## Parallel Chapters From The First Sec:

Programming Constraint Services Christian Schulte, 2003-08-01 Constraint Programming is an approach for modeling and solving combinatorial problems that has proven successful in many applications. It builds on techniques developed in Artificial Intelligence, Logic Programming, and Operations Research. Key techniques are constraint propagation and heuristic search. Constraint Programming is based on an abstraction that decomposes a problem solver into a reusable constraint engine and a declarative program modeling the problem. The constraint engine implements the required propagation and search algorithms. It can be realized as a library for a general purpose programming language (e.g., C) as an extension of an existing language (e.g., Prolog) or as a system with its own dedicated language. The present book is concerned with the architecture and implementation of constraint engines. It presents a new concurrent architecture that is far superior to the sequential architecture underlying Prolog. The new architecture is based on concurrent search with copying and recomputation rather than sequential search with trailing and backtracking. One advantage of the concurrent approach is that it accommodates any search strategy. Furthermore, it considerably simplifies the implementation of constraint propagation algorithms since it eliminates the need to account for trailing and backtracking. The book investigates an expressive generalization of the concurrent architecture that accommodates propagation preserving combinators known as deep guard combinators for negation, disjunction, implication, and retraction of constraint propagators. Such combinators are beyond the scope of Prolog's technology. In the concurrent approach, they can be obtained with a reflective encapsulation primitive.

But in contemporary Canadian culture the border has multiple meanings and imbalances of cultural power occur both across the Canada-US border as well as within Canada. *Discrepant Parallels* examines divergent relationships to and investments in the Canada-US border in a variety of media such as travel writing, fiction, poetry, drama, and television. Tracing cultural production in Canada since the 1980s through the periods of FTA and NAFTA negotiations and into the current post-9/11 context, Gillian Roberts grapples with the border's changing relevance to Canadian nationalist, Indigenous, African Canadian, and Latin American perspectives. Drawing on Kant and Derrida, she theorizes the 49th parallel to account for the imbalance of cultural, political, and economic power between the two countries as well as the current challenges to dominant definitions of Canadianness. Focusing on a border that is often overshadowed by the contentious US-Mexico divide, *Discrepant Parallels* analyzes the desire to establish Canadian-American sameness and difference from a multitude of perspectives as well as its implications.

for how Canada is represented within and outside its national borders
