Parting Ways The Crisis In German American Relations:

Parting Ways Stephen F. Szabo, 2004-09-30 Germany and the United States entered the post 9 11 era as allies but they will leave it as partners of convenience or even possibly as rivals The first comprehensive examination of the German American relationship written since the invasion of Iraq Parting Ways is indispensable for those seeking to chart the future course of the transatlantic alliance In early 2003 it became apparent that many nations including close allies of the United States would not participate in the U S led coalition against Iraq Despite the high profile tension between the United States and France some of the most bitter opposition came from Germany marking the end not only of the German American special relationship but also of the broader transatlantic relationship s preeminence in Western strategic thought Drawing on extensive research and personal interviews with decisionmakers and informed observers in both the United States and Germany Stephen F Szabo frames the clash between Gerhard Schröder and George W Bush over U S policy in Iraq in the context of the larger changes shaping the relationship between the two countries Szabo considers such longer term factors as the decreasing strategic importance of the U S German relationship for each nation in the post cold war era the emergence of a new German identity within Germany itself and a U S foreign policy led by what is arguably the most ideological administration of the post World War II era

German-American Relations in the 21st Century Klaus Larres, Ruth Wittlinger, 2020-04-22 German American relations have become interesting again U S President Donald Trump s lukewarm policy toward Europe has ensured that the relationship between Berlin and Washington is once again regarded as an important field of scholarship within global politics And yet it was only a few years ago that German American relations seemed to take second place to transatlantic relations in general and the

European Union EU USA relationship in particular The advent of Donald Trump as US President in January 2017 has made all the difference Trump's difficult personal relationship with German Chancellor Angela Merkel and his denigration of everything the Western world including the USA itself has stood for since 1949 have given a new significance to German American relations in practice and theory This volume offers an empirical and conceptual analysis of German American relations in the 21st century and highlights the serious and perhaps unprecedented challenges the two countries face at present The authors discuss a number of aspects of the current much more fragile state of German American relations from different perspectives This book was originally published as a special issue of the journal *German Politics and Society* *Social Unrest and American Military Bases in Turkey and Germany since 1945* Amy Austin Holmes, 2014-05-29 Over the past century the United States has created a global network of military bases While the force structure offers protection to US allies it maintains the threat of violence toward others both creating and undermining security Amy Austin Holmes argues that the relationship between the US military presence and the non US citizens under its security umbrella is inherently contradictory She suggests that while the host population may be fully enfranchised citizens of their own government they are at the same time disenfranchised vis vis the US presence This study introduces the concept of the protectariat as they are defined not by their relationship to the means of production but rather by their relationship to the means of violence Focusing on Germany and Turkey Holmes finds remarkable parallels in the types of social protest that occurred in both countries particularly non violent civil disobedience labor strikes of base workers violent attacks and kidnappings and opposition parties in the parliaments [Germany, Russia, and the Rise of Geo-Economics](#) Stephen F. Szabo, 2014-12-18 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com Having emerged from the end of the Cold War as a unified country Germany has quickly become the second largest exporter in the world Its economic might has made it the center of the Eurozone and the pivotal power of Europe Like other geo economic powers Germany's foreign policy is characterized by a definition of the national interest in economic terms and the elevation of economic interests over non economic values such as human rights or democracy promotion This strategic paradigm is evident in Germany's relationship with China the Gulf States and Europe but it is most important in regard to its evolving policies towards Russia In this book Stephen F Szabo provides a description and analysis of German policy towards Russia revealing how unified Germany is finding its global role in which its interests do not always coincide with the United States or its European partners He explores the role of German business and finance in the shaping of foreign policy and investigates how Germany's Russia policy affects its broader foreign policy in the region and at how it is perceived by key outside players such as the United States Poland and the EU With reference to public opinion the media and think tanks Szabo reveals how Germans perceive Russians and he uncovers the ways in which its dealings with Russia affect Germany in terms of the importing of corruption and crime Drawing on interviews with key opinion shapers business and financial

