Regulation and Regulators after Global Financial Crises Aleksandra Jordanoska,2024-12-31 This book provides an original theoretically and empirically grounded analysis of regulatory enforcement activism in post crisis

periods and the ensuing regulatory interactions It critically addresses the more regulation enforcement agenda relating to financial misconduct in the aftermath of the 2008 financial crisis showing how misconduct was constructed through the enforcement policies and practices of the powerful UK financial conduct regulator and its interactions with the subjects of enforcement proceedings and their legal representatives during a tumultuous time in the financial markets Drawing from interviews with regulators professional intermediaries and markets participants documentary analysis of enforcement decisions and speeches and observations the volume adopts an interdisciplinary approach grounded in social constructivist perspectives on compliance and deviance regulation theory and socio legal research Through a multi dimensional analytical framework of regulatory enforcement activism that links shifts in regulatory policymaking experimentations with legal powers in information gathering legal and extra legal penalties and individual accountability and the use of enforcement tools in micro level interactions the book documents a more interventionist and punitive post crisis enforcement agenda The findings challenge current thinking in the scandal and reform literature The work argues that despite the increased focus on enforcement it is not necessarily the case that the power has tilted more towards the regulator This fine grained socio legal enquiry makes innovative and timely theoretical contributions to our understanding of the limitations of regulatory activism and regulatory control regulatory relationships the governance of financial markets and broader thinking on regulating corporations and the individuals within them It will appeal to academics researchers regulators and policymakers working in regulation across law criminology sociology and politics

Corporations and International Lawmaking Stephen Tully, 2007 The classical model of international lawmaking posits governments as exclusively authoritative actors However commercially oriented entities have long been protagonists within the prevailing international legal order concluding contracts and resolving disputes with governments Is the international legal personality of corporations undergoing further qualitative transformations Corporations influence the State practice constitutive of custom and create refashion or challenge normative rules The corporate willingness to fill legal lacunae where governments do not exercise their full regulatory responsibility is also observable through resort to alternative legal mechanisms Corporations moreover contribute directly to treaty negotiations and occupy crucial roles during subsequent implementation Indeed an analysis of the access conditions and participatory modalities for non State actors could support a right to participate under common international procedural law Their substantive contributions are also evident when corporations participate in enforcing international law against governments through national courts diplomatic protection including the WTO and arbitration including NAFTA However the practice of intergovernmental organizations reveals several challenges including managing corporate interaction with developing country governments and other non State actors Acknowledging corporate contributions also has important implications for national regulatory autonomy the ability of governments to mediate contested policy issues the democratic legitimacy of the contemporary lawmaking process and an understanding of consent as the underlying basis for
