Micronesia: the breadfruit revolution, by R. Wenkem with text by B. Baker Robert Wenkam,Byron B. Baker,

Traditional Micronesian Societies Glenn Petersen,2009-06-30 *Traditional Micronesian Societies* explores the extraordinary successes of the ancient voyaging peoples who first settled the Central Pacific islands some two thousand years ago They and their descendants devised social and cultural adaptations that have enabled them to survive and thrive under the most demanding environmental conditions The dispersed matrilineal clans so typical of Micronesian societies ensure that every individual every local family and lineage and every community maintain close relations with the peoples of many other islands When hurricanes and droughts or political struggles force a group to move they are sure of being taken in by kin residing elsewhere Out of this common theme shared patterns of land tenure political rule philosophy and even personal character have flowed To describe and explain Micronesian societies the author begins with an overview of the region including a brief consideration of the scholarly debate about whether Micronesia actually exists as a genuine and meaningful region This is followed by an account of how Micronesia was originally settled how its peoples adapted to conditions there and how several basic adaptations diffused throughout the islands He then considers the fundamental matters of descent ideas about how individuals and groups are bound together through ties of kinship and descent groups and the closely interlinked subjects of households families land and labor Because women form the core of the clans their roles are particularly respected and their contributions to social life honored Socio political life art religion and values are discussed in detail Finally the author examines a number of exceptions to these common Micronesian patterns of social life *Traditional Micronesian Societies* illustrates the idiosyncrasies of individual Micronesian communities and celebrates the Micronesians shared ability to adapt survive and thrive over millennia At a time when global climate change has seized our imaginations the Micronesians historical ability to cope with their watery environment is of the greatest relevance **The Vortex** Frank Uekötter,2024-04-18 Environmental challenges are defining the twenty first century To fully understand ongoing debates about our current crises climate change loss of biological diversity pollution extinction resource woes means revisiting their origins in all their complexity With this ambitious highly original contribution to the environmental history of global modernity Frank Uek tter considers the many ways humans have had an impact on their physical environment throughout history Ours is not a one way trajectory to sudden collapse he argues but rather death by a thousand cuts The many paths we ve forged to arrive in our current predicament from agriculture to industry to infrastructure must be considered collectively if we are to stay afloat in what Uek tter describes as a vortex a powerful metaphor for the flow of history capturing the momentum and the many crosscurrents that swept people and environments along His book invites us to look at environmental challenges from multiple perspectives including all the twists and turns that have helped to create the mess

we find ourselves in Uek tter has written a world history for an age where things are falling apart where we know what lies ahead and are equipped with the right tools technological and otherwise and plenty of experience to deal with environmental challenges but somehow fail to get our affairs in order *Ethnobotany of Pohnpei* Michael J. Balick,2009-02-26 Ethnobotany of Pohnpei examines the relationship between plants people and traditional culture on Pohnpei one of the four island members of the Federated States of Micronesia Traditional culture is still very strong on Pohnpei and is biodiversity dependent relying on both its pristine habitats and managed landscapes native and introduced plants and animals and extraordinary marine life This book is the result of a decade of research by a team of local people and international specialists carried out under the direction of the Mwoalen Wahu Ileilehn Pohnpei Pohnpei Council of Traditional Leaders It discusses the uses of the native and introduced plant species that have sustained human life on the island and its outlying atolls for generations including Piper methysticum locally known as sakau and recognized throughout the Pacific as kava which is essential in defining cultural identity for Pohnpeians The work also focuses on ethnomedicine the traditional medical system used to address health conditions and its associated beliefs Pohnpei and indeed the Micronesian region is one of the world s great centers of botanical endemism it is home to many plant species found nowhere else on earth The ultimate goal of this volume is to give readers a sense of the traditional ethnobotanical knowledge that still exists in the area to make them aware of its vulnerability to modernization and to encourage local people to respect this ancient knowledge and keep such practices alive It presents the findings of the most comprehensive ethnobotanical study undertaken to date in this part of Micronesia and sets a new standard for transdisciplinary research and collaboration **The Global Prehistory of Human Migration** Immanuel Ness,2014-11-10 Previously published as the first volume of The Encyclopedia of Global Human Migration this work is devoted exclusively to prehistoric migration covering all periods and places from the first hominin migrations out of Africa through the end of prehistory Presents interdisciplinary coverage of this topic including scholarship from the fields of archaeology anthropology genetics biology linguistics and more Includes contributions from a diverse international team of authors representing 17 countries and a variety of disciplines Divided into two sections covering the Pleistocene and Holocene each section examines human migration through chapters that focus on different regional and disciplinary lenses **Schooling in East Asia** R. Murray Thomas,T. Neville Postlethwaite,2016-06-06 Schooling in East Asia Forces of Change focuses on the condition and backgrounds of formal and non formal education in several East Asian countries as well as the identification of the factors that have inspired the educational systems that these countries have taken up The book takes into consideration the backgrounds of the educational system in Japan and China noting the different social structures that were prevalent there The text explains how leaders of every social structure have a great influence on the form of education of their people Relatively the development of the educational system in Taiwan Hong Kong Macau North Korea and South Korea is discussed Educational policies purpose of education educational administration and

curriculum development are also considered The text also gives emphasis on the forces that influenced the change in the educational system in these countries including the educational attainment of teachers teaching materials curricula and teaching methodology A comparative appraisal of the educational system of these countries is also presented The book is an important reference for scholars who are involved in promoting education particularly curriculum development and implementation of schemes aimed at improving education

Archaeology of Pacific Oceania Mike T. Carson,2023-10-11 Archaeology of Pacific Oceania now in its second edition offers a state of the art and fully detailed chronological narrative of how Pacific Oceania came to be inhabited over a long time scale posing fundamental questions both for Pacific Oceania and for global archaeology The Pacific Ocean covers 165 million sq km nearly one third of the world s total surface area yet its thousands of islands and their diverse cultural histories are scarcely known to the other two thirds of the world This book asks how and why did this vast sea of islands come to be inhabited over the last several millennia transcending significant change in ecology demography and society What were the roles of overseas contacts in the development of social networks economic trade and population dynamics What can any or all of the thousands of islands offer as ideal model systems for comprehending globally significant issues of human environment relations and coping with changing circumstances of natural and cultural history What do the

island archaeology records reveal about coastal setting as part of the larger human experience How does Pacific Oceanic archaeology relate with a larger Asia Pacific context or with the scope of world archaeology The new second edition of Archaeology of Pacific Oceania addresses these questions and more providing an updated synthesis of this important region Archaeology of Pacific Oceania is for scholars of Asia Pacific archaeology and anthropology and will support students investigating the archaeology of Pacific Oceania **Polynesians in America** Terry L. Jones,Alice A. Storey,Elizabeth A. Matisoo-Smith,José Miguel Ramírez-Aliaga,2011-01-16 This volume presents a synthesis of over a century of academic research on the question of prehistoric trans oceanic contacts between Polynesia and the New World Leading experts in archaeology botany linguistics and physical anthropology discuss the latest ground breaking evidence that supports pre Columbian Polynesian landfalls in both North and South America **Military Construction Appropriations for 1977** United States.
