Parties And Voters In France:

The French Party System Jocelyn Evans, 2003 This text provides an overview of political parties in France The social and ideological profiles of all the major parties are analysed chapter by chapter highlighting their principal functions and dynamics within the system This examination is complemented by analyses of bloc and system features including the pluralist left Europe and the ideological space in which the parties operate In particular the book addresses the impressive capacity of French parties and their leaders to adapt themselves to the changing concerns of their electorates and to a shifting institutional context Contrary to the apparently fragmentary system and increasingly hostile clashes between political personalities the continuities in the French political system seem destined to persist *The 2017 French Presidential Elections* Jocelyn Evans, Gilles Ivaldi, 2017-12-12 Emmanuel Macron's victory in the 2017 presidential elections represents one of the most important disruptions to French political life since the establishment of the Fifth Republic This book analyses the political opportunities enabling a neophyte to conquer the Elysée and the conditions leading to the unprecedented presidential runoff between this centrist EU enthusiast and pro globalization candidate and the nationalistic populist alternative embodied by Marine Le Pen The book begins by considering trends in party competition and presidentialism in modern France notably presidential primaries and their impact on party competition It then moves to considering the role traditional explanatory factors in elections namely policies and voter profiles played in the result Finally it examines the dynamics of President Macron's success in the legislatures and how he dominated the traditional party blocs This book will appeal to students of French politics as well as those interested in electoral behaviour and European political systems

The Front National in France Daniel Stockemer, 2017-02-28 In light of the transformation of the Front National FN to a major player in French politics this book examines how the unprecedented boost in positive opinions towards the FN as well as its increasing membership and electoral success have been possible Using a supply and demand framework and a mixed methods approach the author investigates the development of the FN and compares the new FN under Marine Le Pen with the old FN under Jean Marie Le Pen across 4 dimensions 1 the party's ideology 2 the leadership styles of the two leaders including the composition of the party elites and the leaders parties relationship with the media 3 the party members and 4 the party voters It appeals to scholars interested in the study of radical right wing movements and parties as well as to anybody interested in French politics

Voting from Abroad Andrew Ellis ,Carlos Navarro ,Isabel Morales ,Maria Gratschew, Nadja Braun, 2007-11-14 The constitutions of many countries guarantee the right to vote for all citizens However in reality voters who are outside their home country when elections take place are often disenfranchised because of a lack of procedures enabling them to exercise that right Voting from Abroad The International IDEA Handbook examines the theoretical and practical issues surrounding external voting It provides an overview of external voting provisions in 115 countries and territories around the world including a map illustrating the regional spread

Parties and the Party

System in France A. Knapp,2004-03-12 The French elections of 2002 broke all records for fragmentation abstention and far right protest voting yet returned incumbent President Chirac in triumph and gave him a solid basis of parliamentary support Parties and the Party System in France seeks to explain the paradox of France s current relationship to politics through a comprehensive analysis of French political parties and their interaction over the last fifty years set against the two contexts of French history and of contemporary theories of parties and party systems **The Extreme Right in France** James Shields,2007-05-07 As well as providing a detailed biography of Le Pen the leader of the National Front in France this book also explores the wider development of the extreme right as a significant intellectual and political force within France

Political Representation in France Philip E. Converse,Roy Pierce,1986 There can scarcely be a greater tribute to the vitality of the Fifth Republic s democracy than this monumental work A searching analysis of how the will of the voters is translated into authoritative political decision making this book not only uncovers political truths about contemporary France but also provides a model for the study of other popular forms of government The authors set out to find an answer to the perplexing question of how representative government operates in France in the seemingly unstable context of multiparties By interviewing voters as well as legislators in 1967 and in 1968 after the great upheaval and by monitoring policies of the National Assembly from 1967 to 1973 the authors test relationships between public opinion and decision making They are able to sort out the abiding political cues that orient the French voter to establish the normal electoral processes to gauge the nature of mass perceptions of the political options available to voters and to interpret the strikes riots and demonstrations of 1968 as a channel of communication parallel to the electoral process itself Lucid in style methodologically sophisticated and often comparative in approach *Political Representation in France* is a seminal work for political scientists sociologists and historians **The Predator State** James Galbraith,2008-08-05 A progressive economist challenges popular conservative minded economic practices in a scathing critique of Reagan Bush policies that contends that the political right is misrepresenting the consequences of free market and free trade ideals 50 000 first printing

