*Normalization and Partial Evaluation of Functional Logic Programs* Björn Peemöller, 2017-06-16 The functional logic programming paradigm combines the two most important fields of declarative programming namely functional and logic programming in an integrated way to allow the concise notation of high level programs However the variety of concepts and conciseness of programs may also impact their efficiency In this work we employ the powerful optimization technique of partial evaluation to develop a fully automatic program optimizer the so called partial evaluator In particular we formalize the normalization of programs during compilation establish a formal notation of the evaluation process develop a formal partial evaluation scheme and prove its correctness and termination and implement a working partial evaluator which shows impressive results *Index of Conference Proceedings*, 1996

**Logic Based Program Synthesis and Transformation** M. Leuschel, 2003-06-18 This book constitutes the thoroughly refereed post proceedings of the 12th International Workshop on Logic Based Program Synthesis and Transformation LOPSTR 2002 held in Madrid Spain in September 2002 The 15 revised full papers presented together with 7 abstracts were carefully selected during two rounds of reviewing and revision from 40 submissions The papers are organized in topical sections on debugging and types tabling and constraints abstract interpretation program refinement verification partial evaluation and rewriting and object oriented development The Cumulative Book Index, 1997 A world list of books in the English language

*Domain-Specific Program Generation* Christian Lengauer, Don Batory, Charles Consel, Martin Odersky, 2004-05-24 Program generation holds the promise of helping to bridge the gap between application level problem solutions and efficient implementations at the level of today's source programs as written in C or Java Thus program generation can substantially contribute to reducing production cost and time to market in future software production while improving the quality and stability of the product This book is about domain specific program generation it is the outcome of a Dagstuhl seminar on the topic held in March 2003 After an introductory preface by the volume editors the 18 carefully reviewed revised full papers presented are organized into topical sections on surveys of domain specific programming technologies domain specific programming languages tool support for program generation domain specific techniques for program optimization Generic Programming Mehdi Jazayeri, Rüdiger G.K. Fuchs, 2003-05-20 This volume contains the papers from the Seventh International Workshop on Logic Program Synthesis  
and Transformation LOPSTR 97 that took place in Leuven Belgium on July 10-12 1997 back to back with the Fourteenth  
International Conference on Logic Programming ICLP 97 Both ICLP and LOPSTR were organised by the K U Leuven  
Department of Computer Science LOPSTR 97 was sponsored by Compulog Net and by the Flanders Research Network on  
Declarative Methods in Computer Science LOPSTR 97 had 39 participants from 13 countries There were two invited talks by  
Wolfgang Bibel Darmstadt on A multi level approach to program synthesis and by Henning Christiansen Roskilde on Implicit  
program synthesis by a reversible metainterpreter Extended versions of both talks appear in this volume There were 19  
technical papers accepted for presentation at LOPSTR 97 out of 33 submissions Of these 15 appear in extended versions in

Shrobe, 2003-08-03 The 18 revised full papers presented in this book together with an introductory survey were carefully  
reviewed and constitute the documentation of the Second International Workshop on Self adaptive Software IWSAS 2001  
held in Balatonfured Hungary in May 2001 Self adaptive software evaluates its own behavior and changes it when the  
evaluation indicates that the software does not accomplish what it is intended to do or when better functionality or better  
performance is possible The self adaptive approach in software engineering builds on well known dynamic features familiar  
to Lisp or Java programmes and aims at improving the robustness of software systems by gradually adding new features of  
self adaption or autonomy Proceedings of the ... ACM SIGPLAN Workshop on Partial Evaluation and Semantics-Based

Reasoning** Ulrich Furbach, 1997-07-02 Development and environment problems have reached such alarming proportions  
that the very survival of humanity is now subject to critical and unprecedented threats In its latest report the German  
Advisory Council on Global Change WBGU criticizes Germany's global change research community for its lack of  
international orientation its bias towards individual disciplines and for its weaknesses in translating scientific results into a  
form readily accessible to policymakers The Council identifies alternatives for restructuring the research landscape focusing  
primarily on a new Syndrome Approach for global change research By applying this tool scientists can systematically

,1996 *ECOOP '99 - Object-Oriented Programming* Rachid Guerraoui,2014-03-12 My tailor is Object Oriented Most software systems that have been built recently are claimed to be Object Oriented Even older software systems that are still in commercial use have been upgraded with some OO flavors The range of areas where OO can be viewed as a must have feature seems to be as large as the number of fields in computer science If we stick to one of the original views of OO that is to create cost effective software solutions through modeling physical abstractions the application of OO to any field of computer science does indeed make sense There are OO programming languages OO operating systems OO databases OO specifications OO methodologies etc So what does a conference on Object Oriented Programming really mean I honestly don't know What I do know is that since its creation in 1987 ECOOP has been attracting a large number of contributions and ECOOP conferences have ended up with high quality technical programs featuring interesting mixtures of theory and practice Among the 183 initial submissions to ECOOP 99 20 papers were selected for inclusion in the technical program of the conference Every paper was reviewed by three to five referees The selection of papers was carried out during a 4 day program committee meeting at the Swiss Federal Institute of Technology in Lausanne Papers were judged according to their originality presentation quality and relevance to the conference topics [Handbook of Continued Fractions for Special Functions](#) Annie A.M. Cuyt,Vigdis Petersen,Brigitte Verdonk,Haakon Waadeland,William B. Jones,2008-04-12 Special functions are pervasive in all fields of science and industry The most well known application areas are in physics engineering chemistry computer science and statistics Because of their importance several books and websites see for instance <http://functions.wolfram.com> and a large collection of papers have been devoted to these functions Of the standard work on the subject the Handbook of mathematical functions with formulas graphs and mathematical tables edited by Milton Abramowitz and Irene Stegun the American National Institute of Standards claims to have sold over 700 000 copies But so far no project has been devoted to the systematic study of continued fraction representations for these functions This handbook is the result of such an endeavour We emphasise that only 10% of the continued fractions contained in this book can also be found in the Abramowitz and Stegun project or at the Wolfram website [Transactions and Database Dynamics](#) Gunter Saake,Kerstin Schwarz,Can Türker,2003-06-26 These post proceedings contain the revised versions of the accepted papers of the international workshop Transactions and Database Dynamics which was the eighth workshop in a series focusing on foundations of models and languages for data and objects FoMLaDO Seven long papers and three short papers were accepted for inclusion in the proceedings The papers address various issues of transactions and database dynamics criteria and protocols for global snapshot isolation in federated transaction management unified theory of concurrency control and replication control specification of evolving information systems inheritance mechanisms for deductive object databases with updates specification of active rules for maintaining database consistency integrity checking in subtransactions open nested transactions for multi tier architectures declarative specification of transactions with static and dynamic integrity constraints

logic based specification of update queries as open nested transactions and execution guarantees and transactional processes in electronic commerce payments In addition to the regular papers there are papers resulting from two working groups The first working group paper discusses the basis for transactional computation In particular it addresses the specification of transactional software The second working group paper focuses on transactions in electronic commerce applications Among others Internet transactions payment protocols and currency control and persistence mechanisms are discussed Moreover there is an invited paper by Jari Veijalainen which discusses transactional aspects in mobile electronic commerce
