TechRepublic (Firm),2003      Securing Citrix XenApp Server in the Enterprise Tariq Azad,2008-08-08 Citrix Presentation  
Server allows remote users to work off a network server as if they weren't remote. That means incredibly fast access to data  
and applications for users, no third party VPN connection and no latency issues. All of these features make Citrix Presentation  
Server a great tool for increasing access and productivity for remote users. Unfortunately, these same features make Citrix  
just as dangerous to the network it's running on. By definition, Citrix is granting remote users direct access to corporate  
servers; achieving this type of access is also the holy grail for malicious hackers. To compromise a server running Citrix  
Presentation Server, a hacker need not penetrate a heavily defended corporate or government server. They can simply  
compromise the far more vulnerable laptop, remote office or home office of any computer connected to that server by Citrix  
Presentation Server. All of this makes Citrix Presentation Server a high value target for malicious hackers. And although it is a  
high value target, Citrix Presentation Servers and remote workstations are often relatively easily hacked because they are  
often times deployed by overworked system administrators who haven't even configured the most basic security features  
offered by Citrix. The problem, in other words, isn't a lack of options for securing Citrix instances; the problem is that  
administrators aren't using them. eWeek, October 2007. In support of this assertion, security researcher Petko D. Petkov aka  
pdp said in an Oct 4 posting that his recent testing of Citrix gateways led him to tons of wide open Citrix instances, including  
10 on government domains and four on military domains. The most comprehensive book published for system administrators  
providing step by step instructions for a secure Citrix Presentation Server. Special chapter by security researcher Petko D.  
Petkov aka pdp detailing tactics used by malicious hackers to compromise Citrix Presentation Servers. Companion Web site  
contains custom Citrix scripts for administrators to install, configure and troubleshoot Citrix Presentation Server.
