Microbial Technology for Sustainable Environment Pankaj Bhatt, Saurabh Gangola, Dhanushka Udayanga, Govind Kumar, 2021-09-29 Microorganisms are ubiquitous on earth. These microorganisms are able to perform various functions in the environment. Microbial applications are used as biofertilizers, bioremediation, biofortification, and other sustainable approaches of environmental development. Indigenous microbial cultures have the potential to perform various functions that are beneficial to achieve the sustainable goals. To date, different strains have been commercialized for the industrial and common applications for the sustainable environment. This book will cover different aspects of microbial technology for sustainable development.

Microbes and Microbial Technology Iqbal Ahmad, Farah Ahmad, John Pichtel, 2011-02-01 This book focuses on successful application of microbial biotechnology in areas such as medicine, agriculture, environment, and human health.

Microbial Technology for Health and Environment, 2020 Rampant industrialization has caused high levels of contamination by various toxic chemicals in our water bodies, which is a matter of concern in terms of ecosystems as well as human and animal health. Polluted wastewater can contaminate drinking water and is also a causal factor for bio-magnification of heavy metals into our food cycle. In the last decade, several methodologies have been adopted to clean the wastewaters, and among these, microbial remediation has emerged as an effective technology. Several variants of microbial technologies have been developed for wastewater treatment and biodegradation specific to the industry type, waste, and toxicity of the chemicals. This book describes the recent advances in microbial degradation and microbial remediation of various xenobiotic compounds in soil and wastewater. It also explains various modern microbial technologies for biodegradation and wastewater treatment. It covers various microbial technologies for wastewater treatment, biodegradation, bioremediation, and solid waste management. Gathering contributions from leading international experts, it focuses on the status quo in industrial wastewater treatment and its biodegradation. The book is intended for researchers in the field of industrial wastewater, students of environmental sciences, and practitioners in water pollution abatement.

Green Technology for Bioremediation of Environmental Pollution Jatindra Nath Bhakta, Susmita Lahiri, B. B. Jana, 2018 In order to combat the severe environmental problems, a comprehensive treatise on bioremediation dealing with updated relevant novel green technologies is thus in great demand for application in a practical field. Keeping this in mind, the idea of the present book has been conceived by the editors. This issue focuses particularly on the recently developed environmental friendly novel green technology that detoxifies and decontaminates the pollutants in different domains of the environment using the potential biological agents. The book covers the following topics: A modern applied concept of the green bioremediation process, genomics, metagenomics, and proteomics in green bioremediation, advanced biochemical and molecular approaches of pollutant detoxification, ecological engineering in bioremediation, microbial remediation, bioleaching,

various phytoremediation approaches novel remediation technologies of various hazardous pollutants etc The salient features of this book include i Peer revision of each chapter by expert scientists ii the basic applied concepts of bioremediation iii in depth updated concepts and research findings iv relevant graphical and pictorial illustrations for understanding the text v bioremediation of several emerging and hazardous pollutants and vi a vivid description of bioremediation characteristics of various biological agents
