Parenting Principles And Politics Of Parenthood:

Parenting Sidney Cornelia Callahan, 1974 **Parenting** Paul David Tripp, 2016-09-14 Winner of the ECPA Book of the Year Award for Christian Living What is your calling as a parent In the midst of folding laundry coordinating carpool schedules and breaking up fights many parents get lost Feeling pressure to do everything right and raise up good children it is easy to lose sight of our ultimate purpose as parents in the quest for practical tips and guaranteed formulas In this life giving book Paul Tripp offers parents much more than a to do list Instead he presents us with a big picture view of God's plan for us as parents Outlining fourteen foundational principles centered on the gospel he shows that we need more than the latest parenting strategy or list of techniques Rather we need the rescuing grace of God's grace that has the power to shape how we view everything we do as parents Freed from the burden of trying to manufacture life change in our children's hearts we can embrace a grand perspective of parenting overflowing with vision purpose and joy **Parenting Matters** National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Supporting the Parents of Young Children, 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family which includes all primary caregivers are at the foundation of children's well-being and healthy development From birth children are learning and rely on parents and the other caregivers in their lives to protect and care for them The impact of parents may never be greater than during the earliest years of life when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment Parents help children build and refine their knowledge and skills charting a trajectory for their health and well-being during childhood and beyond The experience of parenting also impacts parents themselves For instance parenting can enrich and give focus to parents' lives generate stress or calm and create any number of emotions including feelings of happiness sadness fulfillment and anger Parenting of young children today takes place in the context of significant ongoing developments These include a rapidly growing body of science on early childhood increases in funding for programs and services for families changing demographics of the U.S. population and greater diversity of family structure Additionally parenting is increasingly being shaped by technology and increased access to information about parenting Parenting Matters identifies parenting knowledge attitudes and practices associated with positive developmental outcomes in children ages 0-8 universal preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge attitudes and practices and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services This report makes recommendations directed at an array of stakeholders for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice It is meant to serve as a roadmap for the future of parenting policy research and practice in the United States **The Moral**

Foundations of Parenthood Joseph Millum, 2018 Most people believe that parents have moral rights and responsibilities regarding their children These rights and responsibilities undergird the nuclear family and are essential to the flourishing of its members However their basis and contents are hotly contested Do a child's genetic parents have a right to parent her The importance of genetic ties is affirmed by many people's gut responses everyday talk and many court decisions but the moral justification for tying parenthood rights to genetics is unclear Parents are routinely permitted to make far reaching decisions about their children's medical care education religious practice and even how to punish them When can parental rights be limited by the interests of the child or society Matters are no more settled when it comes to parental responsibilities It is commonly thought that if a man conceives a child through voluntary sexual intercourse he acquires parental responsibilities even if he took every precaution against conception On the other hand sperm donors are widely though not universally thought to have no responsibilities towards their progeny What is the basis for these disparate judgments Parents are expected to do a lot for their children as they raise them But there are surely limits Sometimes parents have to balance the needs of multiple family members or just want to have time for themselves What is the extent of their parental responsibilities In *The Moral Foundations of Parenthood* Joseph Millum provides a philosophical account of moral parenthood He explains how parental rights and responsibilities are acquired what those rights and responsibilities consist in and how parents should go about making decisions on behalf of their children In doing so he provides a set of frameworks to help solve pressing ethical dilemmas relating to parents and children

Principles of Effective Parenting Joan E. Grusec, 2019-07-04 Grounded in pioneering research this text examines the parenting strategies that help children and adolescents develop into productive happy members of society Rather than advocating one best style of parent child interaction the author identifies five domains of socialization and shows that different ways of responding to children are appropriate for each one Chapters on each domain combine theory empirical findings cross cultural considerations and real world applications Personal recollections from diverse young adults illustrate how parents helped impart important life lessons Learning exercises present examples of children's behavior and invite the reader to select the most effective parenting action from several possible options From publisher's description

Permissible Progeny? Sarah Hannan,Samantha Brennan,Richard Vernon,2015-09-03 This volume contributes to the growing literature on the morality of procreation and parenting About half of the chapters take up questions about the morality of bringing children into existence They discuss the following questions Is it wrong to create human life Is there a connection between the problem of evil and the morality of procreation Could there be a duty to procreate How do the environmental harms imposed by procreation affect its moral status Given these costs is the value of establishing genetic ties ever significant enough to render procreation morally permissible And how should government respond to peoples motives for procreating The other half of the volume considers moral and political questions about adoption and parenting One chapter considers whether the choice to become a parent can be rational The two following chapters take up the regulation of adoption focusing on whether the special burdens placed on adoptive parents as compared to biological parents can be morally justified The book concludes by considering how we should conceive of adequacy standards in parenting and what resources we owe to children This collection builds on existing literature by advancing new arguments and novel perspectives on existing debates It also raises new issues deserving of our attention As a whole it is sure to generate further philosophical debate on pressing and rich questions surrounding the bearing and rearing of children

