**Driving Modernity** Massimo Moraglio, 2017-04 On March 26th 1923 in a formal ceremony construction of the Milan Alpine Lakes autostrada officially began the preliminary step toward what would become the first European motorway That Benito Mussolini himself participated in the festivities indicates just how important the project was to Italian Fascism Driving Modernity recounts the twisting fortunes of the autostrada which alongside railways aviation and other forms of mobility Italian authorities hoped would spread an ideology of technological nationalism It explains how Italy ultimately failed to realize its mammoth infrastructural vision addressing the political and social conditions that made a coherent plan of development impossible

**The Dynamics of Big Business** Veronica Binda, 2013-06-26 Throughout the Twentieth Century big business has been a basic institution Large corporations have provided a fundamental contribution to the wealth of nations and at the same time have had a remarkable impact on the political and social systems within which they have operated It is difficult to understand the development of the most advanced economies if we do not consider the specific evolution of big business in every national case On the other hand it is not possible to explain the shape and behavior of big business without considering its development as part of the history of the country in which they operate The largest US

German British and French firms were key actors in favoring their nations development and even at the end of the Twentieth Century made a very important contribution to their growth In many countries a stable core of large corporations developed only relatively lately or did not develop at all and under these circumstances big business was not able to significantly participate in the economic growth of such countries Scholars who dealt with the economic history of Italy and Spain are generally unanimous in tagging these nations as industrial late comers ineffective in promoting big autochthonous private and State owned firms dominated by family companies and characterized by a strong competitive advantage on the part of small and medium sized enterprises At the same time Spanish and Italian business and economic historians have tended to say little about the role and features of big business This book thus fills a significant gap in the work on the development of Southern European capitalism and its large corporations by analyzing the Italian and Spanish cases and comparing them with each other and with what has occurred in the United States and in the largest European nations Examining both the macro dynamics national but also supra national and the micro level utilizing samples of big corporations and going deeply into some company cases this volume identifies some important protagonists of the Italian and Spanish economies such as the State families and foreign investors and investigates a wider panorama which includes the political economic and social relationships of the corporations providing insights into the form of capitalism that exists in these countries

*Southern Italy in the Late Middle Ages* Eleni Sakellariou, 2011-12-09 The first full length study of mainland southern Italy's domestic market in the late Middle Ages this book discusses the interaction between population the market and the region's institutional framework in the context of the impact of the late medieval crisis on the European economy Based on new or little used documentary evidence it adopts an interdisciplinary approach and combines economic history with elements of economic theory to reassess common knowledge on demographic and urbanization trends the organization of the domestic market the role of the state and on actual patterns of agricultural production industrial activity and commercial itineraries The result is a fresh look at the late medieval economy of the kingdom of Naples which it seems now is worth studying for its own merit
