**A House Built on Sand** Noretta Koertge, 1998. Cultural critics say that science is politics by other means, arguing that the results of scientific inquiry are profoundly shaped by the ideological agendas of powerful elites. They base their claims on historical case studies purporting to show the systematic intrusion of sexist, racist, capitalist, colonialist, and/or professional interests into the very content of science. In this hard-hitting collection of essays, contributors offer crisp and detailed critiques of case studies offered by the cultural critics as evidence that scientific results tell us more about social context than they do about the natural world. Pulling no punches, they identify numerous crude factual blunders, e.g., that Newton never performed any experiments and egregious errors of omission such as the attempt to explain the slow development of fluid dynamics solely in terms of gender bias. Where there are positive aspects of a flawed account or something to be learned from it, they do not hesitate to say so. Their target is shoddy scholarship. Comprising new essays by distinguished scholars of history, philosophy, and science, this book raises a lively debate to a new level of seriousness.

**The Psychic and the Rabbi** Uri Geller, Shmuel Boteach, 2001. *The Psychic and the Rabbi* is a spellbinding correspondence between the world's most celebrated paranormalist and one of the most controversial and famous religious figures. In over 50 letters, these two friends share their inner fears, doubts, joys, and beliefs. Searingly honest, they lay bare their innermost feelings and life experience while confronting the most profound questions and issues of our time.

**Life, Mind and Galaxies** Valdemar Axel Firsoff, 1967. *The Truth about Uri Geller* James Randi, 1982. There is more to Uri Geller than his countless miracles, and James Randi tells all in this fascinating examination of the Geller myth. What really makes Geller run? Why have scientists reported on all Geller's successful psychic tests and ignored his many failures? Why will Uri perform almost anywhere, anytime, except in front of professional magicians? Can Geller actually bend spoons, keys, and nails with his psychic powers? Why do people around the world continue to believe Geller has magic powers when his tricks have been exposed many times? In an eye-opening exposé, Randi provides a devastating blow to Geller and the pseudoscience of parapsychology.

**Mind Medicine** Uri Geller, Lulu Appleton, 1999. In this book, Uri Geller shows that the human mind is a powerhouse of energy, untapped by most people and yet capable of restoring physical and mental health. He shows that if you believe your mind is powerful enough to affect your health, you can send that message to your brain directly.
