PARLE '89 - Parallel Architectures and Languages Europe Eddy Odijk, Martin Rem, 1989 Since the first PARLE conference PARLE 87 attracted more than 300 participants it was considered a useful and successful forum and encouraged the organization of this second issue known as PARLE 89 The initiative for these conferences was taken by project 415 of ESPRIT the European Strategic Programme for Research and Development in Information Technology of the Commission of the European Communities Their scope covers central themes in the area of parallel architectures and languages including such topics as concurrent object oriented logic and functional programming MIMD dataflow inference and reduction machines design and verification of parallel systems VLSI WSI and RISC architectures performance evaluation memory management systolic arrays applications and special purpose architectures The four invited lectures present the state of the art and advanced developments in major research areas related to the topics of the conference Of the more than 150 submitted papers 45 were selected for presentation Furthermore the program of PARLE 89 comprises presentations on the subprojects which together constitute ESPRIT project 415 Parallel architectures based on a variety of programming styles object oriented logic functional dataflow are represented in these overviews

**PARLE '91. Parallel Architectures and Languages Europe** Emile H. L. Aarts, Jan Leeuwen, 1991 **PARLE'89: Parallel architectures** Eddy Odijk, M. Rem, Jean-Claude Syre, 1989 *Proceedings Parallel Computing* *Parallel Computing 89* David J. Evans, Gerhard Robert Joubert, F. J. Peters, 1990 This book is the result of the first conference organized under the auspices of the Parallel Computing Society the only independent international forum where researchers manufacturers and users of parallel computers can exchange expertise and experience in the development and use of all types of systems The emphasis is on applications of parallel computing In addition to papers discussing the development of new algorithms for and applications of various types of parallel computers an overview of the newest developments regarding parallel computer hardware and software is given

Programming Language Implementation and Logic Programming Jan Małuszyński, Martin Wirsing, 1991-08-14 This volume contains the papers which have been accepted for presentation at the Third International Symposium on Programming Language Implementation and Logic Programming PLILP 91 held in Passau Germany August 26 28 1991 The aim of the symposium was to explore new declarative concepts methods and techniques relevant for the implementation of all kinds of programming languages whether algorithmic or declarative ones The intention was to gather researchers from the fields of algorithmic programming languages as well as logic functional and object oriented programming This volume contains the two invited talks given at the symposium by H Ait Kaci and D B MacQueen 32 selected papers and abstracts of several system demonstrations The proceedings of PLILP 88 and PLILP 90 are available as Lecture Notes in Computer Science Volumes 348 and 456 *Formal Methods for Mobile Computing* Marco Bernardo, Alessandro Bogliolo, 2005-04-25 This book presents 8 tutorial survey papers by leading researchers who lectured at the 5th International School on Formal

Methods for the Design of Computer Communication and Software Systems SFM 2005 held in Bertinoro Italy in April 2005  
 SFM 2005 was devoted to formal methods and tools for the design of mobile systems and mobile communication infrastructures The 8 lectures are organized into topical sections on models and languages scalability and performance dynamic power management and middleware support      **ECOOP 2002 - Object-Oriented Programming** Boris Magnusson,2002-06-03 This book constitutes the refereed proceedings of the 16th European Conference on Object Oriented Programming ECOOP 2002 held in Malaga Spain in June 2002 The 24 revised full papers presented together with one full invited paper were carefully reviewed and selected from 96 submissions The book offers topical sections on aspect oriented software development Java virtual machines distributed systems patterns and architectures languages optimization theory and formal techniques and miscellaneous      **Programming Language Implementation and Logic Programming** Pierre Deransart,Jan Maluszynski,1990-08-08 This volume consists of the papers accepted for presentation at the second international workshop on Programming Language Implementation and Logic Programming PLILP 90 held in Linköping Sweden August 20-22 1990 The aim of the workshop was to identify concepts and techniques used both in implementation of programming languages regardless of the underlying programming paradigm and in logic programming The intention was to bring together researchers working in these fields The volume includes 26 selected papers falling into two categories Papers in the first category present certain ideas from the point of view of a particular class of programming languages or even a particular language The ideas presented seem to be applicable in other classes of languages Papers in the second category directly address the problem of integration of various programming paradigms The proceedings of the predecessor workshop PLILP 88 held in Orleans France May 16-18 1988 are available as Lecture Notes in Computer Science Vol 348

