Parliaments And Citizens In Western Europe:

Parliaments and Citizens in Western Europe Philip Norton, 2020-07-24 Citizens elect the parliament but what contract takes place between citizen and parliament in between elections The authors assess the extent and nature of that contact To what extent are members of parliament accessible to the ordinary citizen And what are the implications for the legislature Can there be too much or too little contact

Parliaments and Citizens in Western Europe Philip Norton, 2002 The relationship between legislatures and executives in national parliaments is well documented That between legislatures and citizens is relatively neglected These writings on that relationship in a number of European states fill the gap

Parliaments and Citizens Cristina Leston-Bandeira, 2016-04-22 The relationship between parliaments and citizens is one of the least studied subjects in legislative studies yet this is a crucial dimension to understand parliaments and the role they play in our political systems Furthermore this relationship has gained considerable visibility over the last decade thanks in part to the development of new media but also as a reaction to the trends of political apathy In a context of increasing political disengagement parliamentary discourse shifted attention from the traditionally predominant relationship with government to the relationship with citizens Issues of legitimacy became more directly associated with the link between parliament and citizens resulting in investment in new and more complex mechanisms for contact with citizens even in the more centralised systems This book looks at a wide range of case studies across Europe and beyond assessing overall strategies in the move towards stronger engagement with citizens It assesses the extent to which the shift in discourse has led to actual changes in parliamentary practice This book was published as a special issue of the Journal of Legislative Studies

Post-Communist and Post-Soviet Parliaments Philip Norton, David M. Olson, 2013-09-13 The sudden collapse of communism stimulated both the rapid emergence of fledgling democracies and scholarly attention to the post communist transition These newly democratized parliaments have been described as parliaments in adolescence This book identifies six parliaments which exemplify the wide range of developments in the new post communist political systems from the stable consolidated democracies to the less stable and more authoritarian states within which their respective parliaments function Finally the post communist parliaments are compared with the presumptively more established west European parliaments This book bridges the usual gap in research between the post communist parliaments and more normal democratic parliaments to develop a common legislative research perspective on both new and established parliaments This book was previously published as a special issue of the Journal of Legislative Studies

Ceremony and Ritual in Parliament Shirin M. Rai, 2013-10-18 Ceremony and Ritual in Parliament breaks new ground in the study of

legislatures It combines mainstream historical and social science approaches with cultural theory to consider how parliamentary ritual is constructed through ceremony space and socialisation The focus is on the marginalised groups especially women and members of ethnic minorities who seek inclusion as representatives in democratic legislatures This book assesses aspects of the role that ceremony and ritual in legislatures play especially but not exclusively in their gendered and racialised dimensions Within this broad frame it considers the impact of space identity ritual and or ceremony on the institutional form of parliament how power is shaped within it how the behaviour of members is facilitated constrained and shaped how power and rituals interact to and how they impinge upon the relationships between representative institutions and citizens Contributions are theoretical and empirical comparative or single country studies of national or sub national legislatures They have interdisciplinary historical or postcolonial perspectives that contribute to this emerging field in the study of parliaments This book was previously published as a special issue of the Journal of Legislative Studies

Parliamentary Communication in EU Affairs Katrin Auel, Tapio Raunio, 2016-03-17 Over the last twenty years the role of national parliaments in EU affairs has gained considerable academic attention Much of the literature however has focused on parliamentary scrutiny and control in EU affairs What tends to be generally overlooked is that the parliamentary communication function is at least as important in EU politics as the control function Democratic legitimacy depends on a vibrant public debate on political solutions and alternatives to allow citizens to make informed political electoral choices and to exercise democratic control Within the EU it is precisely the opacity of policy making processes and the lack of public discourse that have been defined as core problems of democratic legitimacy Here parliaments have the potential to provide an ideal arena for the deliberation of important European issues and thus to help overcome the much lamented distance between European policy processes and the citizens Yet despite parliaments central relevance for the legitimacy of European politics the parliamentary communication function remains so far under researched The volume aims at filling this gap by providing both qualitative and quantitative comparative data on various communication efforts by national parliaments This book was originally published as a special issue in the Journal of Legislative Studies

an invaluable and comprehensive resource for students scholars researchers and practitioners of the European Union European politics and comparative politics Parliamentary Representation in France Olivier Costa, 2017-07-05 Despite real improvements since the beginning of the last decade legislative studies are still underdeveloped in France compared to other modern democracies This weakness is linked to the characteristics of the political system itself the Constitution of 1958 has created a semi presidential regime the centrality of which has been constantly reinforced since The French parliament is thus supposed to be extremely feeble This lack of interest for legislative studies is also to be found in the specificities of French political sociology which pays little attention to institutions As a result very few papers and books deal with French chambers and MPs Yet they are fascinating cases of study for scholars interested in parliamentary representation professionalization of political life and French politics The French parliament and MPs are deeply paradoxical MPs are very attached to the concept of national sovereignty but remain involved at local level and in surgery work the French National Assembly is supposed to be weak but is quite active and influential citizens are more aware of the role of MPs than it seems and their views and values are closer than predicted This book gathers seven papers from the LEGIPAR research project 2008 2012 The project was designed by the contributors to rejuvenate French legislative studies by collecting systematic data on MPs socio biographical profiles and activities conducting face to face interviews gathering exhaustive data on National Assembly activity and organising focus groups to analyse citizens perceptions of their MPs This book was originally published as a special issue of the Journal of Legislative Studies Parliamentary Opposition in Old and New Democracies Ludger Helms, 2013-10-18 Previously published as a special issue of the Journal of Legislative Studies this volume offers a broad comparative assessment of the many faces of parliamentary opposition in different political legal and cultural settings Issues of political opposition and of parliamentary opposition in particular are at the very heart of the study of democratic processes in different parts of the world Written by leading scholars in the field this book looks both at the core features of the parliamentary opposition itself and its role in the legislative and wider political process This includes an inquiry into the manifold challenges that the parliamentary opposition in many countries has come to face in the more recent past in particular the rise of different non parliamentary opposition actors The countries covered in this volume include the old democracies of the Anglo Saxon world continental Europe and Japan and the new democracies and democratizing regimes in Central and Eastern Europe Latin America and South Africa Another chapter looks at the manifestations of parliamentary opposition within the multi level system of the European Union **Conscience and Parliament** Philip Cowley, 2012-10-12 Considering how the British policy process deals with conscience issues this book covers eight topics discussed by Parliament in the last quarter of a century abortion censorship divorce Sunday trading homosexuality war crimes disability rights and animal welfare China and African Parliaments Innocent Batsani-Ncube, 2025-05-12 China and African Parliaments maps the political controversies surrounding the designing making and utilisation of three parliament buildings

