## **Parties Trade Unions And Society In East Central Europe:**

*Parties, Trade Unions and Society in East-Central Europe* Michael Waller, Martin Myant, 2022-12-30 Originally published in 1994 this volume analyses the relationship between political parties and trade unions in Poland the Czech Republic Slovakia Hungary and Bulgaria Political parties had high visibility in the changes that took place in Eastern Europe during the 1980s and early 1990s Far less visible were the developments in the trade union sphere where the old mass organizations of the communist period now independent were joined by newly formed organizations and both played a central role in politics Special issue: Parties, trade unions and society in East Central Europe Michael Waller, 1993

**Party Structure and Organization in East-Central Europe** Paul G. Lewis, 1996-01-01 this volume represents one of the best works written to date on party organizational development in east central Europe and is essential reading for all political scientists interested in party politics in postcommunist systems John T Ishiyama Slavonic Review **Party Structure and Organization in East Central Europe** focuses on the origin and development of new political parties within different countries in East Central Europe The book has a clear focus on party structure and organization It is one of the first books to present empirical studies of the development of political parties in Eastern Europe Whilst making a distinctive contribution it also feeds into the broader debate about party development and links with other issues of political theory *The Oxford Handbook of Employment Relations* Adrian Wilkinson, Geoffrey Wood, Richard Deeg, 2014-03-13 There have been numerous accounts exploring the relationship between institutions and firm practices However much of this literature tends to be located into distinct theoretical traditional silos such as national business systems social systems of production regulation theory or varieties of capitalism with limited dialogue between different approaches to enhance understanding of institutional effects Again evaluations of the relationship between institutions and employment relations have tended to be of the broad brushstroke nature often founded on macro data and with only limited attention being accorded to internal diversity and details of actual practice The Handbook aims to fill this gap by bringing together an assembly of comprehensive and high quality chapters to enable understanding of changes in employment relations since the early 1970s Theoretically based chapters attempt to link varieties of capitalism business systems and different modes of regulation to the specific practice of employment relations and offer a truly comparative treatment of the subject providing frameworks and empirical evidence for understanding trends in employment relations in different parts of the world Most notably the Handbook seeks to incorporate at a theoretical level regulationist accounts and recent work that link bounded internal systemic diversity with change and at an applied level a greater emphasis on recent applied evidence specifically dealing with the employment contract its implementation and related questions of work organization It will be useful to academics and students of industrial relations political economy and management Labour and Social Transformation in Central and Eastern Europe Violaine Delteil, Vassil Nikolaev Kirov, 2016-07-22 Over a quarter of a century after the fall of the Berlin Wall and 10 years

after their accession to the European Union EU Central and Eastern Europe Countries CEECs still show marked differences with the rest of Europe in the fields of labour work and industrial relations This book presents a detailed and original analysis of labour and social transformations in the CEECs By examining a wide range of countries in Central Europe Labour and Social Transformation in Central and Eastern Europe offers a comprehensive and contrasting view of labour developments in Central and Eastern Europe Chapters explore three related issues The first deals with the understanding of the complex process of Europeanization applied in the sphere of labour employment and industrial relations The second issue refers to the attempt to link the Europeanization approach with an analysis mobilizing the theoretical concept of dependent capitalism s The third issue refers to the cumulative trends of labour weakening and labour awakening that has emerged in particular in the aftermath of the crisis beginning in 2007 2008 This book will be of interest to academics policy makers and stakeholders at European and national level in the EU member states

**Transformation at Work** Anna Pollert, 2000-01-13 The book is well written and clearly structured bringing together much dispersed material The most interesting part of the book is the case study of the Czech engineering firm CKD The case study gives an insight into the continuing processes of transition transition is a process rather than a jump from Socialism to capitalism The author provides solid evidence on the ways in which adjusting to the market has proved painful and in the end unsuccessful for CKD which has been merged with another firm Overall Transformation at Work provides a valuable insight into the realities of the transition process at the enterprise level Employee Relations In this book Anna Pollert questions the values hidden in the burgeoning literature on transformation and addresses the main concerns arising from these In exploring the key issues of post communist transformation the author discusses important theoretical issues about the nature of change and continuity such as historical socio economic and political effects of transformation the broad problems of how workers and their organizations respond to change from command to capitalist economies and case studies of how managers workers and trade unionists experience these changes within their organizations Transformation at Work explores the key issues of post communist transformation in Eastern Europe The author discusses important aspects of the nature of change and continuity including historical socio economic and political effects how workers and their organizations respond to change from command to capitalist economies and how managers workers and trade unionists experience change within their organizations