players and policy makers and on a wide variety of public opinion surveys media reports and archival sources his will be a key resource for all those wishing to understand the new geo economic balance of Europe *NATO, the European Union, and the Atlantic Community* Stanley R. Sloan, 2005 Provides an interpretive history of the trans atlantic alliance and explores critical developments in US European relations The author considers the ongoing pattern of US unilateralism and its consequences as the trans atlantic and intra European debate over Iraq produced deep splits among the allies and eroded European trust in US leadership Germany and the Common Foreign and Security Policy of the European Union A. Miskimmon, 2007-09-20 This study assesses the influence of German policy makers on EU policy and the impact of EU membership on foreign policy making at the national level The book concludes that limitations remain on the Europeanization of German foreign and security policy and Germany's ability to play a leading role in military crisis management *Follies of Power* David P. Calleo, 2009-04-20 The imagination of America's political elites is dominated by a unipolar vision according to which the world is dominated by the United States But the real world is increasingly plural and others instinctively fear and resist the American vision Chapters 2 and 3 of this book look at the disastrous consequences of the vision at work in the Middle East and in Europe Chapters 4 5 and 6 assess the limits of American power Chapter 7 discusses the problems of order and coexistence in a world that is not unipolar but increasingly plural It speculates on the possible contributions and likely fate of both Old America and New Europe as models for organizing the future America's own constitutional equilibrium David Calleo argues increasingly requires friendly balancing from Europe Both sides of the West must liberate their imaginations from past triumphs to face their responsibilities to the new world and to each other

The United States and Europe John Baylis, Jon Roper, 2007-01-24 A penetrating new examination of the triangular political and cultural relationship between America Britain and continental Europe This relationship is both fraught and dynamic Post war reconstruction of Europe brought integration Creating a United States of Europe was a goal shared by many Americans Yet the contemporary War on Terror has redefined relationships between America Britain old and new Europe For Britain the Channel seems wider than the Atlantic although geopolitically it is part of Europe This book brings together experts from Britain Europe and America to explore the complexities of contemporary cultural and political relationships considering the challenges that have been met and those that have to be faced The Future of European Foreign Policy Erik Jones, Saskia van Genugten, 2013-10-31 The future of European foreign policy is of vital significance to the developing world order The failure of US policy in Iraq has underscored the need for Europe to play a constructive global role Nevertheless divisions within Europe over the Iraq war and over the future development of the European Union have raised questions about the potential for an effective European foreign policy whether organized through EU institutions or via individual member states This book will consider why Europe should assume global responsibilities how they will be organized institutionally whether they will be adequate to address pressing regional and security concerns and how they will

reflect the foreign policy interests of Europe's major powers. It is the intention of this book to cover both thematic and country specific issues ranging from Europe's responsibility as a global actor and EU NATO relations to the specific influence of Germany, France, Italy and the United Kingdom. The contributors come from across the European Union and represent a mix of established and rising scholars. This book was published as a special issue of the Journal of European Integration.

Recognition, Conflict and the Problem of Global Ethical Community Shannon Brincat, 2017-10-02. Recognition is a fundamental aspect of all social interactions between individuals, groups, local communities and sovereign states. Recognition refers to those sociological processes whereby two or more entities such as states, groups such as ethnic or cultural communities or individuals interact with one another and come to understand themselves and the other as mutually free individuals as social agents whose identities, interests and outlooks are equally bound together. Without the foundational act of recognition, relations can become unequal and antagonistic, leading to social pathologies, denigration and even open conflict. This volume brings together leading international scholars of recognition theory in world politics to discuss the potential for recognition to pacify relations between states, groups and individuals and to develop recognition processes in the global community. It examines the implications of recognition theory in helping to understand the problem of conflict and the possibilities for forging a form of global ethical community. This book was published as a special issue of Global Discourse.

Public Opinion and International Intervention Richard Sobel, Peter A. Furia, Bethany Barratt, 2012-05. The role of public opinion in nations' decisions to join or withdraw from the war in Iraq. **Nordic, Central and Southeastern Europe 2012** Wayne C. Thompson, 2012-08-09. This is an annually updated presentation of each sovereign country in Nordic, Central and Southeastern Europe, past and present. It is broken down into individual chapters on each country, dealing with its geography, people, history, political system, constitution, parliament, decentralization and states if a federation, parties, political leaders and elections. There are also sections on foreign and defense policy, economy, culture, future and a lengthy bibliography. NATO and the UN Lawrence S. Kaplan, 2010-02-24. When the North Atlantic Treaty Organization was formed just four years after the United Nations, it provided its members with a measure of security in the face of the Soviet Union's veto power in the senior organization's Security Council as well as a means of coping with Communist expansion. Ever since then the two institutions have been competitors in maintaining peace in the postwar world. Occasionally they have cooperated; more often they have not. In NATO and the UN, Lawrence Kaplan, one of the leading experts on NATO, examines the intimate and often contentious relations between the two and describes how this relationship has changed over the course of two generations. Kaplan documents the many interactions between them throughout their interconnected history, focusing on the major flashpoints where either NATO clashed with UN leadership, the United States and the Soviet Union confronted each other directly or fissures within the Atlantic alliance were dramatized in UN sessions. He draws on the organizations' records as well as unpublished files from the National Archives and its counterparts in Britain, France and Germany to provide the best

