Particular Place:

A Particular Place Nancy L. Eiesland, 2000 Focusing on how the religious congregations all Protestant of a particular town adapted to a rapid influx of newcomers this book makes a significant contribution to sociological literature in an interesting narrative style Eiesland's work is the perfect complement to that of other major contributors in the field such as Robert Wuthnow Wade Clark Roof William McKinney David A Rootzen Jackson Carroll and Nancy T Ammerman Digital Places Michael Curry, 2008-01-28 By offering an understanding of Geographic Information Systems within the social economic legal political and ethical contexts within which they exist the author shows that there are substantial limits to their ability to represent the very objects and relationships people and places that many believe to be most important Focusing on the ramifications of GIS usage Digital Places shows that they are associated with far reaching changes in the institutions in which they exist and in the lives of those they touch In the end they call for a complete rethinking of basic ideas like privacy and intellectual property and the nature of scientific practice that have underpinned public life for the last one hundred years

Reading and Writing Place Erika L. Bass, Amy Price Azano, 2024-02-27 Using a place infused narrative writing unit with two rural schools in two different states the authors argue for a nuanced understanding of using place in the classroom This book explores how student data led the authors to develop the concept of place Big P Place and small p place