Building Civil Society and Democracy in New Europe Sven Eliaeson, 2009-03-26 The European enlargement process culminating in 2004 was as a follow up to die Wende and the implosion of the Russian empire an event of the same magnitude as 1815 and 1919 Like 1918 19 it was an exit into history a momentous event in post Westphalian Europe Even if acceptance of ten new countries was premature it was appropriate to the moment history provided The presence of the New kids on the block meant both problems and prospects The end of the cold war meant the fall of the iron curtain but a mental remnant of the curtain remains in terms of attitudes regarding civility corruption and transparency and expectations for democratic politics Several

of the new countries are late children of 1848 For them entering NATO was more important than joining the EU and also preceded EU membership Poland is bigger than the other 2004 countries together and has a heavy historical legacy It is as Germany used to be imprinted by its special path between East and West and fear of being encircled by enemies Although the Building of Civil Society and Democracy in countries in transformation can draw on experiences from the countries already within the EU there is no primrose path for EU integration It is moreover an irony that the new member states as a result of the expectations for post Communist politics build institutions of a kind that are no longer sufficiently efficient for old Europe The new countries became a full scale experiment in rule by experts now by neo liberals instead of Communists A common European public sphere and civil society might emerge but its form remains visible only at the horizon

*Gender and Identity in Central and Eastern Europe* Chris Corrin,1999 This collection highlights elements of the decade of changes in Central and Eastern Europe since 1989 from the perspectives of gender and identity

*The American Bibliography of Slavic and East European Studies for 1994* Patt Leonard,Rebecca Routh,1997-05-31 This text provides a source of citations to North American scholarships relating specifically to the area of Eastern Europe and the former Soviet Union It indexes fields of scholarship such as the humanities arts technology and life sciences and all kinds of scholarship such as PhDs

Organizing Democracy in Eastern Germany Stephen Padgett,2000 The emergence of interest group politics is one of the decisive factors in democratic transformation in post communist society Stephen Padgett argues that evidence from eastern Germany suggests that market transition produces rather open and fluid societies in which group interests and identities are tenuous Lacking a supportive social infrastructure interest groups operate on entrepreneurial lines a form of associational activity which falls far short of pluralist ideals With its accelerated transition to a market economy eastern Germany provides a fast forward study of an advanced post communist society which enables us to anticipate the social structures and issues shaping interest group politics in the newly democratizing states of east central Europe Examining a number of different interest groups and comparing a number of countries across east central Europe this book may also offer a vision of the future of interest group politics in the West

Party Politics in Post-communist Russia John Lowenhardt,2013-01-11 Political parties are the fabric of democratic politics In 1991 a new Russia emerged after seven decades of one party dictatorship claiming to be on the road towards democracy In this volume the authors analyse the many contradictions dilemmas and paradoxes of reconstituting free party politics and democratic rule in a severely traumatized country Frequently from a comparative perspective they deal with a range of topics from the behaviour of the new parties in parliament the role of ideology in cementing party organizations to the character and prospects of the transient Russian party system

European Politics Jan-Erik Lane,Svante Ersson,1996-08-19 This comprehensive textbook is the first to go beyond a West European perspective and provide a clear overview of the whole of European politics Jan Erik Lane and Svante Ersson address the similarities of key political features among states in Western Central Eastern Northern and Southern Europe and look forward to political

