

A sepia-toned photograph of the Michigan City Lighthouse, a tall, cylindrical stone tower with a lantern room at the top. The lighthouse is situated on a rocky island, and the surrounding area is covered in a thick layer of snow. Two people are visible in the foreground, sitting on the snow. To the right of the lighthouse, there is a small, rectangular building with several windows. The sky is overcast and hazy.

**Seas**, 2000      Sail, Steam, and Diesel Eric Hirsimaki, 2024-04-01 Water transportation has played a key role in the Great Lakes region's settlement and economic growth from providing entry into the new lake states to offering cheap transportation for the goods they produced. There are numerous tales surrounding the Great Lakes shipping trade but few storytellers have addressed the factors that influenced the use, design, and evolution of the ships that sailed the inland seas. *Sail Steam and Diesel: Moving Cargo on the Great Lakes* provides a comprehensive overview of the evolution of Great Lakes ships over the centuries from small birch bark canoes originally used in the region to the massive thousand footers of today. The author also looks at the economics of vessel operation in the context of the expanding scope of the shipping industry which was crucial in catapulting America into becoming an industrial juggernaut. The captains of industry and the sailors whose labor propelled the trade populate this account which also offers solemn acknowledgment of the high cost paid in both lost ships and lives. Although they might not realize it, millions of Americans have owed their livelihoods to the Great Lakes boats, and this volume is an excellent way to recognize the importance of this regional industry.      *Michigan Yesterday & Today* Robert W.