**Transputers and Parallel Applications** John Hulskamp,David Jones,1992-11 Presents the proceedings of a Transputer and OCCAM User Group Conference held in Melbourne in November 1992 discussing recent developments in the field of transputers and parallel applications      *Coordination of Complex Sociotechnical Systems* Stefano Mariani,2016-11-24 The book discusses the main issues of coordination in complex sociotechnical systems covering distributed self organising and pervasive systems A chemistry inspired model of coordination a situated architecture and coordination language and a cognitive model of interaction are the ingredients of the Molecules of Knowledge MoK model for self organisation of knowledge presented in this book The MoK technology is discussed along with some case studies in the fields of collaborative systems academic research and citizen journalism The target audience includes researchers and practitioners in the field of complex software systems engineering The book is also appropriate for graduate and late undergraduate students in computer science and engineering      **Proceedings of the 1992 ACM Conference on LISP and Functional Programming** Association for Computing Machinery,1992      **Parallel Language and Compiler Research in Japan** Lubomir Bic,Alexandru Nicolau,Mitsuhisa Sato,2012-12-06 Parallel Language and Compiler Research in Japan offers the

international community an opportunity to learn in depth about key Japanese research efforts in the particular software domains of parallel programming and parallelizing compilers These are important topics that strongly bear on the effectiveness and affordability of high performance computing systems The chapters of this book convey a comprehensive and current depiction of leading edge research efforts in Japan that focus on parallel software design development and optimization that could be obtained only through direct and personal interaction with the researchers themselves

*LOGLAN '88 - Report on the Programming Language* Antoni Kreczmar, Andrzej Salwicki, Marek Warpechowski, 1990-03-07  
LOGLAN 88 belongs to the family of object oriented programming languages It embraces all important known tools and characteristics of OOP i e classes objects inheritance coroutine sequencing but it does not get rid of traditional imperative programming primitive types do not need to be objects records static arrays subtypes and other similar type constructs are admitted LOGLAN has non traditional memory model which accepts programmed deallocation but avoids dangling reference The LOGLAN semantic model provides multi level inheritance which properly cooperates with module nesting Parallelism in LOGLAN has an object oriented nature Processes are treated like objects of classes and communication between processes is provided by alien calls similar to remote calls     SIL - a Simulation Language Niels Houbak, 1990-04-25     **Languages and Compilers for Parallel Computing** Utpal Banerjee, David Gelernter, Alex Nicolau, David A. Padua, 1992 This volume contains the proceedings of the Fourth Workshop on Languages and Compilers for Parallel Computing held in Santa Clara California in August 1991 The purpose of the workshop held every year since 1988 is to bring together the leading researchers on parallel programming language design and compilation techniques for parallel computers The papers in this book cover several important topics including 1 languages and structures to represent programs internally in the compiler 2 techniques to analyze and manipulate sequential loops in order to generate a parallel version 3 techniques to detect and extract fine grain parallelism 4 scheduling and memory management issues in automatically generated parallel programs 5 parallel programming language designs and 6 compilation of explicitly parallel programs Together the papers give a good overview of the research projects underway in 1991 in this field     FGCS '92, 1992     **Parallel Symbolic Computing: Languages, Systems, and Applications** Robert H. Halstead, Takayasu Ito, 1993-11-03 Parallel and distributed computing are becoming increasingly important as cost effective ways to achieve high computational performance Symbolic computations are notable for their use of irregular data structures and hence parallel symbolic computing has its own distinctive set of technical challenges The papers in this book are based on presentations made at a workshop at MIT in October 1992 They present results in a wide range of areas including speculative computation scheduling techniques program development tools and environments programming languages and systems models of concurrency and distribution parallel computer architecture and symbolic applications     Parallel Execution of Logic Programs Anthony Beaumont, 1991-12-11 Logic programming refers to execution of programs written in Horn logic Among the advantages of this style of programming are its simple

declarative and procedural semantics high expressive power and inherent nondeterminism The papers included in this volume were presented at the Workshop on Parallel Logic Programming held in Paris on June 24 1991 as part of the 8th International Conference on Logic Programming The papers represent the state of the art in parallel logic programming and report the current research in this area including many new results The three essential issues in parallel execution of logic programs which the papers address are Which forms of parallelism or parallelism and parallelism stream parallelism data parallelism etc will be exploited Will parallelism be explicitly programmed by programmers or will it be exploited implicitly without their help Which target parallel architecture will the logic programs run on

**Concurrency** Akinori Yonezawa, Takayasu Itô, 1991 This volume is a collection of papers on topics focused around concurrency based on research work presented at the UK Japan Workshop held at Wadham College Oxford September 25-27 1989 The volume is organized into four parts Papers on theoretical aspects of concurrency which reflect strong research activities in the UK including theories on CCS and temporal logic RDL Papers on object orientation and concurrent languages which reflect major research activities on concurrency in Japan The languages presented include extensions of C Prolog and Lisp as well as object based concurrent languages Papers on parallel architectures and VLSI logic including a rewrite rule machine a graph rewriting machine and a dataflow architecture An overview of the workshop including the abstracts of the talks and the list of participants The appendix gives a brief report of the first UK Japan Workshop in Computer Science held at Sendai Japan July 6-9 1987
