an unprecedented window into the hidden yet vast world of animal minds Alex's brain was the size of a shelled walnut and when Irene and Alex first met birds were not believed to possess any potential for language consciousness or anything remotely comparable to human intelligence Yet over the years Alex proved many things He could add He could sound out words He understood concepts like bigger smaller more fewer and none He was capable of thought and intention Together Alex and Irene uncovered a startling reality We live in a world populated by thinking conscious creatures The fame that resulted was extraordinary Yet there was a side to their relationship that never made the papers They were emotionally connected to one another They shared a deep bond far beyond science Alex missed Irene when she was away He was jealous when she paid attention to other parrots or even people He liked to show her who was boss He loved to dance He sometimes became bored by the repetition of his tests and played jokes on her Sometimes they sniped at each other Yet nearly every day they each said I love you Alex and Irene stayed together through thick and thin despite sneers from experts extraordinary financial sacrifices and a nomadic existence from one university to another The story of their thirty year adventure is equally a landmark of scientific achievement and of an unforgettable human animal bond
