Parallel Algorithms For Knapsack Type Problems:

   Parallel Algorithms for Knapsack Type Problems Vassil Alexandrov,G. M. Megson,1999 This book brings together current research direction in the mapping of dynamic programming recurrence equations for Knapsack Type problems which include Unbounded Knapsack Problem 0 1 Knapsack Problem Subset Sum Problem Change Making Problem onto so called regular parallel architectures In particular it focuses on heuristic and more formal techniques for mapping The text is based on substantially revised papers published by the authors and their colleagues in the literature but re written to provide an overall view of the subject area   *Evolutionary Algorithms for Solving Multi-Objective Problems* Carlos Coello Coello,Gary B. Lamont,David A. van Veldhuizen,2007-09-18 This textbook is a second edition of Evolutionary Algorithms for Solving Multi Objective Problems significantly expanded and adapted for the classroom The various features of multi objective evolutionary algorithms are presented here in an innovative and student friendly fashion incorporating state of the art research The book disseminates the application of evolutionary algorithm techniques to a variety of practical problems It contains exhaustive appendices index and bibliography and links to a complete set of teaching tutorials exercises and solutions   Parallel Algorithms for Irregular Problems: State of the Art Alfonso Ferreira,José Rolim,2013-04-17 Efficient parallel solutions have been found to many problems Some of them can be obtained automatically from sequential programs using compilers However there is a large class of problems irregular problems that lack efficient solutions IRREGULAR 94 a workshop and summer school organized in Geneva addressed the problems associated with the derivation of efficient solutions to irregular problems This book which is based on the workshop draws on the contributions of outstanding scientists to present the state of the art in irregular problems covering aspects ranging from scientific computing discrete optimization and automatic extraction of parallelism Audience This first book on parallel algorithms for irregular problems is of interest to advanced graduate students and researchers in parallel computer science   **Network and Parallel Computing** Hai Jin,Daniel Reed,Wenbin Jiang,2005-11-24 These proceedings contain the papers presented at the 2005 IFIP International Conference on Network and Parallel Computing NPC 2005 held in Beijing China between November 30 and December 3 2005 The goal of the conference was to establish an international forum for engineers and scientists to present their ideas and experiences in network and parallel computing A total of 320 submissions were received in response to our Call for Papers These papers were from the following countries or regions Australia Canada China France Germany Hong Kong India Iran Italy Japan Korea Lux burg Nepal Netherlands Taiwan United Arab Emirates and United States Each submission was sent to at least three reviewers Each paper was judged cording to its originality innovation readability and relevance to the expected audience Basedonthereviewsreceived atotalof68paperswereretainedfor clusionin theproceedings Among the 68 papers 48 wereacceptedasfull papers for presentation at the conference We also accepted 20 papers as short papers for a possible brief presentation at the conference followed by discussion during a poster session Thus only 21% of the total submissions could

be included in the nal program *Parallel Computing: Fundamentals, Applications and New Directions* E.H. D'Hollander,G.R. Joubert,Frans Peters,Ulrich Trottenberg,1998-07-22 This volume gives an overview of the state of the art with respect to the development of all types of parallel computers and their application to a wide range of problem areas The international conference on parallel computing ParCo97 Parallel Computing 97 was held in Bonn Germany from 19 to 22 September 1997 The first conference in this biannual series was held in 1983 in Berlin Further conferences were held in Leiden The Netherlands London UK Grenoble France and Gent Belgium From the outset the aim with the ParCo Parallel Computing conferences was to promote the application of parallel computers to solve real life problems In the case of ParCo97 a new milestone was reached in that more than half of the papers and posters presented were concerned with application aspects This fact reflects the coming of age of parallel computing Some 200 papers were submitted to the Program Committee by authors from all over the world The final programme consisted of four invited papers 71 contributed scientific industrial papers and 45 posters In addition a panel discussion on Parallel Computing and the Evolution of Cyberspace was held During and after the conference all final contributions were refereed Only those papers and posters accepted during this final screening process are included in this volume The practical emphasis of the conference was accentuated by an industrial exhibition where companies demonstrated the newest developments in parallel processing equipment and software Speakers from participating companies presented papers in industrial sessions in which new developments in parallel computing were reported **Knapsack Problems** Hans Kellerer,Ulrich Pferschy,David Pisinger,2004-02-20 This book provides a full scale presentation of all methods and techniques available for the solution of the Knapsack problem This most basic combinatorial optimization problem appears explicitly or as a subproblem in a wide range of optimization models with backgrounds such diverse as cutting and packing finance logistics or general integer programming This monograph spans the range from a comprehensive introduction of classical algorithmic methods to the unified presentation of the most recent and advanced results in this area many of them originating from the authors The chapters dealing with particular versions and extensions of the Knapsack problem are self contained to a high degree and provide a valuable source of reference for researchers Due to its simple structure the Knapsack problem is an ideal model for introducing solution techniques to students of computer science mathematics and economics The first three chapters give an in depth treatment of several basic techniques making the book also suitable as underlying literature for courses in combinatorial optimization and approximation Operations Research Jay E. Aronson,Stanley Zionts,2009-04-01 Drawn from a conference honoring Gerald L Thompson the pioneer of operations research this volume brings together some of the latest writings of major figures in the field The volume is divided into four parts the first part reviews the career and significance of Thompson the second concentrates on linear and nonlinear optimization the third looks at network and integer programming and the fourth provides examples of applications oriented research in manufacturing This volume will
