Micro And Macrodata Of Firms Statistical Analysis And International Comparison:

Micro- and Macrodata of Firms Silvia Biffignandi, 2013-03-08 In industrial countries there is a strong interest in the international comparison of business data regarding productivity efficiency and competitiveness This volume presents methods for the statistical analysis of micro and macrodata of firms and for an international comparison of the aggregates Case studies referring to specific countries play an important role for the development of economic hypotheses that should be tested at the international level

Foreign-Owned Firms R. Jungnickel, 2002-10-14 Foreign owned firms FoFs can have significant implications in terms of employment income and technology for the national economies involved This book compares the efficiency of domestic and FoFs and also looks at the performance of FoFs in several different countries Contributors take a broad variety of research approaches with a focus on the use of firm specific data from France Germany Austria and Sweden They conclude that foreign ownership matters but the real difference is not between FoFs and national firms but between multinational and domestic firms

Diversity and Transformations of Asian Capitalisms Robert Boyer, Hiroyasu Uemura, Akinori Isogai, 2013-05-13 Among a vast literature on the Asian economies the book proposes a distinctive approach inspired by Regulation Theory in order to understand the current transformations of the Asian economies The book follows their transformations after the 1997 Asian crisis until the subprime crisis During this period the viability of their growth regime was to coherence of five basic institutional forms the degree of competition and insertion into the world economy the nature of labour market organization the monetary and exchange rate regimes and finally the style for State intervention via legislation public spending and tax The book provides new findings The degree of financial liberalization and opening to the world economy largely determines the severity of the 2008 2009 recession and the political economic reactions of each Asian country to the subprime crisis Asian capitalisms are distinct from American and European ones but they are quite diverse among themselves and this differentiation has been widening during the last decade This book will help to shed light on a de facto regional economic integration is taking place in Asia but unsolved past political conflicts do hinder the institutionalisation of these interdependencies

Productivity, Technology and Economic Growth Bart van Ark, Simon K. Kuipers, Gerard H. Kuper, 2013-03-09 Productivity Technology and Economic Growth presents a selection of recent research advances on long

term economic growth While the contributions stem from both economic history macro and microeconomics and the economics of innovation all papers depart from a common viewpoint the key factor behind long term growth is productivity and the latter is primarily driven by technological change Most contributions show implicitly or explicitly that technological change is at least partly dependent on growth itself Furthermore technology appears to interact strongly with investment in physical and human capital as well as with changes in historical political and institutional settings Together these papers are an up to date account of the remarkable convergence in theoretical and empirical work on productivity and growth over the past decades The first part deals with the characteristics of growth regimes over longer periods ranging from 20 years to two centuries The next four chapters study the determinants of productivity growth and in some cases productivity slowdown during the last quarter of the twentieth century The final five chapters focus on the role of technology and innovation as the key determinants of growth Productivity Technology and Economic Growth is therefore a welcome collection for academic scholars and graduate students in economics history and related social sciences as well as for policy makers

Journal of Japanese Trade & Industry ,2001 *Challenges of Globalization in the Measurement of National Accounts* Nadim Ahmad,Brent R. Moulton,J. David Richardson,Peter van de Ven,2023-07-14 An essential collection at the intersection of globalization production supply chains corporate finance regulation and economic measurement The substantial increase in the complexity of global supply chains and other production arrangements over the past three decades has challenged some traditional measures of national income account aggregates and raised the potential for distortions in conventional calculations of GDP and productivity This volume examines a variety of multinational business activities and assesses their impact on economic measurement Several chapters consider how global supply chains complicate the interpretation of traditional trade statistics and how new measurement techniques can provide information about global production arrangements Other chapters examine the role of intangible capital in global production including the output of factoryless goods producers and the problems of measuring R D in a globalized world The studies in this volume also explore potential ways to enhance the quality of the national accounts by improving data collection and analysis and by updating the standards for measurement

