## **Parents Their Children And Schools:**

Parents, Their Children, And Schools James S. Coleman, 2018-10-08 This book examines the resources available to parents and the actions parents can take to further their children's education. It is the first study of the subject based on major survey data drawing from the National Education Longitudinal Study of 1988, a national survey of 26,000 eighth graders, their parents, teachers, and school administrators. The authors explore several important debates including the extent to which parental involvement can mitigate the constraints of poverty for minorities and disadvantaged students, school choice, and equality of educational opportunity, and the effects that school-sponsored activities involving parents have on educational performance. Parental involvement with children at home, in school, and in the community is one of the most important factors in educational success. Yet we know very little about the most effective approaches to parental intervention. Moreover, not all parents have the same resources or opportunities to act on the educational expectations they have for their children. This book examines the resources available to parents and the actions parents can take to further their children's education. It is the first study of the subject based on major survey data drawing from the National Education Longitudinal Study of 1988, a national survey of 26,000 eighth graders, their parents, teachers, and school administrators. The authors explore several important debates including the extent to which parental involvement can mitigate the constraints of poverty for minorities and disadvantaged students, school choice, and equality of educational opportunity, and the effects that school-sponsored activities involving parents have on educational performance. Certain to change the thinking of educators and policymakers, this book is essential reading for scholars and parents as well. **Parents and Schools** William W.

Cutler, 2000-06-15 Who holds ultimate authority for the education of America's children: teachers or parents? Although the relationship between home and school has changed dramatically over the decades, William Cutler's fascinating history argues that it has always been a political one, and his book uncovers for the first time how and why the balance of power has shifted over time. Starting with parental dominance in the mid-nineteenth century, Cutler chronicles how schools, growing bureaucratization, and professionalization allowed educators to gain increasing control over the schooling and lives of the children they taught. Central to his story is the role of parent-teacher associations, which helped transform an adversarial relationship into a collaborative one. Yet parents have also been controlled by educators through PTAs, leading to the perception that they are company unions. Cutler shows how, in the 1920s and 1930s, schools expanded their responsibility for children's well-being outside the classroom. These efforts sowed the seeds for later conflict as schools came to be held accountable for solving society's problems. Finally, he brings the reader into recent decades in which a breakdown of trust, racial tension, and parents' rights have taken the story full circle, with parents and schools once again at odds. Cutler's book is an invaluable guide to understanding how parent-teacher cooperation, which is essential for our children's educational success, might be achieved. **Parents and Schools** Angela Carrasquillo, Clement B. McGinnis, 2020-01-22 A 2020 AESA Critics Choice Book Award winner The rise of high stakes testing in New York and across the nation has narrowed and simplified what is taught while becoming central to the effort to privatize public schools

However it and similar reform efforts have met resistance with New York as the exemplar for how to repel standardized testing and invasive data collection such as inBloom In New York the two parent teacher organizations that have been most effective are Long Island Opt Out and New York State Allies for Public Education Over the last four years they and other groups have focused on having parents refuse to submit their children to the testing regime arguing that if students don't take the tests the results aren't usable The opt out movement has been so successful that 20% of students statewide and 50% of students on Long Island refused to take tests In Opting Out two parent leaders of the opt out movement Jeanette Deutermann and Lisa Rudley tell why and how they became activists in the two organizations The story of parents students and teachers resisting not only high stakes testing but also privatization and other corporate reforms parallels the rise of teachers across the country going on strike to demand increases in school funding and teacher salaries Both the success of the opt out movement and teacher strikes reflect the rise of grassroots organizing using social media to influence policy makers at the local state and national levels Perfect for courses such as The Politics Of Education Education Policy Education Reform Community Organizing Education Evaluation Education Reform Parents And Education

**Supporting Children of Incarcerated Parents in Schools** Whitney Q. Hollins, 2021-11 Drawing on qualitative research conducted with young people in New York this volume highlights the unique experiences of children of incarcerated parents COIP and counters deficit based narratives to consider how young people's voices can inform and improve educational support services Supporting Children of Incarcerated Parents in Schools combines the author's original research and personal experiences with an analysis of existing scholarship to provide unique insight into how COIP experience schooling in the United States With a focus on the benefits of qualitative research for providing a more nuanced portrayal of these children and their experiences the text foregrounds youth voices and emphasizes the resilience maturity and compassion which these young people demonstrate By calling attention to the challenges that COIP face in and out of school and also addressing associated issues around race and racism the book offers large and small scale changes that educators and other allies can use to better support children of incarcerated parents This volume will be of interest to scholars and researchers interested in the sociology of education race and urban education and the impacts of parental incarceration specifically It will also be of benefit to educators and school leaders who are supporting young people affected by these issues

The Public School Advantage Christopher A. Lubienski, Sarah Theule Lubienski, 2013-11-07 Nearly the whole of America's partisan politics centers on a single question Can markets solve our social problems And for years this question has played out ferociously in the debates about how we should educate our children From the growth of vouchers and charter schools to the implementation of No Child Left Behind

policy makers have increasingly turned to market based models to help improve our schools believing that private institutions because they are competitively driven are better than public ones With The Public School Advantage Christopher A and Sarah Theule Lubienski offer powerful evidence to undercut this belief showing that public schools in fact outperform private ones For decades research showing that students at private schools perform better than students at public ones has been used to promote the benefits of the private sector in education including vouchers and charter schools but much of these data are now nearly half a century old Drawing on two recent large scale and nationally representative databases the Lubienskis show that any benefit seen in private school performance now is more than explained by demographics Private schools have higher scores not because they are better institutions but because their students largely come from more privileged backgrounds that offer greater educational support After correcting for demographics the Lubienskis go on to show that gains in student achievement at public schools are at least as great and often greater than those at private ones Even more surprising they show that the very mechanism that market based reformers champion autonomy may be the crucial factor that prevents private schools from performing better Alternatively those practices that these reformers castigate such as teacher certification and professional reforms of curriculum and instruction turn out to have a significant effect on school improvement Despite our politics we all agree on the fundamental fact education deserves our utmost care The Public School Advantage offers exactly that By examining schools within the diversity of populations in which they actually operate it provides not ideologies but facts And the facts say it clearly education is better off when provided for the public by the public
