Lock,2000 This set of papers by European and North American archaeologists explore the interface between new spatial technologies and areas of theoretical concern in spatial archaeology Differing aspects of landscape such as vision perception and movement are explored through a series of case studies that focus on how spatial technologies can influence archaeological interpretation and to what extent these new technologies can be manipulated to take us beyond 2 dimensional maps Individual site based analyses and new applications of predictive modelling are also presented and assessed together with the wider questions of spatial technologies within heritage management **High Performance Computing for Geospatial Applications** Wenwu Tang,Shaowen Wang,2020-07-20 This volume fills a research gap between the rapid development of High Performance Computing HPC approaches and their geospatial applications With a focus on geospatial applications the book discusses in detail how researchers apply HPC to tackle their geospatial problems Based on this focus the book identifies the opportunities and challenges revolving around geospatial applications of HPC Readers are introduced to the fundamentals of HPC and will learn how HPC methods are applied in various specific areas of geospatial study The book begins by discussing theoretical aspects and methodological

uses of HPC within a geospatial context including parallel algorithms geospatial data handling spatial analysis and modeling and cartography and geovisualization Then specific domain applications of HPC are addressed in the contexts of earth science land use and land cover change urban studies transportation studies and social science The book will be of interest to scientists and engineers who are interested in applying cutting edge HPC technologies in their respective fields as well as students and faculty engaged in geography environmental science social science and computer science High-Speed Photonics Interconnects Lukas Chrostowski, Krzysztof Iniewski, 2017-12-19 Dramatic increases in processing power have rapidly scaled on chip aggregate bandwidths into the Tb s range This necessitates a corresponding increase in the amount of data communicated between chips so as not to limit overall system performance To meet the increasing demand for interchip communication bandwidth researchers are investigating the use of high speed optical interconnect architectures Unlike their electrical counterparts optical interconnects offer high bandwidth and negligible frequency dependent loss making possible per channel data rates of more than 10 Gb s High Speed Photonics Interconnects explores some of the groundbreaking technologies and applications that are based on photonics interconnects From the Evolution of High Speed I O Circuits to the Latest in Photonics Interconnects Packaging and Lasers Featuring contributions by experts from academia and industry the book brings together in one volume cutting edge research on various aspects of high speed photonics interconnects Contributors delve into a wide range of technologies from the evolution of high speed input output I O circuits to recent trends in photonics interconnects packaging The book discusses the challenges associated with scaling I O data rates and current design techniques It also describes the major high speed components channel properties and performance metrics The book exposes readers to a myriad of applications enabled by photonics interconnects technology Learn about Optical Interconnect Technologies Suitable for High Density Integration with CMOS Chips This richly illustrated work details how optical interchip communication links have the potential to fully leverage increased data rates provided through complementary metal oxide semiconductor CMOS technology scaling at suitable power efficiency levels Keeping the mathematics to a minimum it gives engineers researchers graduate students and entrepreneurs a comprehensive overview of the dynamic landscape of high speed photonics interconnects Non-destructive Micro Analysis of Cultural Heritage Materials K. Topographic Mapping of Brain Electrical Activity Frank H. Duffy, 2013-10-22 *Topographic Mapping of Brain Electrical Activity* presents the state of topographic mapping. It discusses its contributions to brain research. It addresses its research and clinical applications. It also explains completely the brain electrical activity mapping as a tool used in the diagnosis and treatment of neurological dysfunction. Some of the topics covered in the book are the color imaging of scalp somatosensory evoked potential fields, visual evoked potential topography, spatial analysis of EEG and evoked potential data, intra-individual changes in EEG during mental performance and changes in transversal coherence. The event-related desynchronization mapping of visualization of cortical activation patterns is fully covered. The spatiotemporal mapping display is discussed in detail. The text describes in depth the physical aspects of EEG data as a basis for topographic mapping. The human scalp field injection experiments are presented completely. A chapter is devoted to the classification strategies for topographic mapping data. Another section focuses on the topological factors. The book can provide useful information to radiologists, neurologists, students and researchers.

Digital Culture & Society (DCS) Olga Moskatova, Anna Polze, Ramón Reichert, 2022-08-01 Capturing personal data in exchange for free services is now ubiquitous in networked media and recently led to diagnoses of surveillance and platform capitalism. In social media discourse, dataveillance and data mining have been criticized as new forms of capitalist exploitation for some time. From social photos, selfies and image communities on the internet to connected viewing and streaming and video conferencing during the Corona pandemic, the digital image is not only predominantly networked but also accessed through platforms and structured by their economic imperatives, data acquisition techniques and algorithmic processing. In this issue, the contributors show how participation and commodification are closely linked to the production, circulation, consumption and operativity of images and visual communication, raising the question of the role networked images play for and within the proliferating surveillance capitalism.

Encyclopedia of Geographic Information Science Karen Kemp, 2008 Geographic information science (GIScience) is an emerging field that combines aspects of many different disciplines. Spatial literacy is rapidly becoming recognized as a new essential pillar of basic education alongside grammatical, logical and mathematical literacy. By incorporating location as an essential but often overlooked characteristic of what we seek to understand in the natural and built environment, geographic information science (GIScience) and systems GIS provide the conceptual foundation and tools to explore this new frontier. The *Encyclopedia of Geographic Information Science* covers the essence of this exciting new and expanding field in an easily understood but richly detailed style. In addition to contributions from some of the best recognized scholars in GIScience, this volume contains contributions from experts in GIS supporting disciplines who explore how their disciplinary perspectives are expanded within the context of GIScience: what changes when consideration of location is added, what complexities in analytical procedures are added when we consider objects in 2, 3 or even 4 dimensions, what can we gain by visualizing our analytical results on a map or 3D display. Key Features: Brings together GIScience literature that is spread widely across the academic spectrum.

Offers details about the key foundations of GIScience no matter what their disciplinary origins Elucidates vocabulary that is an amalgam of all of these fields Key Themes Conceptual Foundations Cartography and Visualization Design Aspects Data Manipulation Data Modeling Geocomputation Geospatial Data Societal Issues Spatial Analysis Organizational and Institutional Aspects The Encyclopedia of Geographic Information Science is an important resource for academic and corporate libraries