developments at the turn of the century Traditionally books have polarized Europe by focusing on points of divergence European Politics provides a thoroughgoing analysis of several converging themes including political culture the nature of the state party systems and the formation of government and public policies With this approach to economic social and political aspects of politics in Europe this major text presents a Europe that within the context of reform transition and integration has more in common in the early 1990s than ever before With a clear thematic structure and helpful discussions of data drawn from some 30 countries European Politics offers both an accessible and genuinely comparative text which will be essential reading for student and researcher alike Postsocialist Pathways David Stark, Laszlo Bruszt, 1998-02-28 This book first published in 1998 analyzes democratization and economic change in the postsocialist societies of East Central Europe **The Global Gamble** Peter Gowan, 1999-08-17 Peter Gowan argues that since the collapse of the USSR the US government has been trying to bring about a unipolar world in which the United States can control and shape the pattern of economic and political change in all regions of the globe **Civil Society Before Democracy** Nancy Bermeo, Philip Nord, 2000-11-15 Bringing together historians and political scientists this unique collaboration compares nineteenth century civil societies that failed to develop lasting democracies with civil societies that succeeded Much of the current literature on the connection between civil society and consolidating democracy focuses exclusively on single contemporary polities that are ever changing and uncertain By studying historical cases the authors are able to demonstrate which civil societies developed in tandem with lasting democracies and which did not Contrasting these two sets of cases the book both enlightens readers about individual countries and extracts lessons about the connections between civil society and democracy in contemporary times Above all the authors ask the vital but under researched question O How and why does democratic civil society develop O *Rebellious Civil Society* Grzegorz Ekiert, Jan Kubik, 2010-08-04 Poland is the only country in which popular protest and mass opposition epitomized by the Solidarity movement played a significant role in bringing down the communist regime This book the first comprehensive study of the politics of protest in postcommunist Central Europe shows that organized protests not only continued under the new regime but also had a powerful impact on Poland's democratic consolidation Following the collapse of communism in 1989 the countries of Eastern Europe embarked on the gargantuan project of restructuring their social political economic and cultural institutions The social cost of these transformations was high and citizens expressed their discontent in various ways Protest actions became common events particularly in Poland In order to explain why protest in Poland was so intense and so particularized Grzegorz Ekiert and Jan Kubik place the situation within a broad political economic and social context and test it against major theories of protest politics They conclude that in transitional polities where conventional political institutions such as parties or interest groups are underdeveloped organized collective protest becomes a legitimate and moderately effective strategy for conducting state society dialogue The authors offer an original and rich description of protest movements in Poland after the fall of

communism as a basis for developing and testing their ideas They highlight the organized and moderate character of the protests and argue that the protests were not intended to reverse the change of 1989 but to protest specific policies of the government This book contributes to the literature on democratic consolidation on the institutionalization of state society relationship and on protest and social movements It will be of interest to political scientists sociologists historians and policy advisors Grzegorz Ekiert is Professor of Government Harvard University Jan Kubik is Associate Professor of Political Science Rutgers University

**Communism, Capitalism and the Mass Media** Colin Sparks, Anna Reading, 1997-12-08 Colin Sparks provides a challenging reassessment of the impact of the collapse of communism on the media systems of Eastern Europe He analyzes both the changes themselves and their implications for the ways in which we think about the mass media while also demonstrating that most of the orthodox accounts of the end of communism are seriously flawed There are much greater continuities between the old system and the new than are captured by the theories that argue that there has been a radical and fundamental change Instead of marking the end of critical inquiry or the end of history as some have suggested Sparks argues that the collapse of the communist systems demonstrates how very limited and frequently incorrect the main ways of discussing the mass media are He concludes with a provocative discussion of the ways in which we need to modify our thinking in the light of these developments

**Czecho/Slovakia** Eric Stein, 2000-01-26 DIV Describes the peaceful breakup of the Czechoslovak Federation div Informal Relations from Democratic Representation to Corruption Zdenka, 2014-04-15 Informal relations have been one of the major research topics of the social sciences since the 1990s In order to allow for meaningful comparisons between different combinations of the positive and negative effects of informal relations on democratic representation this book focuses on post socialist Central and Eastern Europe as a particular region where formal democratic rules have been established but competing informal rules are still strong A broad spectrum of related analytical concepts is discussed from different perspectives and from different academic disciplines then empirical cases of the relationship between informal relations and democratic representation are analyzed The contributions span the whole continuum as we perceive it from civil society networks seen as supporting democratic representation to the perversion of democratic representation through political corruption The final part of the book takes a closer look at corruption through four case studies from Russia

**Perceptions of Society in Communist Europe** Muriel Blaive, 2018-10-18 Drawing on archival sources from Czechoslovakia Poland East Germany Romania and Bulgaria Perceptions of Society in Communist Europe considers whether and to what extent communist regimes cared about popular opinion how they obtained their information and how it helped them implement and maintain their rule Contrary to popular belief communist regimes sought to legitimise their domination with minimal resort to violence in order to maintain their everyday power This entailed a permanent negotiation process between the rulers and the ruled with public approval of governmental policies becoming key to their success By analysing topics such as a Stalinist musical in Czechoslovakia workers letters to the

leadership in Romania children's television in Poland and the figure of the secret agent in contemporary culture as well as many more besides Muriel Blaive and the contributors demonstrate the potential of social history to deconstruct parochial national perceptions of communism This cutting edge volume is a vital resource for academics postgraduates and advanced undergraduates studying East Central European history Stalinism and comparative communism
