Parental Choice As An Education Reform Catalyst:

Parental Choice as an Education Reform Catalyst John Merrifield, 2005 *What America Can Learn from School Choice in Other Countries* David F. Salisbury, James Tooley, 2005 This book draws out the critical lessons for U S policymakers and shows how freedom to choose schools and healthy competition among schools can create strong academic success

Educational Freedom Neal McCluskey, Jason Bedrick, 2017-05-01 Although his life was cut tragically short in 2016 Andrew Coulson had a remarkable impact on education policy As director of the Cato Institute s Center for Educational Freedom from 2005 to 2015 Coulson was committed to excellence in education and consistently advocated for free market reforms that would make schools more flexible innovative and responsive to the needs of parents and students In this volume prominent education researchers and thinkers who knew Andrew and his ideas well commemorate his legacy with articles that explore and expand the vitality and urgency of his ideas **School Choice Myths** Corey A. DeAngelis, Neal P.

McCluskey, 2020-10-07 Are there legitimate arguments to prevent families from choosing the education that works best for their children Opponents of school choice have certainly offered many objections but for decades they have mainly repeated myths either because they did not know any better or perhaps to protect the government schooling monopoly In these pages 14 of the top scholars in education policy debunk a dozen of the most pernicious myths including school choice siphons money from public schools choice harms children left behind in public schools school choice has racist origins and choice only helps the rich get richer As the contributors demonstrate even arguments against school choice that seem to make powerful intuitive sense fall apart under scrutiny There are frankly no compelling arguments against funding students directly instead of public school systems **School Choice Myths** shatters the mythology standing in the way of education freedom

School Choice in China Wu Xiaoxin, 2013-10-15 *School Choice in China* explores the major characteristics of schooling options in China highlighting how largely middle class parents exploit their cultural economic and social capital for their children s admission into choice schools It highlights how payments such as choice fees donations prize winning certificates and awards as well as the use of guanxi result in Chinese school choice as a parent driven bottom up movement The author also explores how schools and local governments cash in on the school choice fever in order to obtain significant economic returns leading to policies that accommodate the needs of mostly middle class families He argues that although this system seems to create winners among the parties involved it exacerbates the educational inequality that already exists in Chinese society Chapters include Positional competition for cultural capital Exploitation of social capital Economics of school choice Class reproduction through parental choice This book is not simply a detailed analysis of Chinese school choice practices but also a study of the competitive middle class search for advantage for their children As such it will be beneficial to undergraduates postgraduates education professionals policy makers and anyone with an interest in education sociology social policy and the rise and future of China **The School Choice Wars** John Merrifield, 2001 What does the term school

choice mean to you Opponents of parental choice have muddled its definition misleading parents and educators and drawing public debate away from the core issues In a book geared for anyone who wants to better understand this hotly contested topic Merrifield clarifies the proposals in existence today defining the key concepts related to choice Arguing for a competitive education industry he discusses policy and political strategy mistakes while suggesting corrections This informative book covers government regulation issues typical fallacies diversity issues private voucher initiatives and experiments and empirical evidence about competition *Resources in Education* ,1999-04 Choosing Better Schools ,1989 Restoring America's Fiscal Constitution John D. Merrifield,Barry W. Poulson,2017-09-28 Restoring America's Fiscal Constitution estimates the potential impact of new fiscal rules on the U S economy over the next two decades The new rules would require a cyclically balanced budget and an expenditure limit The study shows that over the forecast period the budget could be balanced and the total debt to GDP ratio reduced to the 60 percent tolerance level under this scheme but this fiscal consolidation can only be achieved using a combination of fiscal reforms that go far beyond what has been proposed by Congress and the President The first chapter explores the theoretical foundations of a fiscal constitution The orthodox public finance view of public debt is contrasted with a public choice perspective This is followed by chapters surveying the new fiscal rules enacted in other countries to address debt issues Several chapters provide a historical perspective on U S debt including a critical appraisal of our fiscal rules New laws are proposed to address the debt crisis and a dynamic simulation model is used to estimate the impact of the proposed laws on the U S economy The final section provides a roadmap for enacting the proposed constitutional and statutory fiscal rules **Public Debt Sustainability** Barry W. Poulson,John Merrifield,Steve H. Hanke,2022-01-04 This book examines the issue of debt sustainability from an international perspective with reference to European countries emerging nations and the United States *Oversight Hearing on Parental Choice* United States. Congress. House. Committee on Education and Labor. Subcommittee on Elementary, Secondary, and Vocational Education,1989 *Can the Debt Growth Be Stopped?* John D. Merrifield,Barry W. Poulson,2016-03-01 This book explores new fiscal rules introduced in OECD countries and the relevance of fiscal rules for the unique fiscal policies and institutions in the United States The rules in different countries are compared with a more in depth analysis of two countries with arguably the most successful fiscal rules Switzerland and Sweden The study compares the challenge of fiscal consolidation facing the U S with that in other OECD countries The centerpiece of the study is analysis of fiscal rules using a dynamic simulation model A Swiss style fiscal rule is compared to an alternative fiscal rule proposed by Representative Amash H J Res 24 The authors propose a new fiscal rule designed for the unique fiscal institutions in the U S Dynamic scoring is used to measure the impact of different fiscal rules on the federal budget economic growth and revenue The effectiveness of the different fiscal rules is analyzed with respect to several criteria A major objective of the rules is fiscal stabilization in the long run to bring debt GDP ratios below tolerance levels The fiscal rules are also designed for budget

stabilization in the medium term such that deficits in periods of recession are offset by surplus revenue in periods of economic expansion The concluding section of the study explores the political economy of enacting new fiscal rules in the U S The study proposes fundamental changes in budget process required for the proposed fiscal rule to be effective The study concludes with a discussion of alternative routes to enacting new fiscal rules and the prospects for new fiscal rules to be enacted in the U S

