Parenting Matters National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Supporting the Parents of Young Children, 2016-11-21 Decades of research have demonstrated that the parent child dyad and the environment of the family which includes all primary caregivers are at the foundation of children s well being and healthy development From birth children are learning and rely on parents and the other caregivers in their lives to protect and care for them The impact of parents may never be greater than during the earliest years of life when a child s brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment Parents help children build and refine their knowledge and skills charting a trajectory for their health and well being during childhood and beyond The experience of parenting also impacts parents themselves For instance parenting can enrich and give focus to parents lives generate stress or calm and create any number of emotions including feelings of happiness sadness fulfillment and anger Parenting of young children today takes place in the context of significant ongoing developments These include a rapidly growing body of science on early childhood increases in funding for programs and services for families changing demographics of the U S population and greater diversity of family structure Additionally parenting is increasingly being shaped by technology and increased access to information about parenting *Parenting Matters* identifies parenting knowledge attitudes and practices associated with positive developmental outcomes in children ages 0 8 universal preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge attitudes and practices and barriers to and facilitators for parents use of practices that lead to healthy child outcomes as well as their participation in effective programs and services This report makes recommendations directed at an array of stakeholders for promoting the wide scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice It is meant to serve as a roadmap for the future of parenting policy research and practice in the United States

Why Gender Matters Leonard Sax, M.D., Ph.D., 2007-12-18 Are boys and girls really that different Twenty years ago doctors and researchers didn t think so Back then most experts believed that differences in how girls and boys behave are mainly due to differences in how they were treated by their parents teachers and friends It s hard to cling to that belief today An avalanche of research over the past twenty years has shown that sex differences are more significant and profound than anybody guessed Sex differences are real biologically programmed and important to how children are raised disciplined and educated In *Why Gender Matters* psychologist and family physician Dr

Leonard Sax leads parents through the mystifying world of gender differences by explaining the biologically different ways in which children think feel and act He addresses a host of issues including discipline learning risk taking aggression sex and drugs and shows how boys and girls react in predictable ways to different situations For example girls are born with more sensitive hearing than boys and those differences increase as kids grow up So when a grown man speaks to a girl in what he thinks is a normal voice she may hear it as yelling Conversely boys who appear to be inattentive in class may just be sitting too far away to hear the teacher especially if the teacher is female Likewise negative emotions are seated in an ancient structure of the brain called the amygdala Girls develop an early connection between this area and the cerebral cortex enabling them to talk about their feelings In boys these links develop later So if you ask a troubled adolescent boy to tell you what his feelings are he often literally cannot say Dr Sax offers fresh approaches to disciplining children as well as gender specific ways to help girls and boys avoid drugs and early sexual activity He wants parents to understand and work with hardwired differences in children but he also encourages them to push beyond gender based stereotypes A leading proponent of single sex education Dr Sax points out specific instances where keeping boys and girls separate in the classroom has yielded striking educational social and interpersonal benefits Despite the view of many educators and experts on child rearing that sex differences should be ignored or overcome parents and teachers would do better to recognize understand and make use of the biological differences that make a girl a girl and a boy a boy

Praise, Motivation, and the Child Gill Robins, 2012 What happens when children are praised Read this book listen to what children really think and challenge your own assumptions Features include Case studies and children s work samples Points for reflection which could be used for CPD sessions Appendices containing behaviour policy samples Pupil teacher and parental perspectives

progress and the adults who provide for the care and the education of young children bear a great responsibility for their health development and learning. Despite the fact that they share the same objective to nurture young children and secure their future success, the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive and ultimately improve outcomes for children.
