**The Bird Observer** ,2005 Birdology Sy Montgomery,2011-08-04 Meet the ladies a flock of smart affectionate highly individualistic chickens who visit their favorite neighbors devise different ways to hide from foxes and mob the author like she s a rock star In these pages you ll also meet Maya and Zuni two orphaned baby hummingbirds who hatched from eggs the size of navy beans and who are little more than air bubbles fringed with feathers Their lives hang precariously in the balance but with human help they may one day conquer the sky Snowball is a cockatoo whose dance video went viral on YouTube and who s now teaching schoolchildren how to dance You ll meet Harris s hawks named Fire and Smoke And you ll come to know and love a host of other avian characters who will change your mind forever about who birds really are Each of these birds shows a different and utterly surprising aspect of what makes a bird a bird and these are the lessons of Birdology that birds are far stranger more wondrous and at the same time more like us than we might have dared to imagine In Birdology beloved author of The Good Good Pig Sy Montgomery explores the essence of the otherworldly creatures we see every day By way of her adventures with seven birds wild tame exotic and common she weaves new scientific insights and narrative to reveal seven kernels of bird wisdom The first lesson of Birdology is that no matter how common they are Birds Are Individuals as each of Montgomery s distinctive Ladies clearly shows In the leech infested rain forest of Queensland you ll come face to face with a cassowary a 150 pound man tall flightless bird with a helmet of bone on its head and a slashing razor like toenail with which it occasionally eviscerates people proof that Birds Are Dinosaurs You ll learn from hawks that Birds Are Fierce from pigeons how Birds Find Their Way Home from parrots what it means that Birds Can Talk and from 50 000 crows who moved into a small city s downtown that Birds Are Everywhere They are the winged aliens who surround us Birdology explains just how very other birds are Their hearts look like those of crocodiles They are covered with modified scales which are called feathers Their bones are hollow Their bodies are permeated with extensive air sacs They have no hands They give birth to eggs Yet despite birds and humans disparate evolutionary paths we share emotional and intellectual abilities that allow us to communicate and even form deep bonds When we begin to comprehend who birds really are we deepen our capacity to approach understand and love these otherworldly creatures And this ultimately is the priceless lesson of Birdology it communicates a heartfelt fascination and awe for birds and restores our
