

Positive Parenting

ZERO TO THREE
Early connections last a lifetime

Positive parenting describes a set of parental behaviors that foster a child's capacity to **love, trust, explore and learn**. The goal of positive parenting is to help parents guide their children's healthy development in the context of the family's culture. Key elements of positive parenting include the ability to:

Understand or imagine the **child's point of view**, especially during challenging moments.

Respond with interest and **sensitivity** to the child's cues.

Recognize that **parenting can be stressful** and missteps are a natural part of child-rearing.

Recognize and **celebrate** the child's strengths, abilities, and capacity to learn and develop.

Provide consistent, **age-appropriate guidelines** and limits for child behavior.

Work toward a **balance** of meeting parental needs and child needs.

Delight in **moments of connection** with the child.

Recognize and **regulate their own feelings** and behaviors before they respond to the child.

Seek help, support or additional information on parenting when needed.

How Children Succeed Paul Tough, 2012 Why do some children succeed while others fail The story we usually tell about childhood and success is the one about intelligence success comes to those who score highest on tests from preschool admissions to SATs But in How Children Succeed Paul Tough argues that the qualities that matter most have more to do with character skills like perseverance curiosity conscientiousness optimism and self control How Children Succeed introduces us to a new generation of researchers and educators who for the first time are using the tools of science to peel back the mysteries of character Through their stories and the stories of the children they are trying to help Tough traces the links between childhood stress and life success He uncovers the surprising ways in which parents do and do not prepare their children for adulthood And he provides us with new insights into how to improve the lives of children growing up in poverty Early adversity scientists have come to understand not only affects the conditions of children s lives it can also alter the physical development of their brains But innovative thinkers around the country are now using this knowledge to help children overcome the constraints of poverty With the right support as Tough s extraordinary reporting makes clear children who grow up in the most painful circumstances can go on to achieve amazing things This provocative and profoundly hopeful book has the potential to change how we raise our children how we run our schools and how we construct our social safety net It will not only inspire and engage readers it will also change our understanding of childhood itself

Homework Improvement Roberta Schneiderman, 2005-09-02 Educational resource for teachers parents and kids

We Must Take Charge! Chester E. Finn,

Jr.,2008-06-30 According to leading education analyst Chester Finn a paradox lies at the heart of our educational trouble While Americans commonly acknowledge that public schools in general are a disaster polls consistently show that most parents teachers and administrators think their local schools and their own children are doing just fine The implications of this self congratulation are profound For if people believe their own schools and children are succeeding why should they feel compelled to change things Yet if we don't we will continue to watch the destruction of a system that already lacks accountability and quality control and is beset by a teaching profession compromised by bad ideas fads buck passing dubious theories and stodgy practices Finn proposes radical changes which he insists must be championed by all Americans if this atrophy is to be reversed First and most importantly he calls on us to reorganize education in relation to the results we want from it This means establishing a clearcut standard of intellectual achievement that we will oblige all of our schools to enforce and our children to meet To define this standard we will need to rebuild instruction around a national curriculum of core subjects history science geography math literature and writing And we must demand a more detailed flow of useful information including reliable testing about how our children are performing in relation to this standard Finn calls on us to give our children as much time as many options and as broad an array of resources as possible As he points out learning can take place as easily in July as it does in march as easily in a museum as it does in a classroom And if parents have choices in deciding which schools and programs best fit the needs of students they will have an added incentive in helping their children succeed He urges us to revitalize the means of delivering education from the bottom up by vesting as much authority as possible with educators in each individual school and holding them accountable for their performance For Finn the implementation of these radical measures is essential to produce not only a knowledgeable twenty first century work force that will keep our nation competitive but an informed and reasoning citizenry capable of participating fully in a democracy Challenging and candid this book will point the way for all those insisting on the best that our schools can offer
