**Elephant Slaves & Pampered Parrots** Louise E. Robbins,2003-04-29 This lively history adds a new dimension to our understanding of 18th century France by exploring the Parisian fashion of importing exotic animals American Historical Review In 1775 a visitor to Laurent Spinacuta s Grande M nagerie at the annual winter fair in Paris would have seen two tigers several kinds of monkeys an armadillo an ocelot and a condor in all forty two live animals In the streets of the city one

could observe performing elephants and a fighting polar bear Those looking for unusual pets could purchase parrots flying squirrels and capuchin monkeys The royal menagerie at Versailles displayed lions cranes an elephant a rhinoceros and a zebra which in 1760 became a major court attraction For Enlightenment era Parisians exotic animals piqued scientific curiosity and conveyed social status Their variety and accessibility were a boon for naturalists like Buffon author of *Histoire naturelle* Louis XVI use his menagerie to demonstrate his power while critics saw his caged animals as metaphors of slavery and oppression In her engaging account Robbins considers nearly every aspect of France's obsession with exotic fauna from the animals transportation and care to the inner workings of the oiseleurs birdsellors guild Based on wide ranging research *Elephant Slaves and Pampered Parrots* offers a major contribution to the history of human animal relations eighteenth century culture and French colonialism

**Mrs. Ballard's Parrots** Arne Svenson,2005-04-01 In the late 1960s Alba Ballard a Long Island housewife decided it would be a cute idea to dress up one of her many pet parrots in a little costume She sewed a tiny outfit attached snaps to the back and slipped it onto one of the birds Delighted with the results Alba began creating increasingly detailed costumes for her always available and willing subjects Soon she began staging

elaborate theatrical productions casting her costumed parrots in scene reenactments from popular movies TV shows historical events and 1970s popular culture Her husband Marvin would assist in creating sets and props and would photograph the productions at Alba s direction The resulting imagery from this collaboration among wife husband and parrots is a look into the highly creative mind of Alba Ballard Untrained as an artist she nevertheless was able to create works that embodied her fantasies her humor and her passions And what fantasies she had In her world parrots became tiny winged overdressed incarnations of such luminaries as Sonny and Cher Liberace and General George Patton Yellow and green macaws rode around on little motorcycles dressed in leather jackets reenacting scenes from Easy Rider and changing costumes could then effortlessly slip into roles from TV s Batman and Robin The Dean Martin Show and a commercial for Soft and Dry deodorant Eventually Alba and her feathered cast appeared on the David Letterman Show Saturday Night Live and even in Woody Allen s feature film Broadway Danny Rose Very few of the photographs that Alba and Marvin created are still in existence and sadly Alba passed away in 1994 However in 1992 a small collection of these photographs was discovered in the Swiss home of Elizabeth Taylor Just after their discovery the photographs reached the hands of photographer and author Arne Svenson who has now gathered them together in this book Book jacket [Fourteen Monkeys](#) Melissa Stewart,2021-07-06 In Man u National Park in Peru an amazing fourteen different species of monkeys live together That s more than in any other rainforest in the world How can they coexist so well Find out in this lyrical rhyming picture book that explores each monkey s habits diet and home illustrating how this delicate ecosystem and its creatures live together in harmony *The Alex Studies* Irene Maxine Pepperberg,2002-04-30 Twenty years ago Pepperberg set out to discover whether large brained highly social parrots were capable of mastering complex cognitive concepts and the rudiments of referential speech This book represents the long awaited synthesis of the studies constituting one of the landmark experiments in modern comparative psychology **Pick Up Your Parrots and Monkeys** William Pennington,2004 Pick up your parrots and monkeys and fall in facing the boat was the traditional last order given to a detachment of British soldiers heading home from India William Pennington heard it from the old salts he met on the docks as he arrived in India at the age of 15 Enlisted as a boy soldier a bugler in the horse artillery he served in the 1930s when the British Army in India was little changed from that described by Kipling Pennington s compelling description of army life in the last days of the Raj is followed by an equally moving account of his experiences in the Burma campaign Promoted from the ranks he fought the Japanese as an artillery officer specialising in forward observation the most dangerous job in the jungle **Monkey Book** Jan Pfloog,1998-01-01 Every child s favorite primates gorillas chimpanzees and of course monkeys are featured in this simple nonfiction picture book Ages 2 5 **Manual of Parrot Behavior** Andrew Luescher,2008-02-28 This authoritative reference the first of its kind is a necessary addition to the library of any practitioner or behaviorist who sees avian companion animals Because of their beauty intelligence playfulness and ability in mimicry parrots are the most widely kept companion birds It is

estimated that more than half of the psittacine cases presented to clinicians are the result of behavioral problems problems inherent to captivity Bringing together a host of international experts on avian behavior *Manual of Parrot Behavior* explores the many facets of psittacine behavior both normal and abnormal The book not only provides readers with a solid understanding of the basic principles of psittacine behavior but also offers useful techniques of diagnosis and treatment for specific problems Covers both normal and abnormal parrot behavior Offers practical techniques on diagnosis and treatment of behavior problems Written by a team of international experts on avian behavior A necessary addition to the library of any practitioner of behaviorist who sees avian companion animals *Automatic Religion* Paul Christopher Johnson, 2021-01-12

What distinguishes humans from nonhumans Two common answers free will and religion are in some ways fundamentally opposed Whereas free will enjoys a central place in our ideas of spontaneity authorship and deliberation religious practices seem to involve a suspension of or relief from the exercise of our will What then is agency and why has it occupied such a central place in theories of the human *Automatic Religion* explores an unlikely series of episodes from the end of the nineteenth century when crucial ideas related to automatism and in a different realm the study of religion were both being born Paul Christopher Johnson draws on years of archival and ethnographic research in Brazil and France to explore the crucial boundaries being drawn at the time between humans nearhumans and automata As agency came to take on a more central place in the philosophical moral and legal traditions of the West certain classes of people were excluded as less than human Tracking the circulation of ideas across the Atlantic Johnson tests those boundaries revealing how they were constructed on largely gendered and racial foundations In the process he reanimates one of the most mysterious and yet foundational questions in trans Atlantic thought what is agency *Provenance and Possession* K. J. P. Lowe, 2024-04-09 A thought provoking study of how knowledge of provenance was not transferred with enslaved people and goods from the Portuguese trading empire to Renaissance Italy In the fifteenth and sixteenth centuries Renaissance Italy received a bounty of goods from Portuguese trading voyages fruits of empire that included luxury goods exotic animals and even enslaved people Many historians hold that this imperial opening up of the world transformed the way Europeans understood the global In this book K J P Lowe challenges such an assumption showing that Italians of this era cared more about the possession than the provenance of their newly acquired global goods With three detailed case studies involving Florence and Rome and drawing on unpublished archival material Lowe documents the myriad occasions on which global knowledge became dissociated from overseas objects animals and people Fundamental aspects of these imperial imports including place of origin and provenance she shows failed to survive the voyage and make landfall in Europe Lowe suggests that there were compelling reasons for not knowing or caring about provenance and concludes that geographical knowledge like all knowledge was often restricted and not valued Examining such documents as ledger entries journals and public and private correspondence as well as extant objects and asking previously unasked questions Lowe meticulously reconstructs the

backstories of Portuguese imperial acquisitions painstakingly supplying the context She chronicles the phenomenon of mixed ancestry children at Florence's foundling hospital the ownership of inanimate luxury goods notably those possessed by the Medicis and the acquisition of enslaved people and animals How and where goods were acquired Lowe argues were of no interest to fifteenth and sixteenth century Italians possession was paramount
