Remenyi, 1998-09-14 Doing Research in Business and Management has been written to help students obtain a thorough understanding of the main methodological issues and options that are available to them as business and management researchers undertaking a masters or doctoral degree Doing Research in Business and Management takes the reader through all of the important issues that need to be understood if a competent piece of research is to be produced at the masters or doctoral level in the business and management studies The authors explain the interrelationship between the theoretical and empirical research as well as the differences between positivism and phenomenology Not only do they put these concepts in context for the business and management student but they go on to discuss how these different approaches are used in practice Furthermore the authors discuss the implications of quantitative and qualitative approaches to research The book offers high level advice on different numerical techniques available to researchers as well as different software packages that may be used for analyzing qualitative data The book also discusses the use of the Internet to support research in masters and doctoral programs The Irwin Business and Investment Almanac ,1987 InfoWorld ,1981-06-22 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects **Encyclopedia of Production and Manufacturing Management** Paul M. Swamidass, 2006-09-21 The Encyclopedia of Production and Manufacturing Management is an encyclopedia that has been developed to serve this field as the fundamental reference work Over the past twenty years the field of production and operations management has grown more rapidly than ever and consequently its boundaries have been stretched in all directions For example in the last two decades production and manufacturing management absorbed in rapid succession several new production management concepts manufacturing strategy focused factory just in time manufacturing concurrent engineering total quality management supply chain management flexible manufacturing systems lean production and mass customization to name a few This explosive growth makes the need for this volume abundantly clear The manufacturing

industry thinks and acts more broadly than it did several decades ago The most notable change has been the need for manufacturing managers to think in technological strategic and competitive terms This is a very favorable development and it leads to manufacturing success The entries in this encyclopedia include the most recent technical and strategic innovations in production and manufacturing management The encyclopedia consists of articles of varying lengths The longer articles on important concepts and practices range from five to fifteen pages There are about 100 such articles written by nearly 100 authors from around the world In addition there are over 1000 shorter entries on concepts practices and principles The range of topics and depth of coverage is intended to suit both student and professional audiences The shorter entries provide digests of unfamiliar and complicated subjects Difficult subjects are made intelligible to the reader without oversimplification The strategic and technological perspectives on various topics give this Encyclopedia its distinctiveness and uniqueness The world of manufacturing today is increasingly competitive It is apparent that manufacturers must respond to these competitive pressures with technical and strategic innovation This encyclopedia has been developed to help researchers students and those in the manufacturing industry to understand and implement these ongoing changes in the field