Inside the Mind of a Voter Michael Bruter,Sarah Harrison,2025-06-17 An in depth look into the psychology of voters around the world how voters shape elections and how elections transform citizens and affect their lives Could understanding whether elections make people happy and bring them closure matter more than who they vote for What if people did not vote for what they want but for what they believe is right based on roles they implicitly assume Do elections make people cry This book invites readers on a unique journey inside the mind of a voter using unprecedented data from the United States the United Kingdom Germany France South Africa and Georgia throughout a period when the world evolved from the centrist dominance of Obama and Mandela to the shock victories of Brexit and Trump Michael Bruter and Sarah Harrison explore three interrelated aspects of the heart and mind of voters the psychological bases of their behavior how they experience elections and the emotions this entails and how and when elections bring democratic resolution The authors examine unique concepts including electoral

identity atmosphere ergonomics and hostility From filming the shadow of voters in the polling booth to panel study surveys election diaries and interviews Bruter and Harrison unveil insights into the conscious and subconscious sides of citizens psychology throughout a unique decade for electoral democracy They highlight how citizens personality memory and identity affect their vote and experience of elections when elections generate hope or hopelessness and how subtle differences in electoral arrangements interact with voters psychology to trigger different emotions Inside the Mind of a Voter radically shifts electoral science moving away from implicitly institution centric visions of behavior to understand elections from the point of view of voters

Making Votes Count Gary W. Cox, 1997-03-28 Popular elections are at the heart of representative democracy Thus understanding the laws and practices that govern such elections is essential to understanding modern democracy In this book Cox views electoral laws as posing a variety of coordination problems that political forces must solve Coordination problems and with them the necessity of negotiating withdrawals strategic voting and other species of strategic coordination arise in all electoral systems This book employs a unified game theoretic model to study strategic coordination worldwide and that relies primarily on constituency level rather than national aggregate data in testing theoretical propositions about the effects of electoral laws This book also considers not just what happens when political forces succeed in solving the coordination problems inherent in the electoral system they face but also what happens when they fail

Fair Representation Michel L. Balinski, H. Peyton Young, 2010-12-01 The issue of fair representation will take center stage as U S congressional districts are reapportioned based on the 2000 Census Using U S history as a guide the authors develop a theory of fair representation that establishes various principles for translating state populations or vote totals of parties into a fair allocation of congressional seats They conclude that the current apportionment formula cheats the larger states in favor of the smaller contrary to the intentions of the founding fathers and compromising the Supreme Court s one man one

vote rulings Balinski and Young interweave the theoretical development with a rich historical account of controversies over representation and show how many of these principles grew out of political contests in the course of United States history The result is a work that is at once history politics and popular science The book updated with data from the 1980 and 1990 Census counts vividly demonstrates that apportionment deals with the very substance of political power Voting Experiments André Blais, Jean-François Laslier, Karine Van der Straeten, 2016-10-03 This book presents a collection of papers illustrating the variety of experimental methodologies used to study voting Experimental methods include laboratory experiments in the tradition of political psychology laboratory experiments with monetary incentives in the economic tradition survey experiments varying survey question wording framing or content as well as various kinds of field experimentation Topics include the behavior of voters in particular turnout vote choice and strategic voting the behavior of parties and candidates and the comparison of electoral rules **Twilight of the Elites** Christophe Guilluy, 2020-01-07 A passionate account of how the gulf between France's metropolitan elites and its working classes are tearing the country apart Christophe Guilluy a French geographer makes the case that France has become an American society one that is both increasingly multicultural and increasingly unequal The divide between the global economy's winners and losers in today's France has replaced the old left right split leaving many on the periphery As Guilluy shows there is no unified French economy and those cut off from the country's new economic citadels suffer disproportionately on both economic and social fronts In Guilluy's analysis the lip service paid to the idea of an open society in France is a smoke screen meant to hide the emergence of a closed society walled off for the benefit of the upper classes The ruling classes in France are reaching a dangerous stage he argues without the stability of a growing economy the hope for those excluded from growth is extinguished undermining the legitimacy of a multicultural nation Roads to the Radical Right Koen Damhuis, 2020 This ground breaking book is the first volume to systematically investigate the heterogeneity of radical right wing voters

Parties and Democracy in France David Bell, 2018-10-24 This title was first published in 2000 The Presidency has been the principal political focus of the French Fifth Republic and the new component of French democracy This book looks at how the Presidency has shaped political parties and party systems as well as how they have interacted with the new institution The Presidency has acted as a unifying force bringing together coalitions of parties to provide a political basis for presidential power but has also been a divisive factor Parties draw on longstanding traditions of French political life and the Presidency can provoke destructive rivalry as well as constructive coalition building Presented here is a discussion of the contemporary French party system its dynamics successes and failures Written in an accessible style it is intended for students of French studies and political parties as well as comparative politics **Populism Around the World** Daniel Stockemer, 2018-10-02 This book provides a global overview of populist actors and strategies around the globe from a comparative perspective By presenting six country studies on the United States France Poland Turkey the Philippines and

Argentina the contributors analyze how parties from both the radical left and right use a populist discourse combining people centism anti elitism and the exclusion of certain population cohorts from the national community They illustrate how populist actors mobilize and persuade citizens by using simple and slogan based language and charismatic leadership while offering simple solutions to complex problems Each case study describes the history of populism in the respective country current populist actors the strategies these parties and movements employ and how successful these tactics are within the population These case studies are embedded within two theoretical chapters that link the cases to the theoretical and empirical literature on populism This timely book will appeal to anyone interested in understanding the current enormous appeal of populist movements around the globe
