The Social and Economic Impact of New Technology 1978-84: A Select Bibliography Leslie Grayson, 2012-12-06
Silicon chip technology microprocessor technology information technology or quite simply new technology These are some of the names representing the microelectronics revolution depending upon the audience being addressed by speaker or writer No previous new industrial development has caused such widespread publicity and discussion amongst users and researchers as the new technology Concern is being expressed about the effects of new technology on employment job satisfaction social life leisure activities and the economics of commerce and industry The late 70s saw many doom laden predictions of those effects but by 1983 both management and trade unions were taking a more objective view of the social and economic impacts and many correspondents now see the new technology as a means of opening up new industries and overcoming the effects of world recessions The chip has involved the factory floor the office the supermarket and the home Electronic funds transfer electronic shopping microelectronic domestic appliances word processors and microprocessor controlled machinery mean that the new technology has pervaded all aspects of social and economic life and the developed countries are now coming to accept it as part of society as a whole Inevitably the flood of literature on the social and economic impacts of new technology has been overwhelming Unfortunately the quality of information and arguments propagated at conferences in journal papers and research reports has indicated that there has been little quantifiable evidence available on the effects of these impacts *Capital, Labour and the Middle Classes* John Urry, Nicholas Abercrombie, 2014-08-21 Most recent sociological work on the theory of class is based on a distinction between Weberian and Marxist approaches For the first part of this volume the authors use this distinction to review the literature on the middle class concentrating particularly on the traditions of Marxist theory and of the more empirical work inspired by Max Weber They show however that this distinction is of limited utility in reconstructing a theory of the middle class **The Sociology of Work (RLE: Organizations)** Parvin Ghorayshi, 2013-08-21 This reference volume reflects the changing world of work It includes research on the various dimensions of work such as the structure of the labour force labour market segmentation technology employment unemployment trade unions and industrial democracy This book provides an integrated view of the various dimensions of work its distinguishing characteristics and issues both peculiar as well as common to industrialized

Responsibility James Curran, Jean Seaton, 2002-09-10 *Power Without Responsibility* is a classic introduction to the history sociology theory and politics of the media in Britain It is an essential guide both for students and teachers of media and communication studies and for all those involved in the production and consumption of the media The new edition has been substantially revised to bring it right up to date with developments in the media industry new media technologies and changes in the political and academic debates surrounding media policy In this new edition the authors consider whether we are on the threshold of a new communications revolution the role of global media empires the rise of video cable and satellite the global information society and contradictions in media policy the BBC and broadcasting at the end of the 1990s the evolving relationship of the press and the Conservative party Assessing the press and broadcasting at a time of radical change the authors suggest a manifesto for media reform

Labour in Contemporary Capitalism Ursula Huws, 2019-05-04 In this long awaited book Ursula Huws brings together the results of decades of prescient research on labour market transformation to provide an authoritative overview of the impacts of technological economic social and political change on working life in the 21st century Placing current upheavals in global labour markets firmly in their historical context she debunks myths about the impacts of artificial intelligence on labour pointing to the processes whereby new employment is created as well as old jobs destroyed while never underestimating the contradictory impacts of digitalisation on work organisation resistance adaption and innovation This book is underpinned by a clear conceptual framework that analyses the dynamics of the restructuring of capitalism and labour taking full account of unpaid social reproductive work and integrating a feminist analysis whilst also pointing to new forms of commodification that will shape the future *Labour in Contemporary Capitalism* will be an invaluable resource and point of reference for students and scholars studying the sociology of labour economic structures technology and globalisation

applications is now well entrenched in our society and culture The process of designing such systems tends to focus on the needs of the company and the constraints of the equipment leading to efficient systems with little tolerance for the variety of people who must use or interface with them Within the office automation area these methods do not work nearly as well The frequency and amount of human interaction in the office environment and the wide variety of situations and reactions there in demands a different design methodology
