Family Values Harry Brighouse, Adam Swift, 2016-08-02 The family is hotly contested ideological terrain Some defend the traditional two parent heterosexual family while others welcome its demise Opinions vary about how much control parents should have over their children's upbringing Family Values provides a major new theoretical account of the morality and politics of the family telling us why the family is valuable who has the right to parent and what rights parents should and should not have over their children Harry Brighouse and Adam Swift argue that parent child relationships produce the familial relationship goods that people need to flourish Children's healthy development depends on intimate relationships with authoritative adults while the distinctive joys and challenges of parenting are part of a fulfilling life for adults Yet the relationships that make these goods possible have little to do with biology and do not require the extensive rights that parents currently enjoy Challenging some of our most commonly held beliefs about the family Brighouse and Swift explain why a child's interest in autonomy severely limits parents right to shape their children's values and why parents have no fundamental right to confer wealth or advantage on their children Family Values reaffirms the vital importance of the family as a social institution while challenging its role in the reproduction

of social inequality and carefully balancing the interests of parents and children Child Parent Relationship Therapy (CPRT) Treatment Manual Sue C. Bratton, Garry L. Pollock, 1983-11-24 The history of childhood is an area so full of errors distortion and misinterpretation that I thought it vital if progress were to be made to supply a clear review of the information on childhood contained in such sources as diaries and autobiographies Dr Pollock's statement in her Preface will startle readers who have not questioned the validity of recent theories on the evolution of childhood and the treatment of children theories which see a movement from a situation where the concept of childhood was almost absent and children were cruelly treated to our present western recognition that children are different and should be treated with love and affection Linda examines this thesis particularly through the close and careful analysis of some hundreds of English and American primary sources Through these sources she has been able to reconstruct probably for the first time a genuine picture of childhood in the past and it is a much more humane and optimistic picture than the current stereotype Her book contains a mass of novel and original material on child rearing practices and the relations of parents and children and sets this in the wider framework of developmental psychology socio biology and social anthropology Forgotten Children admirably fulfils the aim of its author In the face of this scholarly and elegant account of the continuity of parental care few will now be able to argue for dramatic transformations in the twentieth century **Parent-Youth Relations** Stephan Wilson, Gary W Peterson, Suzanne Steinmetz, 2012-12-06 Explore the most fundamental human relationship between parent and child Western social science has long neglected to acknowledge that family relationships must always be examined from a culturally sensitive perspective Parent Youth Relations Cultural and Cross Cultural Perspectives fills this void by exploring in depth the most fundamental human relationship between parent and child in different societies around the world International experts

Parent-child Interactions and Relationships Kristin Alvarez, 2016. Positive parent-child interactions play an important role in fostering the development of pre-schoolers' knowledge and understandings of their world. This book provides current research on parent-child interactions and relationships. Chapter One reviews Parent-Child Interaction Therapy (PCIT) research conducted with diverse populations as well as adaptations that have been implemented. Chapter Two describes Integration of Working Models of Attachment into Parent-Child Interaction Therapy (IoWA PCIT). Chapter Three reports results of a small open trial of IoWA PCIT with children and their adoptive mothers. Chapter Four analyses the educational representations and practices of Italian parents about childrearing. Chapter Five compares mothers and fathers on a variety of parenting measures that include behavioral observations as well as self-reported data. Chapter Six presents how experiences of adequate quality promote metacognitive functions. Chapter Seven analyses mother-child interactions during the use of a touch screen tablet. Chapter Eight explores the effect engagement with media technologies has on the

quality of interactions between parents and their children Chapter Nine suggests that supporting children's early writing with technologies can complete the traditional early literacy and writing support via a pencil and paper Chapter Ten examines the relationship between parent teaching of environmental print to their children child interest in environmental print and emergent literacy skills Chapter Eleven describes the longitudinal effects of parent child interactions on social competence development using the Interaction Rating Scale IRS for eighteen month olds to seven year old children

Parenting Beliefs, Behaviors, and Parent-Child Relations Kenneth H. Rubin, Ock Boon Chung, 2013-09-05 The purpose of this book is to present a rather simple argument Parents thoughts about childrearing and the ways in which they interact with children to achieve particular parenting or developmental goals are culturally determined Within any culture children are shaped by the physical and social settings within which they live culturally regulated customs and childrearing practices and culturally based belief systems The psychological meaning attributed to any given social behavior is in large part a function of the ecological niche within which it is produced Clearly it is the case that there are some cultural universals All parents want their children to be healthy and to feel secure However healthy and unhealthy at least in the psychological sense of the term can have different meanings from culture to culture **Room** Emma Donoghue, 2017-05-07 Kidnapped as a teenage girl Ma has been locked inside a purpose built room in her captor's garden for seven years Her five year old son Jack has no concept of the world outside and happily exists inside Room with the help of Ma's games and his vivid imagination where objects like Rug Lamp and TV are his only friends But for Ma the time has come to escape and face their biggest challenge to date the world outside Room Relationships Unfiltered Andrew Root, 2013-03-05 For more than 50 years relational or incarnational ministry has been a major focus in youth ministry But for too long those relationships have been used as tools as a means to an end where adults try to influence students to accept know trust believe or participate in something While our motives may be good it's possible that by focusing on these goals we're not ministering the whole person When we choose not to engage in the full life of a student we run the risk of failing them and our ministry In this thoughtful and insightful book Andrew Root challenges us to reconsider our motives and begin to consider simply being with and doing life alongside teenagers with no agenda other than to love them right where they are by place sharing As he shares stories of his and others successes and failures in relational youth ministry you'll find practical ideas to help you recreate the role of relationships in your youth ministry If you're involved in the lives of teenagers whether as a youth pastor volunteer youth worker church leader or parent you'll want to read this book and work together to discover the value of place sharing in the lives of teens You'll see that it's time to tear down the old structure of relational youth ministry and start again

Parent-Child Relationships Marty Grossberg, 2015-07-02 **GLAM** **A Kid's Guide to Understanding Parents** Joy Wilt Berry, 1980 Defines biological adopted foster and stepparents discusses the needs of parents explains how parents care for their children and tells how to develop a good relationship with parents *From Parent to Child* Jere R. Behrman, Robert

A. Pollak, Paul Taubman, 1995-08-15 How do parents allocate human capital among their children To what extent do parental decisions about resource allocation determine children's eventual economic success The analyses in *From Parent to Child* explore these questions by developing and testing a model in which the earnings of children with different genetic endowments respond differently to investments in human capital Behrman Pollak and Taubman use this model to investigate issues such as parental bias in resource allocations based on gender or birth order the extent of intergenerational mobility in income earnings and schooling in the United States the relative importance of environmental and genetic factors in determining variations in schooling and whether parents' distributions offset the intended effects of government programs designed to subsidize children In allocating scarce resources parents face a trade off between equity and efficiency between the competing desires to equalize the wealth of their children and to maximize the sum of their earnings Building on the seminal work of Gary Becker *From Parent to Child* integrates careful modeling of household behavior with systematic empirical testing and will appeal to anyone interested in the economics of the family
