Rediscovering a Ministry of Health Helen A. Wordsworth, 2015-02-20 It is not possible to look at the ministry of Jesus without noticing his concern for the poor and the sick He not only had a huge sense of compassion for people who were suffering but sent people out to heal the sick and tell them the Kingdom of God is near them This concern for health and wholeness has inspired Christians through the ages as they have cared for the sick founded hospitals and been at the forefront of public health movements In the nineteenth century the church was one of the major influencers in initiating ministries of health both through the work of its own deaconesses and the involvement of its members as they felt a sense of vocation to nursing and public health work Florence Nightingale was a theologian and statistician as well as being a nurse leader However with the advent of state health provision and private health insurance schemes the role of the local church in health has diminished This book describes a simple way for churches to re engage with health ministry and presents evidence that underlines not only a Biblical authenticity for its place in the mission of a local church but also a compelling rationale for its implementation It will be of interest to church leaders and all those involved in health care

A Sacred Covenant Mary Elizabeth O'Brien, 2008. *A Sacred Covenant: The Spiritual Ministry of Nursing* focuses on the nurse's personal spiritual needs. Grounded in biblical passages taken from both Old and New Testament scripture, it provides a broad spiritual foundation. Anecdotes from practicing nurses are woven throughout each chapter to illustrate the spiritual themes.

Faith Community Nursing P. Ann Solari-Twadell, Deborah Jean Ziebarth, 2019-08-31. A multi-authored book with editors and authors who are leaders in Faith Community Nursing (FCN) that aims to address contemporary issues in faith-based, whole-person, community-based health, offering cost-effective, accessible, patient-centered care along the patient continuum while challenging contemporary health policy to include more health promotion services. Twenty-five chapters take the reader from a foundational understanding of this historic grass roots movement to the present-day international specialty nursing practice. The book is structured into five sections that describe both the historical advancement of the Faith Community Nursing, its current implications, and future challenges, taking into account the perspectives of the pastor, congregation, nurse, health care system, and public health, national and international organizations. The benefits of this book are that it is intended for a mixed audience, including lay, academic, medical professionals, or health care executives. By changing the mindset of the reader to see the nurse as more than providing illness care, the faith community as more than a place one goes to on Sunday, and health as more than physical, creative alternatives for promoting health emerge through Faith Community Nursing.
