Parapsychology Philosophy Spirituality:

Parapsychology, Philosophy, and Spirituality David Ray Griffin, 1997-01-01 Examines why parapsychology has been held in disdain by scientists philosophers and theologians explores the evidence for ESP psychokinesis and life after death and suggests that these phenomena provide support for a meaningful postmodern spirituality *Parapsychology and Religion* Everton de Oliveira Maraldi, 2021-06-29 Parapsychology and Religion is perhaps the most controversial research area in the psychology of religion However in recent decades psychology of religion has witnessed a growing literature bearing on ontological issues including parapsychological topics such as distant healing and near death experiences This book argues that despite the methodological and theoretical controversies that still surround the field of parapsychology the findings of research on alleged anomalous processes can inform the study of religious spiritual experiences Psychological literature on the paranormal is critically reviewed and it is argued that it became less a scientific endeavor and more an ideological program devised to denigrate paranormal believers and experiencers This volume explores how an open minded dialogue between parapsychology and psychology of religion might help us move beyond the present ideological disputes and reviews the complex relations between parapsychology and religion over time as well as their implications for interdisciplinary research on religion and spirituality

Parapsychology, Philosophy and the Mind Fiona Steinkamp, 2015-10-02 John Beloff is one of our foremost authorities in parapsychology He is credited with an instrumental role in the acceptance of parapsychology into academia On April 21 and 22 2000 a two day international conference was held by the Koestler Parapsychology Unit of the Psychology Department at the University of Edinburgh to celebrate Beloff's eightieth birthday Most of the essays in this work were presented at this conference honoring John Beloff All of the contributors have published a number of articles in mainstream philosophy and their essays promote Beloff's greatest interest a philosophical interaction with parapsychology The book is divided into three sections and each section has three papers The papers in the first section Parapsychology Philosophy and the Mind explore the mind brain problem parapsychology and the principle of closure and a cross cultural perspective on dualism and the self The second section Parapsychology Self and Survival looks at parapsychological phenomena and the sense of self chrysalid therapy and the problem of super psi The third section Parapsychology Religion and Spirituality features papers that discuss parapsychology and how it relates to Hume's view of miracles to religion and to the origin of the Copernican hypothesis

Spiritual Being and Becoming Eric J Kyle, 2017-05-25 As many as 100 billion neurons make up the human nervous system a system that is incredibly complex and a fundamental part of what makes us who we are But there is far more to human beings than biology Many academic disciplines study the human condition and there are many schools of thought within that study We must also appreciate that the study of human nature did not begin in contemporary times History is full of texts that offer detailed explorations of the human condition However no consensus has yet emerged Consensus or not those working towards religious and spiritual formation pursue the

transformation of their communities This book offers a fuller understanding of some of the common views of human nature and also insights into how we might utilise this knowledge in our ministries ministries that strive towards the spiritual being and becoming of our world Parapsychology, Science Or Magic? James E. Alcock,1981 **The Science of Spirit** Luis Portela,2020-12-18 Throughout the 20th century and into the new millennium humanity has made enormous advancements in science and technology Spiritual enlightenment however has gone relatively neglected as fascination with material progress tends to keep us focused on the physical world giving less importance to universal values to being to spiritual life Parapsychological research has produced significant findings over the last few decades and science has the obligation to continue exploring this area seeking to contribute to the spiritual enlightenment of humanity This book examines evidence of traditional psychic phenomena promoting a more comprehensive understanding of them and offering new perspective to see ourselves as particles of universal energy interconnected with all others *Parapsychology* Richard S. Broughton,1992 A survey of parapsychology Part 1 describes the debates about the validity of paranormal experiences Part 2 distinguishes between what is known and what is speculation in each field Part 3 includes new research from India and Russia and looks to the future **Spirituality** Kees Waaijman,2002 This textbook is a systematic guide to the extensive field of spirituality Kees Waaijman charts the multiform phenomenon of spirituality the spirituality of ordinary people the great spiritual traditions and the force of counter movements From the foundation of this survey he answers questions like What exactly is spirituality What forms can a scholarly approach take Finally the book provides methodic access to the study of spirituality focusing on the following questions Which are the different forms of spirituality and how can we describe them How can spiritual texts be given a reliable reading Which themes can be distinguished in the field of spirituality and what would be a meaningful way to address them What do we mean by spiritual guidance and what can we learn from it This textbook has no equal It is indispensable to scholars wishing to study the subject but also to others who want to learn about spirituality **Shadow, Self, Spirit - Revised Edition** Michael Daniels,2021-09-28 New and enlarged edition Transpersonal Psychology concerns the study of those states and processes in which people experience a deeper sense of who they are or a greater sense of connectedness with others with nature or the spiritual dimension Pioneered by respected researchers such as Jung Maslow and Tart it has nonetheless struggled to find recognition among mainstream scientists Now that is starting to change Dr Michael Daniels teaches the subject as part of a broadly based psychology curriculum and this new and enlarged edition of his book brings together the fruits of his studies over recent years It will be of special value to students and its accessible style will appeal also to all who are interested in the spiritual dimension of human experience The book includes a detailed 38 page glossary of terms and detailed indexes Spiritual Titanism Nicholas F. Gier,2012-03-27 This work in comparative philosophy uses the concept of Titanism to critique certain trends in both Eastern and Western philosophy Titanism is an extreme form of humanism in which human beings take on divine attributes and prerogatives The author finds the most

explicit forms of spiritual Titanism in the Jaina Samkhya and Yoga traditions where yogis claim powers and knowledge that in the West are only attributed to God These philosophies are also radically dualistic and liberation involves a complete transcendence of the body society and nature Five types of spiritual Titanism are identified and in addition to this typology a heuristic based on Nietzsche's three metamorphoses of camel lion and child is offered The book determines that answers to spiritual Titanism begin not only with the Hindu Goddess religion but also are found in Buddhism Confucianism and Daoism especially Zen Buddhism and Confucianism

