**The Earliest Occupation of Europe** European Science Foundation. Workshop, 1995 This collection of papers arises from a meeting of distinguished scholars at Tautavel in 1993 sponsored by the European Science Fund The aim of the meeting was to discuss and review the evidence for the earliest occupation of different European regions from Scandinavia to the Mediterranean and from the United Kingdom to the Russian Plains and including neighbouring areas such as the Caucasus and Northern Africa Discussion focused on four themes chronology environment industries and subsistence The central dispute between

proponents of the Long chronology placing the first hominids in Europe almost 2m years ago and the supporters of a Short chronology no hominids until 500 000 years ago is covered in detail The disputed 1 5m years are crucial to our understanding of how our earliest ancestors adapted to the European environment and this book will be crucial in furthering the debate Hollywood Highbrow Shyon Baumann,2018-06-05 Today s moviegoers and critics generally consider some Hollywood products even some blockbusters to be legitimate works of art But during the first half century of motion pictures very few Americans would have thought to call an American movie art Up through the 1950s American movies were regarded as a form of popular even lower class entertainment By the 1960s and 1970s however viewers were regularly judging Hollywood films by artistic criteria previously applied only to high art forms In Hollywood Highbrow Shyon Baumann for the first time tells how social and cultural forces radically changed the public s perceptions of American movies just as those forces were radically changing the movies themselves The development in the United States of an appreciation of film as an art was Baumann shows the product of large changes in Hollywood and American society as a whole With the postwar rise of television American movie audiences shrank dramatically and Hollywood responded by appealing to richer and more educated viewers Around the same time European ideas about the director as artist an easing of censorship and the development of art house cinemas film festivals and the academic field of film studies encouraged the idea that some American movies and not just European ones deserved to be considered art Effects of Trawling and Dredging on Seafloor Habitat National Research Council,Division on Earth and Life Studies,Ocean Studies Board,Committee on Ecosystem Effects of Fishing: Phase 1â–"Effects of Bottom Trawling on Seafloor Habitats,2002-07-09 Concerns over the potential ecological effects of fishing have increased with the expansion of fisheries throughout the marine waters of the United States Effects of Trawling and Dredging on Seafloor Habitat describes how assessment of fishing impacts depends on gear type number and location of bottom tows and the physical and biological characteristics of seafloor habitats Many experimental studies have documented acute gear specific effects of trawling and dredging on various types of habitat These studies indicate that low mobility long lived species are more vulnerable to towed fishing gear than short lived species in areas where the seabed is often disturbed by natural phenomena Trawling and dredging may also change the composition and productivity of fish communities dependent on seafloor habitats for food and refuge The scale of these impacts depends on the level of fishing effort This volume presents color maps of fishing effort for all regions with significant bottom trawl or dredge fisheries the first time that such data has been assembled and analyzed for the entire nation *Narrative of the Expedition of an American Squadron to the China Seas and Japan, Performed in the Years 1852, 1853, and 1854* Jones,1856
