Microlevel School Finance Issues And Implications For Policy:

K-12 Education Finance Anthony Rolle, 2024-02-02 Education finance researchers tend to organize their thoughts on important issues by considering one of the four foundational perspectives equity efficiency liberty and adequacy The six essays presented in this special edition of the Peabody Journal of Education base their work within the context of the four pillars and present new directions for future research While some of the articles isolate a concept for closer scrutiny others draw attention to more interactive aspects of the pillars in question Each article leaves the reader with important information and insightful questions about both the usage and efficacy of education finance policies *American Public School Finance* William A. Owings, Leslie S. Kaplan, 2019-08-09 Designed for aspiring school leaders this text presents the realities of school finance policy and issues as well as the tools for formulating and managing school budgets In an era of dwindling fiscal support for public schools increasing federal mandates and additional local budget requirements educational leaders must be able to articulate sound finance theory and application The authors move beyond coverage found in other texts by providing critical analysis and unique chapters on misconceptions about school finance fiscal capacity fiscal effort adequacy and efficiency demographic issues and spending and student achievement Examining local state and federal education spending this text gives readers the foundation to understand school finance and knowledgeably educate colleagues parents and other stakeholders about its big picture issues facts and trends The new edition of American Public School Finance will help educational leaders at all stages of their careers become informed advocates for education finance practice and reform New in this edition Expanded coverage on school choice Discussion of new standards and law Updated exploration of student demographics and its impact on learning Advanced pedagogical features such as connections to the latest Professional Standards for Educational Leaders PSEL Focus Questions Case Studies and Chapter Questions Assignments Complementary electronic resources designed to deepen and extend the topics in each chapter and to provide instructors with lecture slides and other teaching strategies Micro-level School Finance David H. Monk, Julie Underwood, 1988 *Developments in School Finance*, 1996 **Elementary and Secondary Education** United States. General Accounting Office, 1998

Elementary and secondary education flexibility initiatives do not address districts' key concerns about federal requirements : report to congressional requesters , *Money, Politics, and Law* Karen DeMoss, Kenneth K. Coordination Among Schools, Families, and Communities James G. Cibulka, William J. Kritek, 1996-04-19 Improving the connection among schools families and communities has emerged as a recent focus of the education reform movement posing many challenges for educators social service professionals community activists and parents This book provides information on the diverse goals of the coordinated services movement and the problems of reconciling competing goals within the movement The political environment surrounding coordinated services reforms is discussed including efforts to

scale back the scope of the welfare state Different models of coordination are presented such as Kentucky's Family Resource Centers the Nation of Tomorrow project in Chicago a community school coalition in Philadelphia community youth organizations and programs for the homeless as well as organizational and management issues surrounding coordination drawn from programs throughout the United States and Canada *Public Management* Laurence J. O'Toole, Jr, Kenneth J. Meier, 2011-04-14 How effective are public managers as they seek to influence how public organizations deliver policy results How and how much is management related to the performance of public programs What aspects of management can be distinguished Can their separable contributions to performance be estimated The fate of public policies in today's world lies in the hands of public organizations which in turn are often intertwined with others in latticed patterns of governance Collectively these organizations are expected to generate performance in terms of policy outputs and outcomes In this book two award winning researchers investigate the effectiveness of management in the public sector Firstly they develop a systematic theory on how effective public managers are in shaping policy results The rest of the book then tests this theory against a wide range of evidence including a data set of 1 000 public organizations *Inequalities in Public School District Revenues* Thomas Parrish, 1998 **International Encyclopedia of the Sociology of Education** Lawrence J. Saha, 1997 This book provides a state of the art resource for an international audience of the cumulative results of research and to identify the substantive developments which will take the sociological study of education into the next century This encyclopedia presents the full range of paradigms theoretical points of view together with many research methodologies Cover **The Money Myth** W. Norton Grubb, 2009-01-15 Can money buy high quality education Studies find only a weak relationship between public school funding and educational outcomes In *The Money Myth* W Norton Grubb proposes a powerful paradigm shift in the way we think about why some schools thrive and others fail The greatest inequalities in America's schools lie in factors other than fiscal support Fundamental differences in resources other than money for example in leadership instruction and tracking policies explain the deepening divide in the success of our nation's schoolchildren *The Money Myth* establishes several principles for a bold new approach to education reform Drawing on a national longitudinal dataset collected over twelve years Grubb makes a crucial distinction between simple resources and those compound complex and abstract resources that cannot be readily bought Money can buy simple resources such as higher teacher salaries and smaller class sizes but these resources are actually some of the weakest predictors of educational outcomes On the other hand complex resources pertaining to school practices are astonishingly strong predictors of success Grubb finds that tracking policies have the most profound and consistent impact on student outcomes over time Schools often relegate low performing students particularly minorities to vocational remedial and special education tracks So even in well funded schools resources may never reach the students who need them most Grubb also finds that innovation in the classroom has a critical impact on student success Here too America's schools are stratified Teachers in underperforming schools tend to

