Parenting Under Pressure Mothers And Fathers With Learning Difficulties:

Parenting Under Pressure Timothy A. Booth, Wendy Booth, 1994 Gives an insight into what it means to be a parent with learning difficulties By looking at the common threads in their lives the authors aim to produce personal accounts that are true to the experience of parents themselves

Parenting Under Pressure Timothy A. Booth, Wendy Booth, 1994 This book strives to break new ground by giving an insight into what it means to be a parent with learning difficulties Very little is known about the lives and struggles of these parents By looking at the common threads in their lives the authors aim to produce personal accounts that are true to the experience of parents themselves Using the life story approach to give pride of place to the views of mothers and fathers this study serves as a counterweight to research in which the parents as people make no appearance The authors try to harness their work to practical ends by drawing out its lessons for professionals As well as offering a parents view of parenting the book also presents a challenge to our thinking about the rights and responsibilities of people with learning difficulties

Growing up with Parents who have Learning Difficulties Tim Booth, Wendy Booth, 2005-08-10 Growing up with Parents who have Learning Difficulties uses a life story approach to present new evidence about how children from such families manage the transition to adulthood and about the longer term outcomes of such an upbringing It offers a view of parental competence as a social attribute rather than an individual skill assessing the implications for institutional policies and practices The authors address the notion of children having to parent their disabled parents and argue for a shift in emphasis from protecting children to supporting families This innovative book provides a fresh approach to a subject rife with prejudice and challenges us to think again about many taken for granted ideas about the process of parenting and the needs of children It also demonstrates the power of narrative research and its capacity for bringing alive people s experience in a way that enables us to better understand their lives