Nordic Labour Market Research on Register Data Torben Pilegaard Jensen,Anders Holm,2001 Agriculture in Africa Luc Christiaensen,Lionel Demery,2017-10-25 Stylized facts set agendas and shape debates In rapidly changing and data scarce environments they also risk being ill informed outdated and misleading So following higher food prices since the 2008 world food crisis robust economic growth and rapid urbanization and climatic change is conventional wisdom about African agriculture and rural livelihoods still accurate Or is it more akin to myth than fact The essays in *Agriculture in Africa Telling Myths from Facts* aim to set the record straight They exploit newly gathered

nationally representative geo referenced information at the household and plot level from six African countries In these new Living Standard Measurement Study Integrated Surveys on Agriculture every aspect of farming and non farming life is queried from the plots farmers cultivate the crops they grow the harvest that is achieved and the inputs they use to all the other sources of income they rely on and the risks they face Together the surveys cover more than 40 percent of the Sub Saharan African population In all sixteen conventional wisdoms are examined relating to four themes the extent of farmer s engagement in input factor and product markets the role of off farm activities the technology and farming systems used and the risk environment farmers face Some striking surprises in true myth busting fashion emerge And a number of new issues are also thrown up The studies bring a more refined empirically grounded understanding of the complex reality of African agriculture They also confirm that investing in regular nationally representative data collection yields high social returns

Executive Compensation and Shareholder Value Jennifer Carpenter,D. Yermack,2013-04-17 Executive compensation has gained widespread public attention in recent years with the pay of top U S executives reaching unprecedented levels compared either with past levels with the remuneration of top executives in other countries or with the wages and salaries of typical employees The extraordinary levels of executive compensation have been achieved at a time when U S public companies have realized substantial gains in stock market value Many have cited this as evidence that U S executive compensation works well rewarding managers who make difficult decisions that lead to higher shareholder values while others have argued that the overly generous salaries and benefits bear little relation to company performance Recent conceptual and empirical research permits for the first time a truly rigorous debate on these and related issues which is the subject of this volume *Journal of Economic Literature* ,1999 *Frontiers in Economics* Klaus F.

Zimmermann,2013-03-20 Economic Theory academic policy analysis and public policy design are becoming more interdependent Hence the demands for close interactions between the policy community and the research community have been rising significantly This book assesses how recent economic thinking has advanced under these influences Furthermore it evaluates the important contribution economics can add to the design and evaluation of public policy now more than ever before The study is of interest to policy makers policy analysts researchers and students of economics at all levels The authors which include many of Germany s most eminent economists draw on their wide experience in research and consultancy to present a coherent view of where European economic theory stands today and how it can play a role in the management of the economy of the new millennium **Is There Money on the Table? Evidence on the Magnitude of Profit Shifting in the Extractive Industries** Sebastian Beer,Dan Devlin,2021-01-15 Profit shifting remains a key concern in international tax system debate but discussions are largely based on aggregate estimates with less attention paid to individual sectors Drawing on a novel dataset we quantify tax avoidance risks in the extractive industries a sector which is revenue critical for many developing economies We find that a one percentage point increase in the domestic corporate tax

rate has historically reduced sectoral profits by slightly over 3 percent and the response tends to be more pronounced among mining than among hydrocarbon firms There is only weak evidence transfer pricing rules contain tax minimization efforts of MNEs in our sample but interest limitation rules e g thin capitalization or earnings based rules do reduce the observable extent of profit shifting Our findings highlight the challenge of taxing income in the natural resource sector and suggest how fiscal regime design might be strengthened

Economics without Borders Laszlo Matyas,Richard Blundell,Estelle Cantillon,Barbara Chizzolini,Marc Ivaldi,Wolfgang Leininger,Ramon Marimon,Frode Steen,2017-04-27 If treated as a single economy the European Union is the largest in the world with an estimated GDP of over 14 trillion euros Despite its size European economic policy has often lagged behind the rest of the world in its ability to generate growth and innovation Much of the European economic research itself often trails behind that of the USA which sets much of the agenda in mainstream economics This book also available as open access bridges the gap between economic research and policymaking by presenting overviews of twelve key areas for future economic policy and research Written for the economists and policymakers working within European institutions it uses comprehensive surveys by Europe s leading scholars in economics and European policy to demonstrate how economic research can contribute to good policy decisions and vice versa demonstrating how economics research can be motivated and made relevant by hot policy questions This title is available as Open Access on Cambridge Core
