Rapid Visual Screening of Buildings for Potential Seismic Hazards: Supporting Documentation, 2015. The Rapid Visual Screening (RVS) handbook can be used by trained personnel to identify inventory and screen buildings that are potentially seismically vulnerable. The RVS procedure comprises a method and several forms that help users to quickly identify inventory and score buildings according to their risk of collapse if hit by major earthquakes. The RVS handbook describes how to identify the structural type and key weakness characteristics, how to complete the screening forms, and how to manage a successful RVS program.

Scholarship Reconsidered Ernest L. Boyer, Drew Moser, Todd C. Ream, John M. Braxton, 2015-10-06. Shifting faculty roles in a changing landscape. Ernest L. Boyer's landmark book *Scholarship Reconsidered* challenged the publish or perish status quo that dominated the academic landscape for generations. His powerful and enduring argument for a new approach to faculty roles and rewards continues to play a significant part of the national conversation on scholarship in the academy. Though steeped in tradition, the role of faculty in the academic world has shifted significantly in recent decades. The rise of the non-tenure track class of professors is well documented. If the historic rule of promotion and tenure is waning, what role can scholarship play in a fragmented, unbundled academy? Boyer offers a still much-needed approach. He calls for a broadened view of scholarship, audaciously refocusing its gaze from the tenure file and to a wider community. This expanded edition offers, in addition to the original text, a critical introduction that explores the impact of Boyer's views, a call to action for applying Boyer's message to the changing nature of faculty work, and a discussion guide to help readers start a new conversation about how *Scholarship Reconsidered* applies today.

Using Technology with Classroom Instruction That Works Howard Pitler, Elizabeth R. Hubbell, Matt Kuhn, 2012-08-02. Technology is ubiquitous and its potential to transform learning is immense. The first edition of *Using Technology with Classroom Instruction That Works* answered some vital questions about 21st-century teaching and learning: What are the best ways to incorporate technology into the curriculum? What kinds of technology will best support particular learning tasks and objectives? How does a teacher ensure that technology use will enhance instruction rather than distract from it? This revised and updated second edition of that best-selling book provides fresh answers to these critical questions, taking into account the enormous technological advances that have occurred since the first edition was published, including the proliferation of social networks, mobile devices, and web-based multimedia tools. It also builds on the up-to-date research and instructional planning framework featured in the new edition of *Classroom Instruction That Works*, outlining the most appropriate technology applications and resources for all nine categories of effective instructional strategies: Setting objectives and providing feedback, Reinforcing effort and providing recognition, Cooperative learning, Cues, questions, and advance organizers, Nonlinguistic representations, Summarizing and note taking, Assigning homework and providing practice, Identifying

similarities and differences Generating and testing hypotheses Each strategy focused chapter features examples across grade levels and subject areas and drawn from real life lesson plans and projects of teachers integrating relevant technology in the classroom in ways that are engaging and inspiring to students The authors also recommend dozens of word processing applications spreadsheet generators educational games data collection tools and online resources that can help make lessons more fun more challenging and most of all more effective