account yet of working relations between the two organizations By examining their complex connection with regard to such conflicts as the Balkan wars Kaplan enhances our understanding of both institutions Crisis management has been a source of conflict between the two in the past but has also served as an incentive for collaboration and Kaplan shows how this peculiar but persistent relationship has functioned Although the Cold War years are gone the UN remains the setting where NATO problems have played out as they have in Iraq during recent decades And it is to NATO that the UN has turned for military power to face crises in the Balkans Middle East and South Asia Kaplan stresses the importance of both organizations in the twenty first century recognizing their potential to advance global peace and security while showing how their tangled history explains the obstacles that stand in the way His work offers significant findings that will especially impact our understanding of NATO while filling a sizable gap in our understanding of post World War II diplomacy

Northern Europe and the Making of the EU's Mediterranean and Middle East Policies Timo Behr, Teija Tiilikainen, 2016-05-23 What drives European foreign policy towards the wider Mediterranean and Middle East region This collection takes an innovative approach to answering this question by considering the impact of intra European divisions on European policies towards this crucial region European foreign policy has traditionally been defined by a clear division of labour southern European member states take the lead in the EU's southern neighbourhood while central and northern European countries drive policies in the EU's eastern neighbourhood The resulting north south split has entrenched geo clientalistic behaviour as a core principle of EU foreign policy making and has fuelled a static intra European competition over influence and resources However as European power dynamics shift these old divisions no longer hold and northern and central European countries have been pushed towards a more pro active role in the region But what factors are shaping the foreign policies of these countries in the Mediterranean and Middle East What has been their contribution to common EU policies And does their growing activism signal an end to old geo clientalistic division as a core driver of European foreign policy

Poland, Germany and State Power in Post-Cold War Europe Stefan Szwed, 2018-09-29 This book examines the post Cold War Polish German relationship and the puzzling rise of foreign and security policy differences between the two states during the 2000s Through an investigation of four policy issues NATO's out of area mandate European Constitution and the division of voting power in the Council relations with Russia and the eastern neighbours as well as EU energy policy the author identifies the roots of their conflict in a structure of material spatial and temporal asymmetries Rather than treat them as currency however he explores the less conspicuous ways in which power is exercised and structure matters inside a community governed by shared rules and norms In pursuing its research question theoretical

work historical reconstructions and empirical analyses the book combines security studies transatlantic relations European integration and Polish and German politics with general theorizing and conceptual grounding in international relations and political science

Germany Says "No" Dieter Dettke, 2009-09-25 According to Dieter Dettke Germany's refusal to participate in the Iraq war signaled a resumption of the country's willingness to assert itself in global affairs even in the face of contradictory U S desires Germany Says No reviews the country's actions in major international crises from the first Gulf War to the war with Iraq concluding in contrast to many models of contemporary German foreign policy that the country's civilian power paradigm has been succeeded by a defensive structural realist approach Dettke traces the implications of this change for Germany's participation in multilateral institutions as well as bilateral relations with the U S France Russia China and India

Transatlantic Democracy in the Twentieth Century Paul Nolte, 2016-10-10 Transatlantic democracy in the 20th century this concept goes beyond the idea of an American civilizing mission in Europe after two World Wars and certainly beyond the notion of re educating Germans and making them fit for Western institutions after Nazism As democracy is being contested anew in the beginning of the 21st century a much more complicated landscape of democracy since 1900 emerges Transfer was not a one way street and patterns of conflict and transformation affected both American and European political societies American democracy may not be reduced to a resilient defense of original traditions while the narrative of German democracy is more than redemption from catastrophe The essays in this volume contribute to a new history of transatlantic democracy that accounts for its manifold experiences and constant renegotiations up to the current challenges of American and European populism