Conceptions of Parenthood Michael W. Austin,2016-05-23 Our parents often

have a significant impact on the content of our beliefs the values we hold and the goals we pursue and becoming a parent can also have a similar impact on our lives In *Conceptions of Parenthood* Michael Austin provides a rigorous and accessible philosophical analysis of the numerous and distinct conceptions of parenthood Issues considered are the nature and justification of parental rights the sources of parental obligations the value of autonomy and the moral obligations and tensions present within interpersonal relationships Austin rejects the proprietarian best interests of the child and biological conceptions of parenthood as failing to generate parental rights and obligations but considers more sympathetically the custodial relationship consent and causal conceptions of parenthood and ultimately defends a stewardship conception Finally Austin explores the stewardship view for practical and moral questions related to family life and social policy regarding the family such as the education of children the religious upbringing of children and state licensing of parents

Worried All the Time David Anderegg, 2010-06-15 A much needed book for parents about themselves In the tradition of Dr Benjamin Spock who in 1946 revolutionized parenting with the famous opening words of his classic child rearing guide You know more than you think you know child and family therapist David Anderegg reminds contemporary parents that parenting is not rocket science It s not even Chem 101 So why do those of us with children worry so much Whether they re thinking about school violence or getting a child into the right college American moms and dads are a pretty worried crowd Even though most American families are safer and healthier today than at any other time in our history studies show that parental worrying has in recent years reached an all time high In *Worried All the Time* Dr Anderegg draws on social science research and his more than twenty

years experience as a therapist treating both parents and their children to clarify facts and fantasies about kids lives today and the key issues that preoccupy parents In the process he offers a comforting and useful message Parents are suffering needlessly and there are things they can do to take the edge off and focus on what their children really need In *Worried All the Time* Dr Anderegg identifies some of the causes of worry in contemporary American families including fewer children exaggerated fear of competition and overblown media reports of children at risk Anderegg calls this the tabloidization of children and critiques the fashion for media portrayals of children in crisis One at a time he takes on the hot button issues of our times the use of day care and nannies overexposure to media school violence overscheduling experimentation with drugs and looks a little closer to see the facts and the fantasies beneath the hysteria Calling himself a crisis agnostic Anderegg persuasively argues that needless worry has negative consequences for families and for our culture as a whole The cardinal rules of good parenting moderation empathy and temperamental accommodation with one s child are simple he says and are not likely to be improved upon by the latest scientific findings Anderegg helps parents to understand the difference between wise vigilance and potentially crippling anxiety and to gain the confidence to trust their own common sense Parental Responsibility, Young Children and Healthcare Law Jo Bridgeman,2007-04-19 This book provides a comprehensive examination of the legal regulation of the provision of healthcare to young children in England and Wales A critical analysis is given on the law governing the provision of healthcare to young and dependent children identifying an understanding of the child as vulnerable and in need of protection including from his or her own parents The argument is made for a conceptual framework of relational responsibilities which would ensure that consideration is given to the needs of the child as an individual to the experiences of parents gained as they care for their child and that the wider context such as attitudes towards disability public health issues or the support and resources available is examined This book makes an important contribution to understanding the law regulating the provision of healthcare to young and dependent children and to the development of a discourse of responsibility **We Live for the We** Dani McClain,2019-04-02 A warm wise and urgent guide to parenting in uncertain times from a longtime reporter on race reproductive health and politics In *We Live for the We* first time mother Dani McClain sets out to understand how to raise her daughter in what she as a black woman knows to be an unjust even hostile society Black women are more likely to die during pregnancy or birth than any other race black mothers must stand before television cameras telling the world that their slain children were human beings What then is the best way to keep fear at bay and raise a child so she lives with dignity and joy McClain spoke with mothers on the frontlines of movements for social political and cultural change who are grappling with the same questions Following a child s development from infancy to the teenage years *We Live for the We* touches on everything from the importance of creativity to building a mutually supportive community to navigating one s relationship with power and authority It is an essential handbook to help us imagine the society we build for the next generation **Engaged Fatherhood for Men, Families and**

Gender Equality Marc Grau Grau, Mireia las Heras Maestro, Hannah Riley Bowles, 2021-09-07 This aim of this open access book is to launch an international cross disciplinary conversation on fatherhood engagement By integrating perspective from three sectors Health Social Policy and Work in Organizations the book offers a novel perspective on the benefits of engaged fatherhood for men for families and for gender equality The chapters are crafted to engaged broad audiences including policy makers and organizational leaders healthcare practitioners and fellow scholars as well as families and their loved ones
