Committee on the Judiciary,1998    **The Prisoners' World** William S. Tregea,Marjorie S. Larmour,2009-03-16 Drawing on twenty five years of teaching prison college and volunteer classes in eleven Michigan and California prisons The Prisoners World strives to make the prisoners

voice come alive for regular college students. The book starts off by tracing shifts in social definitions of criminality and lays out the premises of the U.S. incarceration binge in the 1986 War on Drugs laws and subsequent mandatory sentencing and policing. Later chapters discuss issues such as leaving home, cell life, correctional officers and treatment of the homosexual prisoner and drugs. Furthermore, the book discusses the teachers' experiences via author narrative essays that draw the reader into prisoner student and prisoner teacher interaction and what it is like inside prison college classes where both young and older black prisoner students describe growing up in the inner cities. The book also draws upon over sixty prisoner essays that provide insight on prisoner life and self-concept with insights on pathways to prison drug selling, the inner city and guns. There is also a strong focus on the inside experiences of entering prison and orientation daily work routine, correctional officers and surreptitious activities like cell cooking and contraband. These essays are capped by prisoner critiques of prison life from those still in the system. The Prisoners' World serves as a successful supplemental book whose material has proven useful in undergraduate criminal justice classes. As college students themselves on campus, students in these classes will identify with the prisoner student voices who share their experiences but in a radically different environment.

**Gandhi and the Psychology of Nonviolence, Volume 1** V. K. Kool, Rita Agrawal, 2020-11-06

The first of two volumes, this book examines Gandhi's contribution to an understanding of the scientific and evolutionary basis of the psychology of nonviolence through the lens of contemporary researches on human cognition, empathy, morality, and self-control. While psychological science has focused on those participants that delivered electric shocks in Professor Stanley Milgram's famous experiments, these books begin from the premise that we have neglected to fully explore why the other participants walked away. Building on emergent research in the psychology of self-control and wisdom, the authors illustrate what Gandhi's life and work offers to our understanding of these subjects who disobeyed and defied Milgram. The authors analyze Gandhi's actions and philosophy as well as original interviews with his contemporaries to elaborate a modern scientific psychology of nonviolence from the principles he enunciated and which were followed so successfully in his Satyagrahas. Gandhi, they argue, was a practical psychologist from whom we can derive a science of nonviolence which, as Volume 2 will illustrate, can be applied to almost every subfield of psychology but particularly to those addressing the most urgent issues of the 21st century. This book is the result of four decades of collaborative work between the authors. It marks a unique contribution to studies of both Gandhi and the current trends in psychological research that will appeal in particular to scholars of social change, peace studies, and peace psychology and serve as an exemplar in teaching one of modern psychology's hitherto neglected perspectives.
