

VTC Training CDs use a simple method to transfer knowledge - narrated QuickTime<sup>®</sup> movies that take a user through the steps of learning complex software applications. Each VTC CD contains many hours of these movies, created by skilled trainers who are experts in their field, and presented using an interface that allows for easy access. While the movie is playing, a student can fast forward, rewind or jump to any point in that movie. Features of the player allow the user to search for movie topics or keywords. Other applications can be in use simultaneously - any tutorial can be called up as required for specific help with an unfamiliar task.

Microsoft PowerPoint 2003 provides a complete set of tools for creating powerful presentations. Organize and format your material easily. Illustrate your points with your own images, or clip art, and even broadcast presentations over the Web. Virtual Training Company author Curtis Simmons shows users how to get the most out of this application. In this tutorial, he explains the basics of PowerPoint, how to create and modify presentations, clip art and drawing tools, printing and packaging, and more.