in Southern Africa that were financed and constructed by the People's Republic of China. The book is the first to explore and explain the impact of China's expanding influence in African parliaments. The financing of African parliament buildings is a new and tangible phenomenon around which to understand China-Africa relations, the evolution of African parliaments and policy relevant debates on contemporary representative politics in Africa, topics all tackled in this book. The book draws on eight months of mixed method fieldwork in Lesotho, Malawi and Zimbabwe. Data was collected through official access to all three buildings, key informant interviews with political and civil society elites and focus group discussions with a cross section of ordinary citizens who live and work around the buildings. The book makes two distinct contributions to the China-Africa relations and African parliaments literature. The first contribution is to advance a ground breaking argument that China's method of donating Parliament buildings to African countries indicates that it is targeting the institution as a site of long term influence. The second contribution is to make a theoretical and comparative case to utilise discussion of the concept of African legislative institutionalisation through and in juxtaposition to these Chinese government funded parliament buildings.

Oxford Studies in African Politics and International Relations is a series for scholars and students working on African politics and International Relations and related disciplines. Volumes concentrate on contemporary developments in African political science, political economy and International Relations, such as electoral politics, democratization, decentralization, gender and political representation, the political impact of natural resources, the dynamics and consequences of conflict, comparative political thought and the nature of the continent's engagement with the East and West. Comparative and mixed methods work is particularly encouraged, as is interdisciplinary research and work that considers ethical issues relating to the study of Africa. Case studies are welcomed but should demonstrate the broader theoretical and empirical implications of the study and its wider relevance to contemporary debates. The focus of the series is on sub-Saharan Africa, although proposals that explain how the region engages with North Africa and other parts of the world are of interest.

Parliamentary Roles in Modern Legislatures Magnus Blomgren, Olivier Rozenberg, 2015-02-13. This book gathers the most influential authors on role research and legislative studies to examine the different roles that MPs are playing in modern day legislatures. It provides a comprehensive and critical overview of current research on legislative roles, summarises previous research, presents a large variety of methodological approaches and also explores the latest developing approaches to role theory. The concept of political roles has become increasingly relevant for understanding contemporary political systems. Parliamentary legislative and representative roles are professional roles that provide a way of connecting

the individual legislator to their institution that can also explain a legislator's attitude and behaviour Drawing upon case studies with as much as 40 years of data that include Germany the Netherlands UK Austria Hungary Australia New Zealand and the European Parliament this book examines the link between representative roles different institutional settings and parliamentary behaviour It argues that the roles MPs play depend of who they think they should represent between their voters their party the people of their country and also themselves conflicts of loyalty can occur This book provides a framework to analyse MPs choices by searching both the reasons for their views about representation and the consequences of those views in parliament Parliamentary Roles in Modern Legislatures will be of strong interest to students and scholars of government legislative studies political parties comparative politics political sociology and deliberative democracy *Fifty Years of Bangladesh Parliament* M. Jashim Ali Chowdhury, 2025-01-20 This book critically examines the constitutional position and contribution of the Bangladesh Parliament during the fifty years of its existence Examining the institution through a Westminster lens the book unearths how and why it behaves in an un Westminster rather say the Eastminster way This book is the first of its kind attempting a separation of powers and checks and balances inspired analysis of the Parliament vis vis Bangladesh's government judiciary and the people It explains how its internal democracy deficit arising from the country's undemocratic political parties deny the Bangladesh Parliament its rightful place within the country's constitutional design *The Uneasy Relationships Between Parliamentary Members and Leaders* Reuven Y. Hazan, Lawrence D. Longley, 2014-04-04 The bases of uneasy member leadership relations their manifestation and sometimes resolution and the consequences of member leadership tension to effective parliamentary performance and policy making are considered in studies ranging from Germany to the US and New Zealand and globally *The Madisonian Turn* Torbjörn Bergman, Kaare Strøm, 2011-06-14 Parliamentary democracy is the most common regime type in the contemporary political world but the quality of governance depends on effective parliamentary oversight and strong political parties Denmark Finland Iceland Norway and Sweden have traditionally been strongholds of parliamentary democracy In recent years however critics have suggested that new challenges such as weakened popular attachment the advent of cartel parties the judicialization of politics and European integration have threatened the institutions of parliamentary democracy in the Nordic region This volume examines these claims and their implications The authors find that the Nordic states have moved away from their previous resemblance to a Westminster model toward a form of parliamentary democracy with more separation of powers features a Madisonian model These features are evident both in vertical power relations e.g. relations with the European Union and horizontal ones e.g. increasingly independent courts and central banks Yet these developments are far from uniform and demonstrate that there may be different responses to the political challenges faced by contemporary Western democracies
