Parenting in the Pandemic

Rebecca Lowenhaupt,George Theoharis,2021-05-01 In March of 2020 our daily lives were upended by the COVID pandemic and subsequent school closures With work and school shifting online a new and ongoing set of demands has been placed on parents as school moved to online virtual and hybrid models of learning Families need to balance professional responsibilities with parenting and supporting their children s education As education professors we find ourselves in a particular position as our expertise collides with the reality of schooling our own children in our homes during a global pandemic This book focuses on the experiences of education faculty who navigate this relationship as pandemic professionals and pandemic parents In this collection of personal essays we explore parenting in the pandemic among education professors Through our stories we share our perspectives on this moment of upheaval as we find ourselves confronting practical and impractical aspects of long held theories about what school could be seeing up close and personally the pedagogy our children endure online watching education policy go awry in our own living rooms and kitchens and bathrooms making high stakes decisions about our children s and other children s access to opportunity and trying to maintain our careers at the same time In this collision of personal and professional identities we find ourselves reflecting on fundamental questions about the purpose and design of schooling the value of our work as education professors and the precious relationships we hope to maintain with our children through this difficult time Praise for Parenting in the Pandemic Lowenhaupt and Theoharis have curated a magnificent collection of essays that captures the hopes fears tensions and possibilities of parenting in a time of crisis A gift to parents and educators everywhere as we continue to process and reflect on what the pandemic has taught us about what it means to educate others and perhaps through a renewed imagination our very own children Sonya Douglass Horsford Teachers College Columbia University In this powerful collection of essays we have a rare window into how the personal and professional worlds of academics collided during the COVID 19 pandemic What emerges from these reflections is an intimate portrait of the longstanding tensions in our lives as public intellectuals and parents that have long burned as embers but are now set ablaze by the public health economic and educational crisis we have lived through during the last year Reading these essays will help us to see questions of education policy and practice in a new more personal light Matthew Kraft Brown University

Parenting in Privilege Or Peril Pamela R. Bennett,Amy Lutz,Lakshmi Jayaram,2021-10-29 Is the American dream that exists for the middle class equally available to the working class Using extensive interviews with parents and a

variety of data sources this book examines how social contexts and culture affect parenting decisions By analyzing class differences in neighborhoods schools and networks as well as their relationship to mobility related parenting practices the authors demonstrate that cultural differences are no match for economic inequalities They show how middle class parents have access to social contexts characterized by security which gives rise to what the authors call strategic parenting a set of practices that allow adolescents to develop the qualities and skills they will use to go off to college and subsequently achieve the American dream Conversely the contexts of working class parents are characterized by precarity giving rise to defensive parenting an almost frantic use of harm mitigating interventions to protect adolescents from threats to both their well being and prospects for mobility This important book calls for a shift in public policy away from trying to change working class parents to improving the social contexts in which society asks them to raise the next generation Book Features An explanation for social class differences in educationally relevant mobility related parenting practices that contrasts with the dominant cultural explanation Research findings that are informed by a variety of data sources including interview data survey data social network data census data and crime statistics Two new parenting concepts strategic parenting and defensive parenting that capture how middle class and working class parents pursue social mobility for their children

Parenting to a Degree Laura T. Hamilton, 2016-04-29 Helicopter parents the kind that continue to hover even in college are one of the most ridiculed figures of twenty first century parenting criticized for creating entitled young adults who boomerang back home But do involved parents really damage their children and burden universities In this book sociologist Laura T Hamilton illuminates the lives of young women and their families to ask just what role parents play during the crucial college years Hamilton vividly captures the parenting approaches of mothers and fathers from all walks of life from a CFO for a Fortune 500 company to a waitress at a roadside diner As she shows parents are guided by different visions of the ideal college experience built around classed notions of women's work family plans and the ideal age to grow up Some are intensively involved and hold adulthood at bay to cultivate specific traits professional helicopters for instance help develop the skills and credentials that will advance their daughters careers while pink helicopters emphasize appearance charm and social ties in the hopes that women will secure a wealthy mate In sharp contrast bystander parents whose influence is often limited by economic concerns are relegated to the sidelines of their daughter's lives Finally paramedic parents who can come from a wide range of class backgrounds sit in the middle

intervening in emergencies but otherwise valuing self sufficiency above all Analyzing the effects of each of these approaches with clarity and depth Hamilton ultimately argues that successfully navigating many colleges and universities without involved parents is nearly impossible and that schools themselves are increasingly dependent on active parents for a wide array of tasks with intended and unintended consequences Altogether Parenting to a Degree offers an incisive look into the new and sometimes problematic relationship between students parents and universities