World in Process John A. Jungerman, 2000-11-02 World in Process provides not only an up to date description of the ideas of modern physics and cosmology but also connects those ideas to process thought To make these connections a brief introduction to process philosophy is provided so that the new physics and process thought can be integrated

The End of Modern Medicine Laurence Foss, 2012-02-01 The End of Modern Medicine chronicles the work of a small influential band of medical theorists and clinicians who over the past decade have sought to redress the physical fundamentalism of the biomedical model that shaped their professional training Laurence Foss challenges the prevailing medical model whereby mind and body are essentially separated and charts a new psychobiological course Asking fresh questions raising new possibilities probing long established preconceptions Foss presents a radically reconfigured medical model This model accounts for the full range of findings in the experimental literature most notably those surfacing over the past quarter century in psychophysiological studies which show a correlation between psychosocial variables and disease susceptibility that are in line with what more basic sciences tell us about the behavior of material systems and the nature of scientific explanation Foss also critically analyzes the regulative ideals of today's medical research community and puts modern science itself from which these ideals derive under a microscope

Mothership Connections Theodore Walker Jr., 2012-02-01 Bringing a black Atlantic approach to constructive postmodern efforts to understand and transcend modern worldviews and modern world orders Mothership Connections draws upon the work of scholars in the tradition of W E B Du Bois Charles H Long Alfred North Whitehead and Charles Hartshorne The author shows that connections to the originating influences of transatlantic slavery and black Atlantic experiences are essential to any adequate account of modernity and postmodernity He also argues that metaphysics is essential to theology and moral theory synthesizing neoclassical metaphysics and black theology to develop a black Atlantic account of metaphysical aspects of struggle power and ethical deliberation

The Spirit of American Liberal Theology Gary Dorrien, 2023-09-05 The Spirit of American Liberal Theology is an interpretation of the entire U S American tradition of liberal theology A highly condensed and far more accessible summary of Gary Dorrien's three volume trilogy The Making of American Liberal Theology Westminster John Knox Press 2001 2003 and 2006 Dorrien here presses the argument that the most abundant diverse and persistent tradition of liberal theology is the one that blossomed in the United States and is still refashioning itself While discussions of English and German liberalism persist new material includes expanded treatment of the Black social gospel

the Universalists developments into early 2020s and a robust expression of the author's post Hegelian liberal liberationist perspective

Religions in the Making John B. Cobb Jr., 2012-11-06 Whitehead had a place for God in his comprehensive cosmological vision and his theism has long attracted interest from some Christian theologians But Whitehead's ideas have much wider use Some Buddhists have found help in articulating their nontheistic vision and relating it to the current world of thought and action In this book religious writers in seven different traditions articulate how they can benefit from Whitehead's work So this volume demonstrates that various features of his thought can contribute to many communities According to his followers Whitehead shows that the deepest convictions and commitments of the major religious communities can be complementary rather than in conflict Readers of this book will see how that plays out in some detail A Whiteheadian Hindu can recognize the truth in a Whiteheadian Judaism and both can appreciate the insights of Chinese Whiteheadians committed to their classical thinking Perhaps a new day in interreligious understanding has come

Parapsychology Etzel Cardeña, John Palmer, David Marcusson-Clavertz, 2015-07-25 Many people have experienced such unusual phenomena as dreams that later seem to correspond with unforeseeable events thinking of a long lost friend just before he or she unexpectedly calls or the ability to feel the presence of deceased loved ones What many do not realize is that these types of experiences have been researched for more than a century by eminent scientists including Nobel

laureates Most of these researchers have concluded that some of these phenomena do occur although we are far from explaining them to everyone's satisfaction This book is the first in almost 40 years to provide a comprehensive scientific overview of research in the field of parapsychology explaining what we know and don't know about so called psi phenomena such as telepathy precognition or psychokinesis Contributors evaluate the evidence for these phenomena accounting for factors such as selective memory wish fulfillment and incorrect methods or analyses in some cases offering psychological physical and biological theories Instructors considering this book for use in a course may request an examination copy here

The Resurrection of Jesus Dale C. Allison, Jr., 2021-03-11 The earliest traditions around the narrative of Jesus resurrection are considered in this landmark work by Dale C Allison Jr drawing together the fruits of his decades of research into this issue at the very core of Christian identity Allison returns to the ancient sources and earliest traditions charting them alongside the development of faith in the resurrection in the early church and throughout Christian history Beginning with historical critical methodology that examines the empty tomb narratives and early confessions Allison moves on to consider the resurrection in parallel with other traditions and stories including Tibetan accounts of saintly figures being assumed into the light in the chapter Rainbow Body Finally Allison considers what might be said by way of results or conclusions on the topic of resurrection offering perspectives from both apologetic and sceptical viewpoints In his final section of modest results he considers scholarly approaches to the resurrection in light of human experience adding fresh nuance to a debate that has often been characterised in overly simplistic terms of it happened or it didn't