devote significant amounts of time to administration and discipline while instructors in highly ranked schools dedicate the bulk of their time to engaged learning using varied pedagogical approaches Effective schools distribute leadership among many instructors and administrators and they foster a sense of both trust and accountability These schools have a clear mission and coherent agenda for reaching goals Underperforming schools by contrast implement a variety of fragmented reforms and practices without developing a unified plan This phenomenon is perhaps most powerfully visible in the negative repercussions of No Child Left Behind In a frantic attempt to meet federal standards and raise test scores quickly more and more schools are turning to scripted off the shelf curricula These practices discourage student engagement suppress teacher creativity and hold little promise of improving learning beyond the most basic skills Grubb shows that infusions of money alone won't eradicate inequality in America's schools We need to address the vast differences in the way school communities operate By looking beyond school finance The Money Myth gets to the core reasons why education in America is so unequal and provides clear recommendations for addressing this chronic national problem

Social Purpose and Schooling Jerry Paquette, 2017-05-08 First published in 1991 this work critically analyses the competing claims about alternative arrangements for schooling It does so in light of major popularly understood agendas for social and political purpose and of the troubled and much less clearly understood assumptions and issues behind them The book examines closely four generic types of arrangements for schooling in light of a comprehensive framework for understanding the publicness or privateness of schools and the relationships between social and educational purpose The book poses key questions about the meaning and purpose of schooling in the rapidly evolving social demographic and technological realities of the time It also probes fundamental assumptions values and beliefs behind educational and public policy making In doing so it offers a way to make sense of unorthodox arrangements for the provision and funding of schools

State and Local Finances Under Pressure David L. Sjoquist, 2003-01-01 State and Local Finances under Pressure explores the future of state and local government fiscal systems given the numerous pressures they face from economic legal technological demographic and political forces It explores how these multiple forces play out in terms of the changes state and local governments should and are likely to make The contributors argue that state and local governments must make substantial changes and that failure to act is likely to result in adverse effects and increasing pressures for modifications that are more difficult to implement and more politically unpalatable Without reform state and local fiscal systems will grow increasingly out of sync with economic reality The authors suggest that government responses are likely to be evolutionary but that in 25 years the recorded changes will be substantial The first chapter provides a historic perspective of state and local fiscal trends Each of the subsequent chapters describes the nature of one of the pressures state and local governments face including political and legal forces globalization of business demographic and technological changes deregulation of utilities and urban sprawl Policymakers economists political scientists fiscal policy analysts and public administrators will find this comprehensive book of interest

Handbook of the Sociology of Education Maureen T. Hallinan, 2006-11-24 The aim of the Handbook of Sociology of Education is to present the most theoretically grounded and empirically rigorous sociological analyses of schools to date The authors are distinguished researchers in the field Their contributions to the Handbook offer major theoretical perspectives on the schooling process and describe significant empirical studies of schools and their effects on individuals and society The research presented in the Handbook is built on three fundamental tenets of sociology First the authors adopt the perspective that schools are a central institution in society An understanding of the function of schooling in social life is enhanced by viewing schools as interrelated with other societal institutions The study of how the context of schooling influences education processes is critical to an understanding of school outcomes Rather than being determined solely by ascribed and achieved characteristics an individual's cognitive and social development are influenced heavily by the structures and networks in which the individual is embedded Communities families schools and social groups are critical elements in the educative process By viewing the school as a societal institution and highlighting the interaction between context and individual behavior the Handbook chapters provide a broader and deeper understanding of the determinants of learning in contemporary society The second sociological insight that guides the research in the Handbook is that the school is a social system

Understanding School System Administration Kenneth A. Leithwood, Donald F. Musella, 1991 Examines the work of Chief Education Officers what they do why they do it and some of the consequences of their work The research is based on Canadian schools but it is hoped that some of the material may be extrapolated and applied to schools in other countries
