Theorizing World Orders Piki Ish-Shalom, Markus Kornprobst, Vincent Pouliot, 2021-11-25 Breaks new theoretical ground by discussing how cognitive evolution contributes to the study of international orders

From Early Child Development to Human Development Mary E. Young, 2002 It is never too early to become involved but it can easily be too late Armed with such alarming statistics as 125 million primary school age children are not in school another 150 million children drop out of primary school before they complete four years of education and almost one half of the children in the least developed countries of the world do not have access to primary education the World Bank convened a global conference in April 2000 to address the benefits and challenges of investing in early childhood development Scientific studies

now show how critical the first few years of a child's life are in terms of later physical and mental health behavior and capacity to learn The Millennium Development Goals endorsed by 189 member countries of the United Nations and the World Bank are targets for reducing global poverty The goals specifically address the need for universal primary education as a means for breaking the cycle of poverty in individual families and in countries With the publication of this volume which contains the conference proceedings the World Bank hopes to encourage a broader investment by countries companies organizations and private sector institutions in early child development Armed with such alarming statistics as 125 million primary school age children are not in school another 150 million children drop out of primary school before they complete four years of education and almost one half of the children in the least developed countries of the world do not have access to primary education the World Bank convened a global conference in April 2000 to address the benefits and challenges of investing in early childhood development Scientific studies now show how critical the first few years of a child's life are in terms of later physical and mental health behavior and capacity to learn The Millennium Development Goals endorsed by 189 member countries of the United Nations and the World Bank are targets for reducing global poverty The goals specifically address the need for universal primary education as a means for breaking the cycle of poverty in individual families and in countries With the publication of this volume which contains the conference proceedings the World Bank hopes to encourage a broader investment by countries companies organizations and private sector institutions in early child development

Health Care Systems: Rethinking health care systems Jonathan Watson, Pavel Ovseiko, 2005 This collection covers the organization financing and regulation of health care systems in four clear contexts reforming health care systems understanding health care politics financing and delivering health care rethinking health care systems Resettling Displaced People Hari Mohan Mathur, 2012-03-12 Developmental projects have long been displacing people in large numbers every year but it is only in recent years that the fate of those adversely affected has become an issue of widespread concern requiring urgent action This volume is the scholarly exploration of these critical issues in a wider perspective examining resettlement policies as well as resettlement strategies their strengths their weaknesses the persisting gap between policy and its actual practice and the means to improve resettlement outcomes This volume is well structured into four parts a Displacement and Resettlement in Developmental Projects b Re-examining Resettlement Policies c Addressing Resettlement Concerns and d Resettlement in a Globalizing World It goes beyond the common description of resettlement problems and attempts at gaining a deeper understanding of resettlement realities In a separate section the book discusses the hotly debated current issues of resettlement policy and practice in the context of globalization The volume contains original case studies which will bring to academic and policy tables a body of important new ideas that will stimulate debates and also hopefully change and improve current practices The contributors to this volume are eminent scholars including some who have played a vital role in shaping resettlement policies as well as in implementing projects at the grassroots level

Impact Evaluation of Small and Medium Enterprise Programs in Latin America and the Caribbean Gladys

Lopez Acevedo, Hong Tan, 2011 Small and medium enterprise SME support programs are a common feature of industrial policy in developing countries but one whose effectiveness is not well known Governments are motivated to support SMEs both because they make up the majority of industrial enterprises and contribute substantially to GDP employment and earnings and because SMEs are thought to be weaker than their larger counterparts Few governments however have evaluated their SME programs rigorously so there is little empirical basis for rational allocation of resources to the well performing programs The paucity of empirical evidence from rigorous impact evaluations also presents problems for multi lateral and bilateral donors in deciding whether or not to provide lending or aid for such policy interventions to promote SME development This study rigorously evaluate SME programs in four Latin American countries to gain insights into which programs perform better than others and just as important why These countries Mexico Chile Colombia and Peru cover a wide range of enterprise support programs including training innovation and technology upgrading quality control market development export promotion and network formation Broadly comparable panel data on enterprises is used to investigate the net impacts of these SME interventions **Global Crises, Social Justice, and Education** Michael W.

Apple, 2009-12-16 Education cannot be understood today without recognizing that nearly all educational policies and practices are strongly influenced by an increasingly integrated international economy Reforms in one country have significant effects in others just as immigration and population tides from one area to another have tremendous impacts on what counts as official knowledge and responsive and effective education But what are the realities of these global crises that so many people are experiencing and how do their effects on education resonate throughout the world Global Crises Social Justice and Education looks into the ways we understand globalization and education by getting specific about what committed educators can do to counter the relations of dominance and subordination around the world From some of the world s leading critical educators and activists this timely new collection provides thorough and detailed analyses of four specific centers of global crisis the United States Japan Israel Palestine and Mexico Each chapter engages in a powerful and critical analysis of what exactly is occurring in these regions and counters with an equally compelling critical portrayal of the educational work being done to interrupt global dominance and subordination Without settling for vague ideas or romantic slogans of hope Global Crises Social Justice and Education offers real concrete examples and strategies that will contribute to ongoing movements and counter hegemonic struggles already active in education today **World Bank Group**
