Parsifal Mosaic:

The Parsifal Mosaic Robert Ludlum, 2015-06-02 Michael Havelock's world died on a moonlit beach on the Costa Brava as he watched his partner and lover double agent Jenna Karas efficiently gunned down by his own agency. There's nothing left for him but to quit the game and get out. Then in one frantic moment on a crowded railroad platform in Rome, Havelock sees Jenna racing around the globe in search of his beautiful betrayer. Havelock is now marked for death by both U.S. and Russian assassins trapped in a massive mosaic of treachery created by a top-level mole with the world in his fist. The Parsifal Mosaic Robert Ludlum, 1982 **The Rise of Nuclear Fear** Spencer R. Weart, 2012-04-02 After a tsunami destroyed the cooling system at Japan's Fukushima Nuclear Power Plant, triggering a meltdown, protesters around the world challenged the use of nuclear power. Germany announced it would close its plants by 2022. Although the ills of fossil fuels are better understood than ever, the threat of climate change has never aroused the same visceral dread or swift action. Spencer Weart dissects this paradox, demonstrating that a powerful web of images surrounding nuclear energy holds us captive, allowing fear rather than facts to drive our thinking and public policy. Building on his classic *Nuclear Fear*, Weart follows nuclear imagery from its origins in the symbolism of medieval alchemy to its appearance in film and fiction. Long before nuclear fission was discovered, fantasies of the destroyed planet, the transforming ray, and the white city of the future took root in the popular imagination. At the turn of the twentieth century, when limited facts about radioactivity became known, they produced a blurred picture upon which scientists and the public projected their hopes and fears. These fears were magnified during the Cold War when mushroom clouds no longer needed to be imagined; they appeared on the evening news. Weart examines nuclear anxiety in sources as diverse as Alain Resnais's film *Hiroshima Mon Amour*, Cormac McCarthy's novel *The Road*, and the television show *The Simpsons*. Recognizing how much we remain in thrall to these setpieces of the imagination, Weart hopes will help us resist manipulation from both sides of the nuclear debate.

Robert Ludlum's (TM) The Arctic Event Robert Ludlum, James H. Cobb, 2007-09-26 On a remote island in the Canadian Arctic, researchers discover the wreckage of a mysterious World War II era aircraft, a discovery that forces the Russian Federation into a shocking admission. The unmarked plane is a Soviet strategic bomber that disappeared with its crew more than fifty years ago while carrying two metric tons of weaponized anthrax. Desperate to prevent a political and diplomatic firestorm, the U.S. president dispatches a Covert One team led by Lieutenant Colonel Jon Smith to the crash site. But others have reached the frigid, windswept island first, including an international arms dealer and his crew of vicious mercenaries. As for the Russians, they are lying: a second, even deadlier secret rests within the hulk of the lost bomber, a secret the Russians are willing to kill to protect. Trapped in a polar wilderness, Smith and his team find themselves fighting a savage

Kyle Mills, 2013-02-26. Meanwhile in the mountains of Afghanistan CIA operative Randi Russell encounters an entire village of murdered Afghans all equipped with enhanced Merge technology that even the Agency didn't know existed. As Smith and Russell delve into the circumstances surrounding the Afghans' deaths, they're quickly blocked by someone who seems to have access to the highest levels of the military, a person that even the president knows nothing about. Is the Merge really as secure as its creator claims? And what secrets about its development is the Pentagon so desperate to hide? Smith and Russell are determined to learn the truth, but they may pay for it with their lives.
