These societal gains however have also helped fuel a surge in narcissistic and misguided intellectual egalitarianism that has crippled informed debates on any number of issues Today everyone knows everything with only a quick trip through WebMD or Wikipedia average citizens believe themselves to be on an equal intellectual footing with doctors and diplomats All voices even the most ridiculous demand to be taken with equal seriousness and any claim to the contrary is dismissed as undemocratic elitism Tom Nichols *The Death of Expertise* shows how this rejection of experts has occurred the openness of the internet the emergence of a customer satisfaction model in higher education and the transformation of the news industry into a 24 hour entertainment machine among other reasons Paradoxically the increasingly democratic dissemination of information rather than producing an educated public has instead created an army of ill informed and angry citizens who denounce intellectual achievement When ordinary citizens believe that no one knows more than anyone else democratic institutions themselves are in danger of falling either to populism or to technocracy or in the worst case a combination of both An update to the 2017 breakout hit the paperback edition of *The Death of Expertise* provides a new foreword to cover the alarming exacerbation of these trends in the aftermath of Donald Trump s election Judging from events on the ground since it first published *The Death of Expertise* issues a warning about the stability and survival of modern democracy in the Information Age that is even more important today
