better understand and manage socio spatial reality they need to think in and work with virtual worlds

Embedded Security in Cars Kerstin Lemke,Christof Paar,Marko Wolf,2006-03-28 Most

innovations in the car industry are based on software and electronics and IT will soon constitute the major production cost factor. It seems almost certain that embedded IT security will be crucial for the next generation of applications. Yet whereas software safety has become a relatively well established field, the protection of automotive IT systems against manipulation or intrusion has only recently started to emerge. Lemke, Paar and Wolf collect in this volume a state of the art overview on all aspects relevant for IT security in automotive applications. After an introductory chapter written by the editors themselves, the contributions from experienced experts of different disciplines are structured into three parts. Security in the Automotive Domain describes applications for which IT security is crucial, like immobilizers, tachographs and software updates. Embedded Security Technologies details security technologies relevant for automotive applications, e.g. symmetric and asymmetric cryptography and wireless security. Business Aspects of IT Systems in Cars shows the need for embedded security in novel applications like location based navigation systems and personalization. The first book in this area of fast growing economic and scientific importance, it is indispensable for both researchers in software or embedded security and professionals in the automotive industry.

Kitchens Gary Alan Fine, 2008-12-02. *Kitchens* takes us into the robust, overheated backstage world of the contemporary restaurant. In this rich, often surprising portrait of the real lives of kitchen workers, Gary Alan Fine brings their experiences, challenges and satisfactions to colorful life. A new preface updates this riveting exploration of how restaurants actually work, both individually and as part of a larger culinary culture.

Winning the Oil Endgame Amory B. Lovins, 2004. Enough about the oil problem. Here's the solution. Over a few decades, starting now, a vibrant US economy, then others, can completely phase out oil. This will save a net 70 billion a year, revitalize key industries and rural America, create a million jobs and enhance security. Here's the roadmap, independent, peer-reviewed, co-sponsored by the Pentagon for the transition beyond oil, led by business and profit.

Automotive Mechatronics: Operational and Practical Issues B. T. Fijalkowski, 2010-11-25. This book presents operational and practical issues of automotive mechatronics with special emphasis on the heterogeneous automotive vehicle systems approach and is intended as a graduate text as well as a reference for scientists and engineers involved in the design of automotive mechatronic control systems. As the complexity of automotive vehicles increases, so does the dearth of high competence, multi-disciplined automotive scientists and engineers. This book provides a discussion into the type of mechatronic control systems found in modern vehicles and the skills required by automotive scientists and engineers working in this environment. Divided into two volumes and five parts, *Automotive Mechatronics* aims at improving automotive mechatronics education and emphasises the training of students' experimental hands-on abilities, stimulating and promoting experience among high education institutes and produce more automotive mechatronics and automation engineers. The main subjects that are treated are:

VOLUME I: RBW or XBW unibody or chassis motion mechatronic control hypersystems, DBW, AWD propulsion mechatronic control systems, BBW, AWB dispulsion mechatronic control systems.

VOLUME II: SBW, AWS diversion mechatronic control systems, ABW, AWA suspension.

mechatronic control systems This volume was developed for undergraduate and postgraduate students as well as for professionals involved in all disciplines related to the design or research and development of automotive vehicle dynamics powertrains brakes steering and shock absorbers dampers Basic knowledge of college mathematics college physics and knowledge of the functionality of automotive vehicle basic propulsion propulsion conversion and suspension systems is required

The Perfectionist Rudolph Chelminski, 2005-05-19 An unforgettable portrait of France's legendary chef and the sophisticated unforgiving world of French gastronomy Bernard Loiseau was one of only twenty five French chefs to hold Europe's highest culinary award three stars in the Michelin Red Guide and only the second chef to be personally awarded the Legion of Honor by a head of state Despite such triumphs he shocked the culinary world by taking his own life in February 2003 The GaultMillau guidebook had recently dropped its ratings of Loiseau's restaurant and rumors swirled that he was on the verge of losing a Michelin star a prediction that proved to be inaccurate Journalist Rudolph Chelminski who befriended Loiseau three decades ago and followed his rise to the pinnacle of French restaurateurs now gives us a rare tour of this hallowed culinary realm The Perfectionist is the story of a daydreaming teenager who worked his way up from complete obscurity to owning three famous restaurants in Paris and rebuilding La C te d Or transforming a century old inn and restaurant that had lost all of its Michelin stars into a luxurious destination restaurant and hotel He started a line of culinary products with his name on them appeared regularly on television and in the press and had a beautiful intelligent wife and three young children he adored Bernard Loiseau seemed to have it all An unvarnished glimpse inside an echelon filled with competition culture wars and impossibly high standards The Perfectionist vividly depicts a man whose energy and enthusiasm won the hearts of staff and clientele while self doubt and cut throat critics took their toll

Archaeology

Anthropology and Interstellar Communication Douglas A. Douglas A. Vakoch, 2015-03-24 Addressing a field that has been dominated by astronomers physicists engineers and computer scientists the contributors to this collection raise questions that may have been overlooked by physical scientists about the ease of establishing meaningful communication with an extraterrestrial intelligence These scholars are grappling with some of the enormous challenges that will face humanity if an information rich signal emanating from another world is detected By drawing on issues at the core of contemporary archaeology and anthropology we can be much better prepared for contact with an extraterrestrial civilization should that day ever come