Charting Chicago School Reform Anthony Bryk, 2018-03-08 In 1989 Chicago began an experiment with radical decentralization of power and authority Intertwining extensive narratives and rigorous quantitative analyses this book tells the story of what happened to Chicagos elementary schools in the first four years of this reform In 1989 Chicago began an experiment with radical decentralization of power and authority This book tells the story of what happened to Chicagos elementary schools in the first four years of this reform Implicit in this reform is the theory that expanded local democratic participation would stimulate organizational change within schools which in turn would foster improved teaching and learning Using this theory as a framework the authors marshal massive quantitative and qualitative data to examine how the reform actually unfolded at the school level With longitudinal case study data on 22 schools survey responses from principals and teachers in 269 schools and supplementary system wide administrative data the authors identify four types of school politics strong democracy consolidated principal power maintenance and adversarial In addition they classify school change efforts as either systemic or unfocused Bringing these strands together the authors determine that in about a third of the schools expanded local democratic participation served as a strong lever for introducing systemic change focused on improved instruction Finally case studies of six actively restructuring schools illustrate how under decentralization the principals role is recast social support for change can grow and ideas and information from external sources are brought to bear on school change initiatives Few studies intertwine so completely extensive narratives and rigorous quantitative analyses The result is a complex picture of the Chicago reform that joins the politics of local control to school change This volume is intended for scholars in the fields of urban education public policy sociology of education anthropology of education and politics of education Comprehensive and descriptive it is an engaging text for graduate students and upper level undergraduates Local state and federal policymakers who are concerned with urban education will find new and insightful material The book should be on reading lists and in professional development seminars for school principals who want to garner community support for change and for school community leaders who want more responsive local institutions Finally educators administrators and activists in Chicago will appreciate this detailed analysis of the early years of reform

Confronting the Education Complex: Catalysts for Advancing Pre-K-12 Systems Matthew Weber, 2021-07-26 Transforming education for equity requires courageous innovation within the present system This book is intentionally broad so educational leaders at the state and local level can implement the catalysts for systemic change related to regional circumstances The desired outcomes from this book are 1 the increased use and investment in educational research 2

spending increased time on the issues that make a difference for student success and 3 rethinking the profile of skills and competencies for graduates These three far reaching objectives are embedded with consistent use of data analytics and systems for stability Select chapters afford education decision makers practical ideas in prioritizing their efforts From the pragmatic options presented leaders can determine relevance to local issues and plan for targeted enhancement The text identifies the major catalysts for systemic improvement presents a rationale why each is important and offers practical implementation solutions By prioritizing strategies and systems based on district needs short and long term benefits are realized Frameworks models and recommendations address the most significant issues facing decision makers in education

Equal Educational Opportunity United States. Congress. Senate. Select Committee on Equal Educational Opportunity,1970 *Hearings, Reports and Prints of the Senate Select Committee on Equal Educational Opportunity* United States. Congress. Senate. Select Committee on Equal Educational Opportunity,1972 *A Contest without Winners* Kate Phillippo,2019-03-19 Seeing the consequences of competitive school choice policy through students eyes While policymakers often justify school choice as a means to alleviate opportunity and achievement gaps an unanticipated effect is increased competition over access to coveted high performing schools In *A Contest without Winners* Kate Phillippo follows a diverse group of Chicago students through the processes of researching applying to and enrolling in public high school Throughout this journey students prove themselves powerful policy actors who carry out and redefine competitive choice Phillippo s work amplifies the voices of students rather than the parents educators public intellectuals and policymakers who so often inform school choice research and investigates how students interact with and emerge from competitive choice academically developmentally and civically Through students experiences she shows how competitive choice legitimates and exacerbates existing social inequalities collides with students developmental vulnerability to messages about their ability merit and potential and encourages young people s individualistic actions as they come to feel that they must earn their educational rights From urban infrastructure to income inequality to racial segregation Phillippo examines the factors that shape students policy enactment and interpretation as policymakers and educators ask students to compete for access to public resources With competitive choice even the winners the lucky few admitted to their dream schools don t outright win *A Contest without Winners* challenges meritocratic and market driven notions of opportunity creation for young people and raises critical questions about the goals we have for public schooling **Educating Our Children** ,1989 **Resources in Education** ,1995 **A Political Education** Elizabeth Todd-Breland,2018-10-03 In 2012 Chicago s school year began with the city s first teachers strike in a quarter century and ended with the largest mass closure of public schools in U S history On one side a union leader and veteran black woman educator drew upon organizing strategies from black and Latinx communities to demand increased school resources On the other side the mayor backed by the Obama administration argued that only corporate style education reform could set the struggling school system aright The stark differences in positions

resonated nationally challenging the long standing alliance between teachers unions and the Democratic Party Elizabeth Todd Breland recovers the hidden history underlying this battle She tells the story of black education reformers community based strategies to improve education beginning during the 1960s as support for desegregation transformed into community control experimental schooling models that pre dated charter schools and black teachers challenges to a newly assertive teachers union This book reveals how these strategies collided with the burgeoning neoliberal educational apparatus during the late twentieth century laying bare ruptures and enduring tensions between the politics of black achievement urban inequality and U S democracy
