**The Death of Expertise** Tom Nichols,2017-02-01 Technology

and increasing levels of education have exposed people to more information than ever before These societal gains however have also helped fuel a surge in narcissistic and misguided intellectual egalitarianism that has crippled informed debates on any number of issues Today everyone knows everything with only a quick trip through WebMD or Wikipedia average citizens believe themselves to be on an equal intellectual footing with doctors and diplomats All voices even the most ridiculous demand to be taken with equal seriousness and any claim to the contrary is dismissed as undemocratic elitism Tom Nichols The Death of Expertise shows how this rejection of experts has occurred the openness of the internet the emergence of a customer satisfaction model in higher education and the transformation of the news industry into a 24 hour entertainment machine among other reasons Paradoxically the increasingly democratic dissemination of information rather than producing an educated public has instead created an army of ill informed and angry citizens who denounce intellectual achievement When ordinary citizens believe that no one knows more than anyone else democratic institutions themselves are in danger of falling either to populism or to technocracy or in the worst case a combination of both An update to the 2017breakout hit the paperback edition of The Death of Expertise provides a new foreword to cover the alarming exacerbation of these trends in the aftermath of Donald Trump s election Judging from events on the ground since it first published The Death of Expertise issues a warning about the stability and survival of modern democracy in the Information Age that is even more important today

In the Metro Marc Augé,2002 Tourists climb the

Eiffel Tower to see Paris Parisians know that to really see the city you must descend into the metro In this revelatory book Marc Augé takes readers below Paris in a work that is both an ethnography of the city and a personal narrative Guiding us through history memory and physical space Augé juxtaposes the romance of the metro with the reality of multiethnic urban France His work is part autobiography with impressions from a lifetime riding the trains part meditation on self and memory reflected in the people and places underneath Paris part analysis of a place where the third world and the first world meet where remnants of cultures move and press together and part a reflection on anthropology in an era of globalization and urban development Although he is a pillar of French thought In the Metro is Augé s first major critical and creative work translated into English It shows him to be firmly rooted in a tradition of literary ethnography that reaches back to Claude Levi Strauss and Michel de Certeau but also engaged in current theoretical debates in literary and cultural studies In Augé s idiosyncratic and innovative approach the act of observing the quotidian is elevated to an art The writer and his history become part of the field he observes and anthropology interacts with a site urban life usually reserved for sociology and cultural studies Throughout Augé reveals a passion for his milieu seeing the metro as a place rich with history and literature an eclectic egalitarian society

**Exhibiting War** Jennifer Wellington,2019-07-11 What does it mean to display war

Examining a range of different exhibitions in Britain Canada and Australia Jennifer Wellington reveals complex imperial dynamics in the ways these countries developed diverging understandings of the First World War despite their cultural political and institutional similarities While in Britain a popular narrative developed of the conflict as a tragic rupture with the past Australia and Canada came to see it as engendering national birth through violence Narratives of the war's meaning were deliberately constructed by individuals and groups pursuing specific agendas to win the war and immortalise it at the same time Drawing on a range of documentary and visual material this book analyses how narratives of mass violence changed over time Emphasising the contingent development of national and imperial war museums it illuminates the way they acted as spaces in which official academic and popular representations of this violent past intersect     Fast Food Nation Eric Schlosser,2012 An exploration of the fast food industry in the United States from its roots to its long term consequences     An Enterprise Map of Ghana John Sutton,Bennet Kpentey,2012 Ghana's economy has grown rapidly over the past decade and the goal of becoming a middle income country in the fairly near future now seems attainable The likely contribution of the oil sector makes the goal look all the more achievable Yet this goal is unlikely to be attained without a substantial advance in Ghana's industrial capability This is therefore a good moment to ask some questions What are the current capabilities of Ghanaian firms Where did those capabilities come from Can the development of the oil sector lead to a parallel advance in related local industries This volume presents the first general overview of Ghana's industrial sector Each industry is profiled in detail and the history and capabilities of leading firms are explored at length This is the second volume in John Sutton's Enterprise Map series which profiles the industrial capabilities of selected countries in sub Saharan Africa The first volume was on Ethiopia and the forthcoming third volume will be on Tanzania Further volumes in this series will appear in due course     Economics for Real People Gene Callahan,2002     The Battle for Spain Antony Beevor,2006-06-01 A fresh and acclaimed account of the Spanish Civil War by the bestselling author of Stalingrad and The Battle of Arnhem To mark the 70th anniversary of the Spanish Civil War's outbreak Antony Beevor has written a completely updated and revised account of one of the most bitter and hard fought wars of the twentieth century With new material gleaned from the Russian archives and numerous other sources this brisk and accessible book Spain's 1 bestseller for twelve weeks provides a balanced and penetrating perspective explaining the tensions that led to this terrible overture to World War II and affording new insights into the war its causes course and consequences     The Purpose of Power Alicia Garza,2020-10-20 An essential guide to building transformative movements to address the challenges of our time from one of the country's leading organizers and a co creator of Black Lives Matter Excellent and provocative a gateway to urgent debates Keeanga Yamahtta Taylor The New Yorker NAMED ONE OF THE BEST BOOK OF THE YEAR BY Time Marie Claire Kirkus Reviews In 2013 Alicia Garza wrote what she called a love letter to Black people on Facebook in the aftermath of the acquittal of the man who murdered seventeen year old Trayvon Martin Garza wrote Black people I love you I love us Our lives matter With the speed

and networking capacities of social media BlackLivesMatter became the hashtag heard round the world But Garza knew even then that hashtags don t start movements people do Long before BlackLivesMatter became a rallying cry for this generation Garza had spent the better part of two decades learning and unlearning some hard lessons about organizing The lessons she offers are different from the rules for radicals that animated earlier generations of activists and diverge from the charismatic patriarchal model of the American civil rights movement She reflects instead on how making room amongst the woke for those who are still awakening can inspire and activate more people to fight for the world we all deserve This is the story of one woman s lessons through years of bringing people together to create change Most of all it is a new paradigm for change for a new generation of changemakers from the mind and heart behind one of the most important movements of our time

*Archaeology Anthropology and Interstellar Communication* Douglas A. Vakoch, 2015-03-24 Addressing a field that has been dominated by astronomers physicists engineers and computer scientists the contributors to this collection raise questions that may have been overlooked by physical scientists about the ease of establishing meaningful communication with an extraterrestrial intelligence These scholars are grappling with some of the enormous challenges that will face humanity if an information rich signal emanating from another world is detected By drawing on issues at the core of contemporary archaeology and anthropology we can be much better prepared for contact with an extraterrestrial civilization should that day ever come
