Methods in Protein Sequence Analysis Jörnvall, Höög, 2013-11-21 Methods in protein sequence analysis constitute important fields in rapid progress We have experienced a continuous increase in analytical sensitivity coupled with decreases in time necessary for purification and analysis Several generations of sequencers liquid solid gas phase have passed by and returned in other shapes during just over two decades Similarly the introduction of HPLC permitted an enormous leap forward in this as in other fields of biochemistry and we now start to see new major advances in purification analysis through capillary electrophoresis Furthermore progress in the field of mass spectrometry has matched that in chemical analysis and we witness continuous development now emphasizing ion spray and other mass spectrometric approaches In short protein analysis has progressed in line with other developments in modern science and constitutes an indispensable integral part of present day molecular biology Even the available molecular tools in the form of proteases with different specificities have increased in number although we still have far to go to reach an array of restriction proteases like the sets of nucleases available to the molecular geneticist Of course conferences have been devoted to protein sequence analysis in particular the MPSA Methods in Protein Sequence Analysis series of which the 8th conference took place in Kiruna Sweden July 1-6 1990 Again we witnessed much progress saw new instruments and experienced further interpretational insights into protein mechanisms and functions

The Emerald Mile Kevin Fedarko, 2013-05-07 From one of Outside magazine's Literary All Stars comes the thrilling true tale of the fastest boat ride ever through the Grand Canyon atop the legendary Colorado River flood of 1983 In the spring of 1983 massive flooding along the length of the Colorado River confronted a team of engineers at the Glen Canyon Dam with an unprecedented emergency that may have resulted in the most catastrophic dam failure in history In the midst of this crisis the decision to launch a small wooden dory named The Emerald Mile at the head of the Grand Canyon just fifteen miles downstream from the Glen Canyon Dam seemed not just odd but downright suicidal The Emerald Mile at one time slated to be destroyed was rescued and brought back to life by Kenton Gruba the man at the oars who intended to use this flood as a kind of hydraulic sling shot The goal was to nail the all time record for the fastest boat ever propelled by oar by motor or by

the grace of God himself through the heart of the Grand Canyon atop the Colorado River from Lee's Ferry to Lake Mead Did he survive Just barely Now this remarkable epic feat unfolds here in The Emerald Mile
