Financialization as Welfare Philipp Golka, 2019-01-08 Providing an in depth case study on the emergence of social impact investing in the UK this book develops a new perspective on financialization processes that highlights the roles of non financial actors In contrast to the common view that impact investing gears finance toward the solution of social problems the author analyzes how these investments create new problems and inequalities To explain how social impact investing became popular in British social policy despite its unclear effectiveness the author focuses on cooperative relations between institutional entrepreneurs from finance and various non financial actors Drawing on field theory he shows how seemingly unrelated social transformations such as HM Treasury's expanding role in public service reform may act as resonance spaces for the spread of finance Opening up a new perspective on financialization processes in the terrain of public policy this book invites readers to refocus scholarship on capitalist dynamics to the meso level Based on this analysis the author also proposes ways to transform social impact investing to increase its potential for reducing global inequalities *Boom and Bust* Simon Lee, 2009 A newly updated edition of the critically acclaimed biography which examines Gordon Brown's politics over the last decade of Labour power Assessing his recent catastrophic fall in popularity Lee argues that ideological wavering and economic mismanagement are at the root of his troubles Invaluable to anyone interested in politics today **Budget 2005** Great Britain. Economic and Fiscal Strategy Report and Financial Statement and Budget Report Great Britain,2005 **Bulletin of the Atomic Scientists** ,1953-05 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world **The Parliamentary Debates (Hansard)**. Great Britain. Parliament. House of Lords,2006 Corporate Governance in a Changing Economic and Political Environment M. Federowicz,R. Aguilera,2003-12-19 This collection provides exceptional descriptive and analytical insights into changes in corporate governance settings in ten Eastern and Western European countries It demonstrates that there exist different varieties of capitalisms and paths to transformation of economic institutions In addition it offers detailed discussions about national cases as well as the overall European Union effects This book should be of great interest to scholars and students of comparative national systems corporate governance and European studies **Sectors Matter!** Stefan Mann,2011-06-10 Although all economic activities take place in sectors economists often devote little attention to differences between and characteristics of sectors This book tries to show that mesoeconomics the economic exploration of sectors and groups is a useful instrument of analysis between microeconomics the analysis of markets and macroeconomics the analysis of economies In order to do so economists and social scientists from related disciplines and coming from Europe Australia and Asia demonstrate that sectors matter for economic development and the formation of societies The book includes chapters with rigorous economic analysis outlooks on economic history and case studies in order to show the relevance of sectoral issues this broad range of content making it likely the most comprehensive book on mesoeconomics to date **The Consumer, Credit and Neoliberalism** Christopher Payne,2012-07-26 This book is an investigation into the economic policy formulation and practice of neoliberalism in Britain from the 1950s through to the financial crisis and economic downturn that began in 2007 8 It demonstrates that influential economists such as F A Hayek and Milton Friedman authors at key British think tanks such as the Institute of Economic Affairs and the Centre for Policy Studies and important political figures of the Thatcher and New Labour governments shared a similar conception of the consumer For neoliberals the idea that consumers were weak in the face of businesses and large corporations was almost offensive Instead consumers were imagined to be sovereign agents in the economy whose consumption decisions played a central role in the construction of their human capital and in the enabling of their aspirations Consumption just like production came to be viewed as an enterprising and entrepreneurial activity Consequently from the early 1980s until the present day it was felt necessary that

banks should have the freedom to meet the borrowing needs of consumers Credit rationing would be a thing of the past Just like businesses consumers and households could use debt to expand their stock of personal assets By utilizing the method of French philosopher Michel Foucault this book provides an original analysis of the policy ideas and political speeches of key figures in the New Right in government and at the Bank of England And it addresses the key question as to why policy makers both in Britain and the United States did little or nothing to stem rising consumer and household indebtedness instead always choosing to see increasing house prices and homeownership as a positive to be encouraged
