from the authors what you can expect from each section

### Section I ABC of Accounting

This part is about the fundamentals of finance and accounting I started studying finance and accounting in school in grade 11 in 1998 and it took me a few years to understand it in the right context I have jotted down the basics of accounting here in a dead simple way Why your business is different from you Why are most people confused with debit and credit How golden rules of accounting are taught in schools and universities How does the accounting process work behind the scenes Best practices for designing the chart of accounts IFRS and International Accounting Standards I highly recommend reading this part in detail if you have not read finance accounting during your school university time This part is the building block of this book

### Section II Microsoft D365 ERP

It is a bonus section As you know I am a fan of Warren Buffett and cannot miss financial statements and ratios when we talk about finance and accounting This part deals with Profit Loss Balance Sheet Cash Flow etc and recommends which section and ratio are most important while you want to do a quick health check of a company I recommend this for everyone even if you don t want to know about debit credit or D365 accounting It will make you a little more intelligent in reading the financials of an organization

Note This book is the first in the series of two books There will be some advanced topics in the next book e g revenue recognition project accounting lease accounting landed costing and manufacturing etc
