Sciences University of Belgrade has been the host of SymOrg an event that promotes scientific disciplines of organizing and managing a business. Traditionally the Symposium has been an opportunity for its participants to share and exchange both academic and practical knowledge and experience in a pleasant and creative atmosphere. This time however due the challenging situation regarding the COVID 19 pandemic we have decided that all the essential activities planned for the International Symposium SymOrg 2020 should be carried out online between the 7th and the 9th of September 2020. We are very pleased that the topic of SymOrg 2020 Business and Artificial Intelligence attracted researchers from different institutions both in Serbia and abroad. Why is artificial intelligence a disruptive technology? Simply because it significantly alters the way consumers, industries or businesses operate. According to the European Commission document titled Artificial Intelligence for Europe 2018 AI is a key disruptive technology that has just begun to reshape the world. The Government of the Republic of Serbia has also recognized the importance of AI for the further development of its economy and society and has prepared an AI Development Strategy for the period between 2020 and 2025. The first step has already been made: the Science Fund of the Republic of Serbia after a public call has selected and financed twelve AI projects. This year more than 200 scholars and practitioners authored and co-authored the 94 scientific and research papers that had been accepted for publication in the Proceedings. All the contributions to the Proceedings are classified into the following 11 sections: Information Systems and Technologies in the Era of Digital Transformation, Smart Business Models and Processes, Entrepreneurship, Innovation and Sustainable Development, Smart Environment for Marketing and Communications, Digital Human Resource Management, Smart E-Business, Quality 4.0 and International Standards, Application of Artificial Intelligence in Project Management, Digital and Lean Operations Management, Transformation of Financial Services, Methods and Applications of Data Science in Business and Society. We are very grateful to our distinguished keynote speakers: Prof. Moshe Vardi, Rice University, USA; Prof. Blaž Zupan, University of Ljubljana, Slovenia; Prof. Vladan Devedžić, University of Belgrade, Serbia; Milica Urić, Jović, PhD, Director, Science Fund of the Republic of Serbia; and Harri Ketamo, PhD, Founder, Chairman of HeadAI Ltd, Finland. Also special thanks to Prof. Dragan Vukmirović, University of Belgrade, Serbia; and Prof. Zoran Evarac, University of Belgrade, Serbia, for organizing workshops in fields of Data Science and Machine Learning; and to Prof. Rade Matić, Belgrade Business and Arts Academy of Applied Studies; and Milan Dobrota, PhD, CEO at Agremo, Serbia, for their valuable contribution in presenting Serbian experiences in the field of AI. The Faculty of Organizational Sciences would like to express its gratitude to the Ministry of Education, Science and Technological Development and all the individuals who have supported and contributed to the organization of the Symposium. We are particularly grateful to the contributors and reviewers who made this issue possible. But above all, we are especially thankful to the authors and presenters for making the SymOrg 2020 a success.

Auer, Reinhard Langmann, 2018-07-24 The REV conference aims to discuss the fundamentals applications and experiences in remote engineering virtual instrumentation and related new technologies as well as new concepts for education on these topics including emerging technologies in learning MOOCs MOOLs Open Resources and STEM pre university education In the last 10 years remote solutions based on Internet technology have been increasingly deployed in numerous areas of research science industry medicine and education With the new focus on cyber physical systems Industry 4.0 Internet of Things and the digital transformation in industry economy and education the core topics of the REV conference have become indispensable elements of a future digitized society REV 2018 which was held at the University of Applied Sciences in Duesseldorf from 21-23 March 2018 addressed these topics as well as state of the art and future trends Harnessing VLSI System Design with EDA Tools Rajanish K. Kamat, Santosh A. Shinde, Pawan K. Gaikwad, Hansraj Guhilot, 2011-10-03 With the proliferation of VHDL the reference material also grew in the same order Today there is good amount of scholarly literature including many books describing various aspects of VHDL However an indepth review of these books reveals a different story Many of them have emerged simply as an improved version of the manual While some of them deal with the system design issues they lack appropriate exemplifying to illustrate the concepts Others give large number of examples but lack the VLSI system design issues In nutshell the fact which gone unnoticed by most of the books is the growth of the VLSI is not merely due to the language itself but more due to the development of large number of third party tools useful from the FPGA or semicustom ASIC realization point of view In the proposed book the authors have synergized the VHDL programming with appropriate EDA tools so as to present a full proof system design to the readers In this book along with the VHDL coding issues the simulation and synthesis with the various toolsets enables the potential reader to visualize the final design The VHDL design codes have been synthesized using different third party tools such as Xilinx Web pack Ver 11 Modelsim PE Leonrado Spectrum and Synplify Pro Mixed flow illustrated by using the above mentioned tools presents an insight to

optimize the design with reference to the spatial temporal and power metrics
