The book is divided by country into 22 chapters with each chapter containing an introductory essay on the music of the region, a catalog of art songs for that country and a list of publishers. Some chapters include information on additional sources. Gottlieb, 2025-01-09 *Women on the Right* explores the complex relationships between conservative and right wing politics, social action and women actors from the late 19th to the late 20th century. Edited by Clarisse Berthezène, Laura Lee Downs and Julie V. Gottlieb, each essay examines the spectrum of women's engagement with right wing politics from centrist and progressive conservatism groups to authoritarianism and fascism. This book uses local and national case studies to explore a wide range of women's social and political mobilizations. Using a bottom up perspective, it stays focused on the ideas, ambitions and practices of the actors themselves. Key points of comparison include the very different roles played by religious institutions and associations, the broader regional and national contexts and the dynamics that favour or not the eventual construction of welfare states. *Women on the Right* consistently adopts a multinational and multidimensional approach by bringing together a team of expert contributors to engage in a discussion of the comparative and transnational features of right wing women's political thought and practice. The result is a unique contribution to the historical understanding of women's participation in and ideas about conservative activism.

Saler, 2001-05-24 The Avant Garde in Interwar England addresses modernism's ties to tradition commerce nationalism and spirituality through an analysis of the assimilation of visual modernism in England between 1910 and 1939 During this period a debate raged across the nation concerning the purpose of art in society On one side were the aesthetic formalists led by members of London's Bloomsbury Group who thought art was autonomous from everyday life On the other were England's so called medieval modernists many of them from the provincial North who maintained that art had direct social functions and moral consequences As Michael T Saler demonstrates in this fascinating volume the heated exchange between these two camps would ultimately set the terms for how modern art was perceived by the British public Histories of English modernism have usually emphasized the seminal role played by the Bloomsbury Group in introducing celebrating and defining modernism but Saler's study instead argues that during the watershed years between the World Wars modern art was most often understood in the terms laid out by the medieval modernists As the name implies these artists and intellectuals closely associated modernism with the art of the Middle Ages building on the ideas of John Ruskin William Morris and other nineteenth century romantic medievalists In their view modernism was a spiritual national and economic movement a new and different artistic sensibility that was destined to revitalize England's culture as well as its commercial exports when applied to advertising and industrial design This book then concerns the busy intersection of art trade and national identity in the early decades of twentieth century England Specifically it explores the life and work of Frank Pick managing director of the London Underground whose famous patronage of modern artists architects and designers was guided by a desire to unite nineteenth century arts and crafts with twentieth century industry and mass culture As one of the foremost adherents of medieval modernism Pick converted London's primary public transportation system into the culminating project of the arts and crafts movement But how should today's readers regard Pick's achievement What can we say of the legacy of this visionary patron who sought to transform the whole of sprawling London into a post impressionist work of art And was medieval modernism itself a movement of pioneers or dreamers In its bold engagement with such questions The Avant Garde in Interwar England will surely appeal to students of modernism twentieth century art the cultural history of England and urban history     **Consumer Engineering, 1920s-1970s** Jan Logemann, Gary Cross, Ingo Köhler, 2019-05-29 In the middle of the twentieth century a new class of

marketing expert emerged beyond the familiar ad men of Madison Avenue Working as commercial designers consumer psychologists sales managers and market researchers these professionals were self defined consumer engineers and their rise heralded a new era of marketing To what extent did these efforts to engineer consumers shape consumption practices And to what extent was the phenomenon itself a product of broader social and cultural forces This collection considers consumer engineering in the context of the longer history of transatlantic marketing Contributors offer case studies on the roles of individual consumer engineers on both sides of the Atlantic the impact of such marketing practices on European economies during World War II and after and the conflicted relationship between consumer activists and the ideas of consumer engineering By connecting consumer engineering to a web of social processes in the twentieth century this volume contributes to a reassessment of consumer history more broadly
